$100 For A Name

Cohn Goodman of Cleveland, Ohio, makers of Style Craft, Coats and Suits for Ladies offer $100 in cash to anyone who suggests the best and most suitable name for their new ladies' coat which they have just put out. We are showing a line of them this week in our cloak department and also in our window display. They come in black and colors. Come in and see them. Think of some suitable name and send it in, we have blanks and instructions which are free and it costs you nothing but a 1c stamp to send it in, and who knows, it might be the means of making $100 for you. Some one is going to get it and it might be you, at any rate it is worth the effort to try for it.

GRAND RAPIDS, WISCONSIN

Time For The New Fall Clothes

There's a lot of talk wandering around loose just at this time concerning the merit of clothes, but it's the store back of the words that counts, and the maker of the clothes too.

We Have Better Goods to Offer for this Fall Than Ever Before

The difference is in the merchandise not the price; better styles, better workmanship.

We can please the man who wants to pay $35.00 or $40.00 for a suit better than his tailor; but we will continue to specialize in medium priced clothes every garment of which is right in style, workmanship and value.

The clothes we specialize are Hirsh, Wickwire and Sincerity makes---$10 to $30

SWEATER COATS

For man or boy in all colors and trimmings, both plain and fancy. All wool coats from.....***$2.50*** to ***$5.00***

Mixed with a little cotton.....***$1*** and up

Genuine French flannel shirts in plain and fancy colors.....***$1.75*** to ***$3***

Plain grey and blue shirts, collars and cuffs trimmed in different colors than body of shirt at.....***$1*** to ***$1.50***

Also boys' flannel shirts in same grades and styles as above at.....***$1*** to ***$1.50***

SAMPSON & HALVORSEN

Mrs. Garrison Hurt.

While on their way from Wausau on Saturday evening Mr. and Mrs Emile Garrison met with an accident which might have resulted much more seriously had they not run in pretty good luck. As it was Mrs Garrison was thrown from the auto and sustained a severe cut on the lip and chin that required several stitches to close, but otherwise escaped without injury

The accident occurred between Junction City and Rudolph and was caused by running onto a soft place in the road suddenly where some work had been done, causing the hind wheels of the machine to skid and there was a narrow escape from running into the ditch at the side of the road

Mrs Garrison was thrown out of the auto entirely and was picked up and taken to a nearby farmhouse and a physician summoned from this city She has since been getting along nicely

Sharkey-Berard.

Miss Louise Sharkey of Rudolph and Wilbur Berard of this city were married at the Catholic church in Rudolph on Tuesday morning at nine o'clock, Rev. Van Sever officiating Miss Eva Sharkey, sister of the bride, acted as bridesmaid and the groom was attended by his brother, O. M Berard After the wedding the party went to the home of the bride's parents, where a bountiful wedding dinner was served to a large number of relatives and friends Mr. and Mrs Berard departed on the evening train for a wedding trip to Wausau, Merrill and other points north. After their return they will go to housekeeping in their home on the east side which is all prepared to receive them

The bride is a daughter of Mr. and Mrs. Bat Sharkey, old and respected citizens of Rudolph, and is a popular young lady. Mr Berard is a Grand Rapids boy, born and raised in the city and a young man of sterling qualities. The Tribune joins with numerous friends in wishing them a happy journey thru life

Bues-Eberhardt.

Miss Louisa Bues of Milwaukee and Henry Eberhardt of the town of Grand Rapids were married on Tuesday, Sept. 28, at the home of the bride's parents, Mr. and Mrs Adolph Bues, 937 19th street, Milwaukee, Wis. They will make their home at Port Edwards where they will be at home to their friends after the first of November. Among those from here who were in attendance at the ceremony were Miss Clara Eberhardt and Ed Eberhardt, the latter acting in the capacity of best man.

Lost Their Youngest Son.

Mr and Mrs. Hans Carlson of the west side mourn the loss of their son Kenneth, who died on Wednesday, Sept. 22nd, of stomach trouble. The little one was eighteen months old and had been paralyzed for over a year, caused by spinal trouble and has required the constant care of its mother. The funeral occurred on Friday forenoon from the Catholic church, Rev. Reding officiating. Mr and Mrs. Carlson wish to extend their most heartfelt thanks to the kind friends and neighbors, who assisted them in their hour of distress.

Business is Good.

Manager Will Carey of the Carey Concrete Co., reports that his company is getting more business than they can attend to this fall, notwithstanding the fact that they have worked their original crew right thru. As builders see the stock that is being turned out by the company they think more of it and there is no question but what that after it is once introduced the new brick will be used quite extensively.

The Royal Chef.

The Royal Chef presented at the Daly Theater on Tuesday evening was one of the best productions of the kind that has ever visited this city. The music and singing was good all the way thru, and the choruses were especially good There was a large attendance and the audience was an appreciative one. It is too bad that we do not get more entertainments here of equal merit.

Some Fine Plums.

Conrad Evenson of the town of Rudolph brought in to the Tribune office last week a sample of some very fine plums which he raised on his place. The plums are from a seedling which he obtained from the experimental station at Madison some years ago and are large in size and a beautiful golden red in color with a fine flavor. The plums were certainly fine specimens of fruit.

BIRTHS.

A daughter to Mr. and Mrs. Lon Sluffer.

A daughter to Mr. and Mrs. Art Sweeney at Biron.

A daughter to Mr. and Mrs. Albert King of Kellner.

To Mr. and Mrs. Carl Odegard on Tuesday, a boy.

Were Shooting Mourning Doves.

A. V. Austin and Ed Clack, both of Pittsville, were arrested by Game Warden Cole one day last week on a charge of shooting mourning doves. Mr. Austin paid a fine of ten dollars and Mr. Clack five dollars for the offense.

Entertain the School Board.

The teachers and members of the school board were entertained on Friday evening at the home of Prof. and Mrs. C. W. Schwede on Seventh street. The evening was very pleasantly spent by those in attendance.

Will Miss Grand Rapids.

The engineer who went over the route of the project electric road from Portage to Friendship and Stevens Point and most by from this city to Knowlton Mosinee and Wausau, has made a favorable report to the capitalists in whose interest he was employed As a result of this report a meeting of the different persons interested was held at Portage at which time a company to build the road was organized The meeting was attended by D. B. Frost and B. B. Park of this city, who went to Portage for that purpose Details of the meeting cannot be given until later, but it is known that the company was organized and officers elected. It is quite likely that in the construction of the line no attempt to reach Grand Rapids will be made, that the line will run directly from Friendship in Adams county to Stevens Point If this proves to be the case the road will cross the Portage county drainage district and will prove an important factor in developing the same The present plan of the promoters is to have the surveys made and secure the right of way this fall so that the work of construction can commence early in the spring of 1910.—Stevens Point Journal

Broke His Collar Bone.

Paul Swartz, the brick mason is confined to his home by a broken collar bone which happened last week by falling off a scaffold on the Frank Lessig home in the town of Rudolph upon which Mr Swartz is doing the brick work

Hammer House Rented.

H. Wippermann has leased the Hammer House to John Herron who will open it to the public at once. James McLaughlin of Babcock had leased the property but later decided not to take it

Shermer-Fox.

Miss Charlotte Shermer of this city and Lawrence Fox of Salt Lake City were married at the home of the bride's parents in this city on Wednesday evening

They were accompanied by Miss Alta Shermer as maid of honor and Mr Moylan Fox acted as best man and Elizabeth Evans was ring bearer. The ceremony was performed by the Rev. Ira Sloat of the Congregational church

On Saturday the couple left for New York City where they will visit for a time after which they will leave for the west and eventually arrive at Salt Lake City where the groom is employed

The bride for a number of years past has been engaged as instructor in the Sparta school for the deaf, but has spent her vacations in this city and has made many friends here who will wish her a long life of happiness in her new home

Fzykowski-Whitrock.

Miss Emma Fzykowski of Pittsville and George Whitrock of this city were married at the west side Lutheran church on Tuesday morning at 10:30, Rev W Nommensen officiating The newly married couple will make their home on the west side and the Tribune unites with their friends in extending congratulations

Have a Good Team.

The local high school boys have been practicing their foot ball team for some time past, and the indications at the present time is that they will have a pretty good team this season Some of those who were members of the team last year have left, but there is some good timber to take their place, so there is little question but what they will make a good showing

Held Annual Meeting.

The stockholders of the Wisconsin Machine Co held their annual meeting at the office of the Grand Rapids Lumber Co on Saturday forenoon Among those from out town who were here to attend the meeting were Alex Calmer of Marshfield and Frank Hilbinger of Milwaukee The above mentioned gentlemen are no longer connected with the company having sold out their interests while all the remaining stockholders are Grand Rapids people The company reports a good business the past year

Work on the Electric Line.

Work on the electric line between this city and Nekoosa has been progressing at a satisfactory rate since the steel was received and it is expected that the road will be practically completed as far as Port Edwards this week The men engaged in putting up the poles and work of that sort are also getting along nicely and it is figured now that three or four weeks will finish this part of the job

Death of Arnestena Witt.

Mrs Arnestena Witt died on Saturday at the home of Wm Gollberg at old age Deceased was 67 years of age and has been a cripple for many years The funeral occurred on Monday afternoon from the Lutheran church, east side, Rev Mack officiating

For Wife Beating.

Frank Pipe of Arpin was brought before Justice Fritzsinger last week on the charge of wife beating charges being preferred by his wife Bertha Pipe was found guilty and the judge made it 60 days in the county jail but was sorry he could not have made it 60 days on a rock pile

Depot Said to be Coming.

A gentleman who is supposed to know, and who is not in the habit of making statements that are not all right recently informed the Tribune man that the Chicago, Milwaukee & St. Paul railroad company were intending to build a new depot at this point in the near future. In fact he stated that the plans were all drawn and that the structure would be the nicest thing of its kind in the Wisconsin valley not excepting the new depots at Wausau and Merrill

Most of us are all ready for the new structure whenever the company gets around to building it, and we are in hopes that they will not delay the work so long that the plans will have to be changed and have to be made all over again and thus use a lot of needless time

Improvements at the Dixon.

Chas Dixon has a crew of men at work remodeling the cottage next to the Dixon hotel which when completed will give the hotel eight additional rooms Mr Dixon is also putting in new box springs and mattresses throughout the hotel, besides refurnishing, painting and decorating With those improvements the Dixon will rank among the best hotels in northern Wisconsin.

Added Mail Service.

Hereafter there will be a mail clerk on train No 1 and 2 on the Green Bay & Western commonly known as the scoot This will give a little better mail service between this city and Green Bay and intermediate points The train leaves here at 6:40 in the morning and returning gets in here at 1 o'clock night

Fred Nourse of Chicago, who has been a guest of Dr W O Blanchar for some time, returned to his home on Friday night

Will Miss Grand Rapids.

The engineer who went over the route of the proposed electric road from Portage to Friendship and Stevens Point, and possibly from this city to Knowlton, Mosinee and Wausau, has made a favorable report to the capitalists in whose interest he was employed. As a result of this report a meeting of the different persons interested was held at Portage at which time a company to build the road was organized. The meeting was attended by D. E. Frost and B. B. Park of this city, who went to Portage for that purpose. Details of the meeting cannot be given until later, but it is known that the company was organized and officers elected. It is quite likely that in the construction of the line no attempt to reach Grand Rapids will be made; that the line will run directly from Friendship in Adams county to Stevens Point. If this proves to be the case the road will cross the Portage county drainage district and will prove an important factor in developing the same. The present plan of the promoters is to have the surveys made and secure the right of way this fall so that the work of construction can commence early in the spring of 1910.—Stevens Point Journal

Broke His Collar Bone.

Paul Swartz, the brick mason, is confined to his home by a broken collar bone which happened last week by falling off a scaffold on the Frank Lessig home in the town of Rudolph upon which Mr. Swartz is doing the brick work.

Hammer House Rented.

H. Wipperman has leased the Hammer House to John Herron who will open it to the public at once. James McLaughlin of Babcock had leased the property but later decided not to take it.

Shermer-Fox.

Miss Charlotte Shermer of this city and Lawrence Fox of Salt Lake City were married at the home of the bride's parents in this city on Wednesday evening.

They were accompanied by Miss Alta Shermer as maid of honor, and Mr. Moylan Fox acted as best man, and Elizabeth Evenson was ring bearer. The ceremony was performed by the Rev. Fred Staff of the Congregational church.

On Saturday the couple left for New York City where they will visit for a time after which they will leave for the west and eventually arrive at Salt Lake City, where the groom is employed.

The bride for a number of years past has been engaged as instructor in the Sparta school for the deaf, but has spent her vacations in this city, and has made many friends here who will wish her a long life of happiness in her new home.

Fzykowski-Whitrock.

Miss Emma Fzykowski of Pittsville and George Whitrock of this city were married at the west side Lutheran church on Tuesday morning at 10:30, Rev. W. Nommenson officiating. The newly married couple will make their home on the west side and the Tribune unites with their friends in extending congratulations.

Have a Good Team.

The local high school boys have been practicing their foot ball team for some time past, and the indications at the present time are that they will have a pretty good team this season. Some of those who were members of the team last year have left, but there is some good timber to take their place, so there is little question but what they will make a good showing.

Held Annual Meeting.

The stockholders of the Wisconsin Ice Machine Co. held their annual meeting at the offices of the Grand Rapids Foundry Co. on Saturday forenoon. Among those from out of town who were here to attend the meeting were Alex Cafmyer of Chicago, O. C. Wohling and Frank Filbinger of Milwaukee. The above mentioned gentlemen are no longer connected with the company having sold out their interests, which is all owned now by members of the Grand Rapids Foundry. The company reports a good business the past year.

Work on the Electric Line.

Work on the electric line between this city and Nekoosa has been progressing at a satisfactory rate since the steel was received, and it is expected that the road will be practically completed as far as Port Edwards this week. The men engaged in putting up the poles and work of that sort are also getting along nicely and it is figured now that three or four weeks will finish this part of the job.

Death of Arnestena Witt.

Mrs. Arnestena Witt died on Saturday at the home of Wm. Goldberg of old age. Deceased was 72 years of age and has been a cripple for many years. The funeral occurred on Monday afternoon from the Lutheran church, east side, Rev. Maack officiating.

For Wife Beating.

Frank Pipe of Arpin was brought before Justice Fritzsinger last week on the charge of wife beating, charges being preferred by his wife Bertha. Pipe was found guilty and the judge made it 60 days in the county jail, but was sorry he could not have made it 60 days on a rock pile.

Depot Said to be Coming.

A gentleman who is supposed to know, and who is not in the habit of making statements that are not all right, recently informed the Tribune man that the Chicago, Milwaukee & St. Paul railroad company were intending to build a new depot at this point in the near future. In fact, he stated that the plans were all drawn and that the structure would be the nicest thing of its kind in the Wisconsin valley, not even excepting the new depots at Wausau and Merrill.

Most of us are all ready for the new structure whenever the company gets around to building it, and we are in hopes that they will not delay the work so long that the plans will get misl'd and lost and have to be made all over again, and thus use a lot of needless time.

Improvements at the Dixon.

Chas. Dixon has a crew of men at work remodeling the cottage next to the Dixon hotel which, when completed, will give the hotel eight additional rooms. Mr. Dixon is also putting in new box springs and mattresses throughout the hotel, besides recarpeting, painting and papering. With these improvements The Dixon will rank among the best hotels in northern Wisconsin.

Added Mail Service.

Hereafter there will be a mail clerk on trains No. 3 and 4 on the Green Bay & Western commonly known as the scoot. This will give a little better mail service between this city and Green Bay and intermediate points. The train leaves here at 6:40 in the morning and returning gets in here at 9:30 at night.

Fred Nourse of Chicago, who has been a guest of Dr. W. O. Blanchar for some time, returned to his home on Friday night.

1 lot of silk and satin waists received this week. The silk waists are made of guaranteed Taffeta; the satin waists are made of Skinner guaranteed satin warranted for 1 year of hard wear. Not a waist in this lot worth less than $6 special **$5.00**

Underwear

We are exclusive agents for the famous line of Mentor Underwear which fits and wears better and does not full in washing. Here are a few specials.

1 lot 50c union suits, fine ribbed and fleeced, sale....**43c**

1 lot 25c and 35c vest and pants, fine ribbed and fleeced**22c**

1 lot 50c vest and pants, fine ribbed and fleeced, sale..**39c**

1 lot regular $1.00 wool vests and pants, sale.....**79c**

1 lot men's all wool $1 to $1.50 shirts and drawers....**75c**

Special Values in Blankets

10-4 gray, tan and white.....**39c**

10-4 gray and tan, special value.....**75c**

11-4 gray and tan, special value.....**$1.00**

12-4 gray and tan, special value.....**$1.25**

11-4 woolnap, special value.....**$2.50**

New Fall Dress Goods

We want you to see our new line of fall dress goods. We will make a special inducement for this 3 days special selling.

This seasons latest cloths and creations; all imported cloths regular $1.25 value**$1.09**

Regular $1 value, black and colors; broadcloths, voiles, Panamas, taffeta, serges and fancy worsteds..**93c**

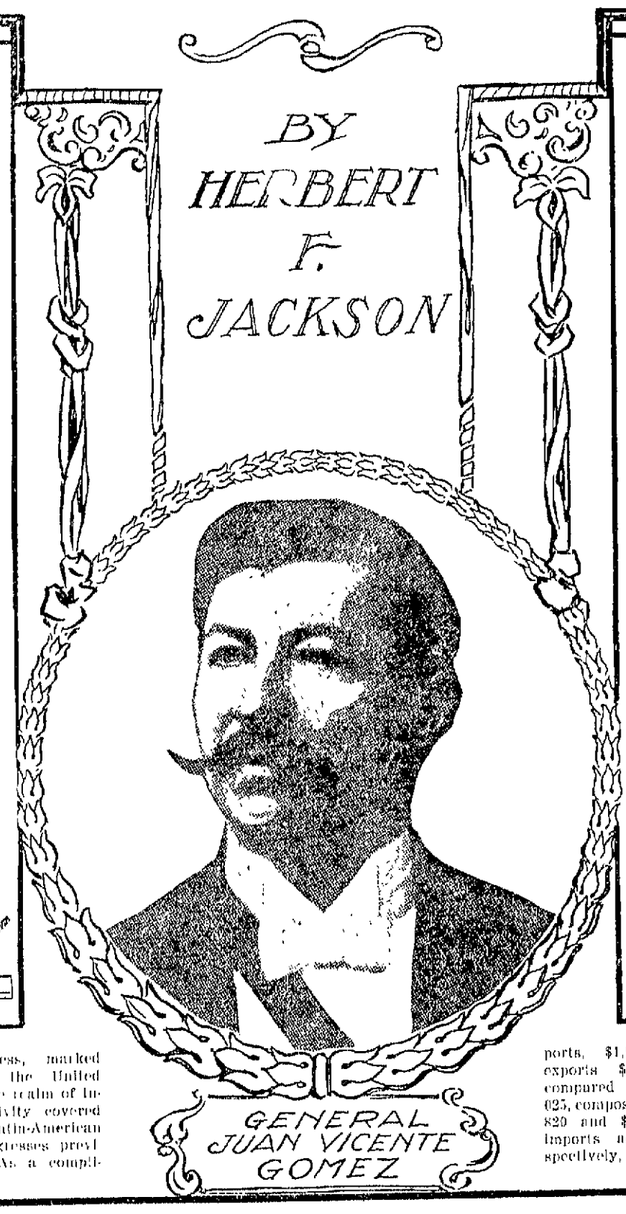

Regular 85c and 75c values, black and colors.....**69c**

Regular 50c worsted, Panamas and serges, yard wide, black and colors, a yd**39c**

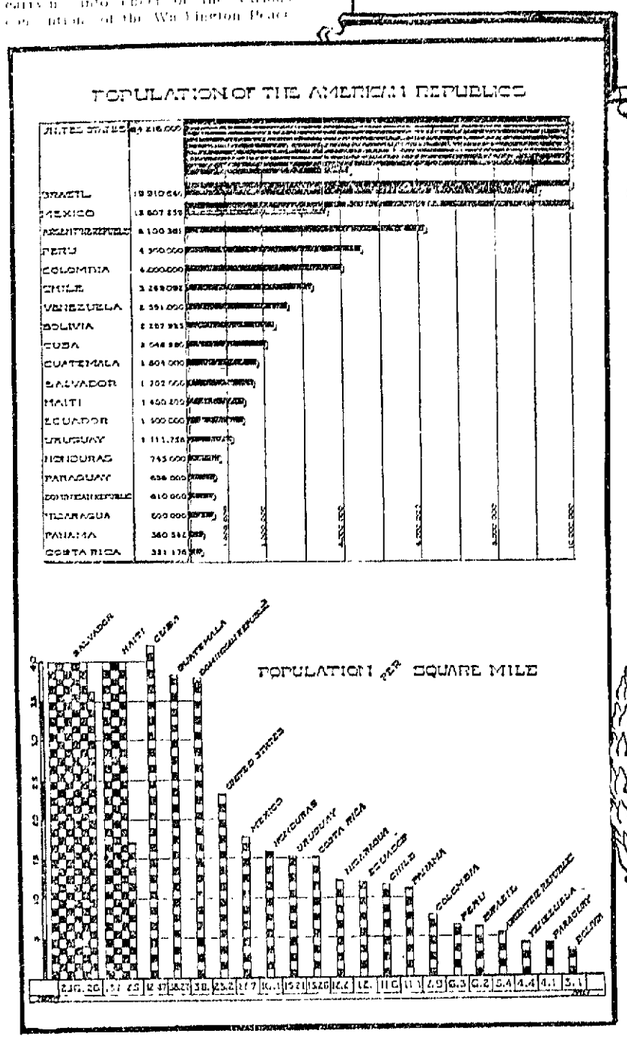

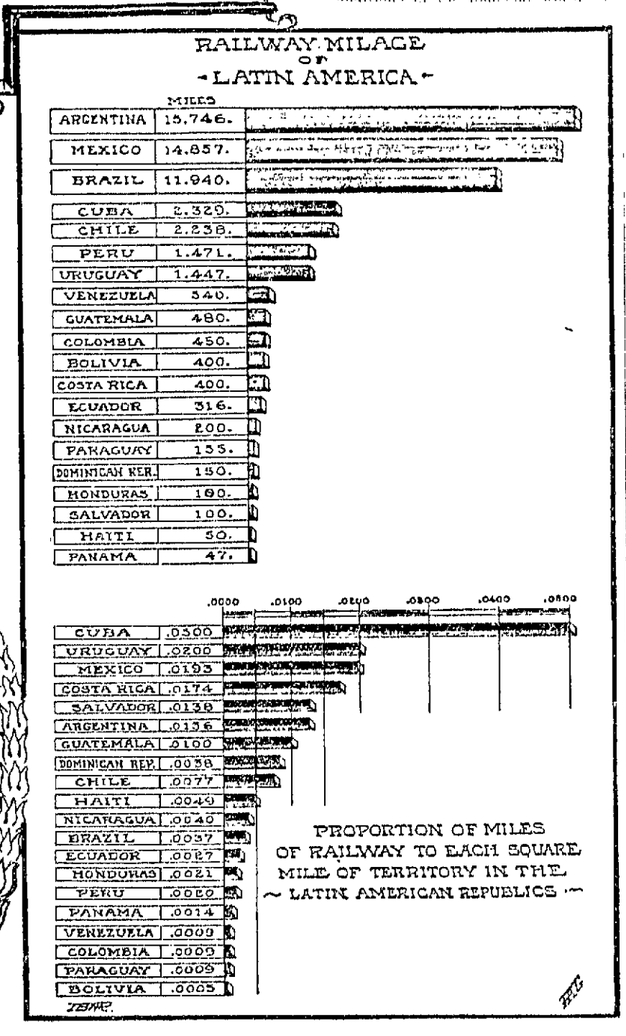

WEALTH OF LATIN AMERICA

BY HERBERT F. JACKSON

GENERAL JUAN VICENTE GOMEZ

THE SPIRIT of international amity which marked the year 1908 was the pervading characteristic of relations between the various countries of America during 1908.

The year was marked by numerous gatherings of the representative elements of national life both in Latin America and the United States and on all occasions indicative of a unanimity of sentiment and community of interests were marked developed.

Of paramount importance was the carrying into effect of the various conventions of the Washington Peace conference of 1907 entered into by the republics of Central America. In accordance with these conventions the Central American court of justice held its first session in May, 1908, at Cartago, Costa Rica, the first judicial decision being rendered in December. On September 15 the Central American bureau was inaugurated in the capital of Guatemala for the furtherance of reciprocal interests among the nations of Central America and with the assembling of the first Central American conference at Tegucigalpa, Honduras, in the first month of 1909, additional emphasis is given to the intention of the nations interested to embrace all feasible means for the development of their material possibilities.

The participation of Pan-America was a feature of the Lake Mohonk conferences of 1908 and 1909 and active interest was indicated in such industrial assemblies as the International Fisheries congress, the Irrigation congress, the Pan-Mississippi Commercial congress, the Rivers and Harbors congress and the Conservation congress, all of which were held in the United States and attended by delegates from the republics to the south.

In the field of science the Fifth Pan American Medical congress meeting in Guatemala City during August, was an event of note, and the gathering of savants of the western hemisphere in Santiago de Chile in December, for the purpose of holding the first Pan-American Scientific congress, marked the entry of the United States into the realm of intellectual activity covered by the four Latin-American scientific congresses previously held. As a compliment to this co-operative action, Washington was selected for the next meeting place of the congress, in 1912.

Intellectual stimulus has been aroused through the holding of students' congresses and the year 1908 was marked by an increased number of Latin-American students in United States universities as well as by a vastly augmented interest on the part of the United States in the applied educational methods of Latin-American countries.

Not the least contributing factor in this interest is the better knowledge being daily acquired through the tide of travel which is setting toward Latin America and for which improved communication facilities are largely responsible.

With the assembling of the fourth International Conference of American States in Buenos Aires in 1910 the common interests of the American nations will be still further accentuated and the results of the previous meetings at Washington, Mexico and Rio de Janeiro reported on in the light of recent events demonstrating the status of America as a whole in world affairs.

The aggregate of trade for the various countries composing the International Union of American Republics during 1908 was $4,847,019,947, against $5,415,798,197 in the preceding year. This loss of over $550,000,000 is attributable to well-known economic causes which affected commercial centers throughout the world.

In the total for the year the share of the United States is represented by $2,869,282,928, composed of imports, $1,116,449,681, and exports $1,752,833,247, as compared with $3,316,596,025, composed of $1,423,169,820 and $1,923,426,205 for imports and exports, respectively, in 1907, a decrease of $177,313,097 being indicated.

Latin America figured in the grand total for $1,977,737,019, showing a decline of $59,647,484 in the trade volume as compared with the previous year.

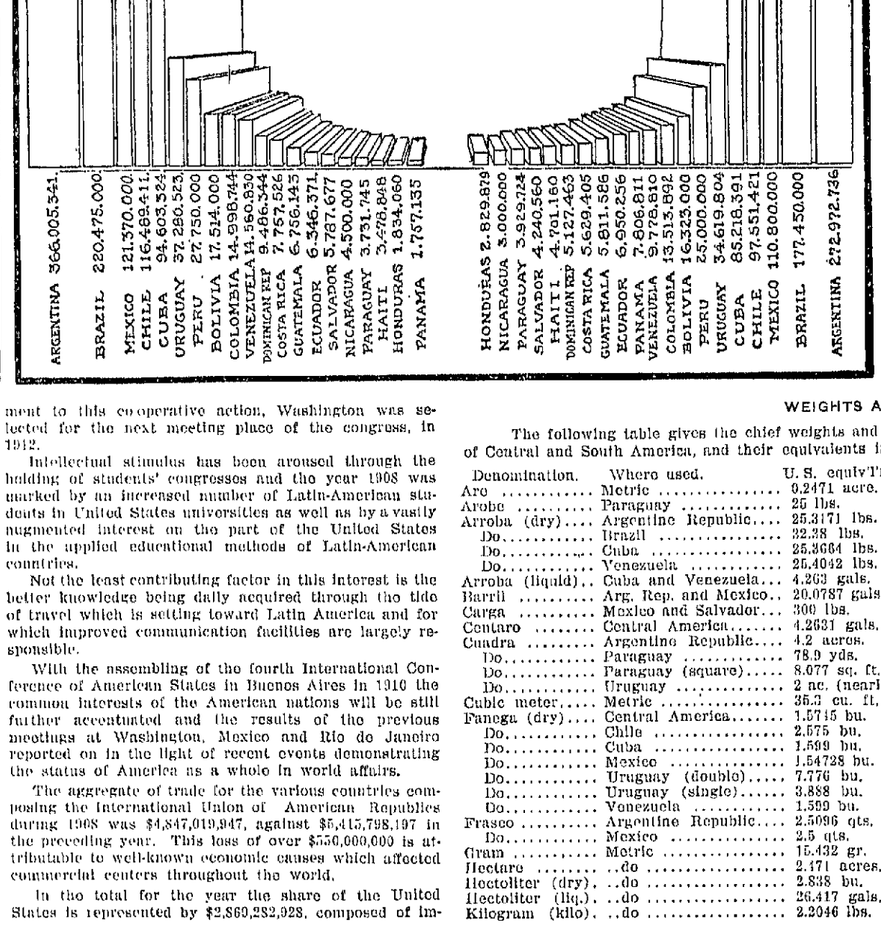

Imports into all of Latin America during 1908 amounted in value to $893,536,998, as am't $1,003,276,482 in 1907, the indicated decline for this branch of trade being $109,613,484.

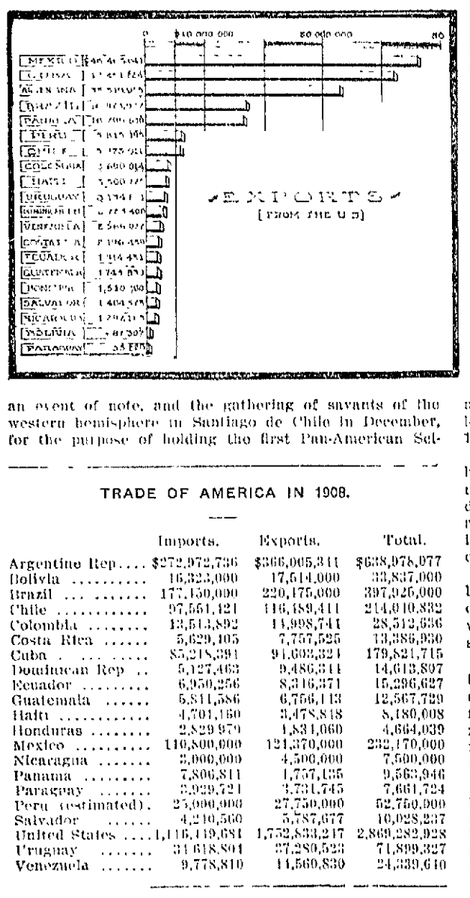

On the other hand exports with a total valuation of $1,084,200,021 show a gain of $1,676,750 over the figures for 1907, when Latin American merchandise was exported abroad to the value of $1,068,804,270.

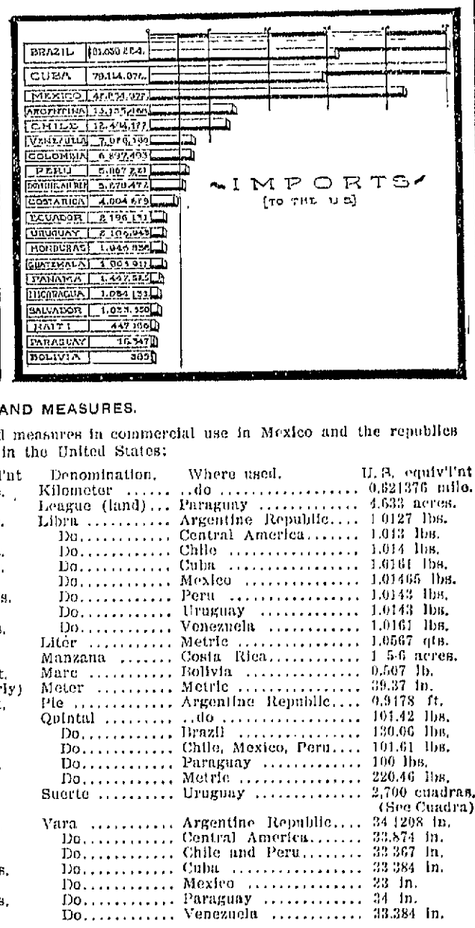

From the foregoing data we find it to be that in spite of certain adverse conditions in the financial world the demand for articles of Latin-American origin created a trade balance in favor of the producing countries to the extent of $191,229,023, in which sum the exports for the year exceeded the imports.

In the year's trade total for Latin America the United States' share was $468,216,155, as compared with $558,279,201 in 1907, receipts of Latin-American merchandise figuring on the trade lists of the country for $271,498,425 and shipments of United States goods to those countries being represented by $196,718,630, as compared with imports worth $317,726,133 and exports $240,553,068 in 1907.

In considering the figures given above, adverse conclusions must not be drawn as to the value of the Latin-American field of trade. The falling off in the exchange of commodities for the year 1908 with the United States, as already suggested, was due almost entirely to unfavorable and unusual economic conditions. The reliable measure of such value is determined by comparing the statistics of the present with those of 10 years ago, and here a great increase is shown. The outlook for the coming year is good, and there is an awakening among business men in both North and South America to the possibilities of trade exchange heretofore undeveloped which must have a beneficial effect on Pan-American commerce.

TRADE OF AMERICA IN 1908.

	Imports.	Exports.	Total.
Argentine Rep....	$272,972,736	$366,005,341	$638,978,077
Bolivia	16,323,000	17,514,000	33,837,000
Brazil	177,450,000	220,175,000	397,625,000
Chile	97,551,421	116,489,411	214,040,832
Colombia	13,513,892	14,998,744	28,512,636

Venezuela	9,778,810	14,560,830	24,339,640
Totals	$2,009,703,679	$2,837,316,268	$4,847,019,947

WEIGHTS AND MEASURES.

The following table gives the chief weights and measures in commercial use in Mexico and the republics of Central and South America, and their equivalents in the United States:

Denomination.	Where used.	U. S. equiv'l'nt
Are	Metric	0.2471 acre.
Arobe	Paraguay	25 lbs.
Arroba (dry)	Argentine Republic	25.3171 lbs.
Do.	Brazil	32.38 lbs.
Do.	Cuba	25.3664 lbs.
Do.	Venezuela	25.4042 lbs.
Arroba (liquid)	Cuba and Venezuela	4.263 gals.
Barril	Arg. Rep. and Mexico	20.0787 gals.
Carga	Mexico and Salvador	300 lbs.
Centaro	Central America	4.2631 gals.
Cuadra	Argentine Republic	4.2 acres.
Do.	Paraguay	78.9 yds.
Do.	Paraguay (square)	8.077 sq. ft.
Do.	Uruguay	2 ac. (nearly)
Cubic meter	Metric	35.3 cu. ft.
Fanega (dry)	Central America	1.5715 bu.
Do.	Chile	2.575 bu.
Do.	Cuba	1.599 bu.
Do.	Mexico	1.54728 bu.
Do.	Uruguay (double)	7.776 bu.
Do.	Uruguay (single)	3.888 bu.
Do.	Venezuela	1.599 bu.
Frasco	Argentine Republic	2.5096 qts.
Do.	Mexico	2.5 qts.
Gram	Metric	15.432 gr.
Hectare	..do	2.471 acres.
Hectoliter (dry)	..do	2.838 bu.
Hectoliter (liq.)	..do	26.417 gals.
Kilogram (kilo)	..do	2.2046 lbs.
Kilometer	..do	0.621376 mile.
League (land)	Paraguay	4.633 acres.
Libra	Argentine Republic	1.0127 lbs.
Do.	Central America	1.013 lbs.
Do.	Chile	1.014 lbs.
Do.	Cuba	1.0161 lbs.
Do.	Mexico	1.01465 lbs.
Do.	Peru	1.0142 lbs.
Do.	Uruguay	1.0143 lbs.
Do.	Venezuela	1.0161 lbs.
Liter	Metric	1.0567 qts.
Manzana	Costa Rica	1 5-6 acres.
Marc	Bolivia	0.507 lb.
Meter	Metric	39.37 in.
Pie	Argentine Republic	0.9478 ft.
Quintal	..do	101.42 lbs.
Do.	Brazil	130.06 lbs.
Do.	Chile, Mexico, Peru	101.61 lbs.
Do.	Paraguay	100 lbs.
Do.	Metric	220.46 lbs.
Suerte	Uruguay	2,700 cuadras. (See Cuadra)
Vara	Argentine Republic	34.1208 in.
Do.	Central America	33.874 in.
Do.	Chile and Peru	33.367 in.
Do.	Cuba	33.384 in.
Do.	Mexico	33 in.
Do.	Paraguay	34 in.
Do.	Venezuela	33.384 in.

KING THAT IS TO BE

Heir-Apparent to British Throne Reserved and Dislikes Ceremony.

What is known in society as the Marlborough house set is far smaller now than when the king was prince of Wales, says a writer in the Boston Transcript. The present heir to the throne, though he inherits many of the qualities which have made his majesty the most universally popular monarch that ever wore the English crown, is admittedly of a reserved and rather retiring disposition, and the circle of people who are permitted to enjoy his intimacy is a small one.

Sir Arthur Bigge, the prince's private secretary, is rather a taciturn individual, and a story is told that on one occasion, when the prince was sitting next to him at a state banquet at Buckingham palace, given by Queen Victoria, his royal highness remarked to him humorously: "I like sitting next to you, Sir Arthur, for, like myself, you prefer thinking to talking."

The prince, it is well known, has a very great dislike to ceremonial, and wishes to be treated, as far as is consistent with etiquette, as an ordinary guest wherever he stays. A rather characteristic story is told of his royal highness when he was a guest at a country house-party some years ago. Among the guests was a young man who very correctly addressed the prince as "your royal highness," but he repeated the expression more often than was necessary. "My dear sir," said the prince, at last, "I know I am a royal highness, but please do not remind me of the fact so very often."

The prince is not at all as much of a clubman as was the king when prince of Wales. Indeed, the only club the prince frequents is the Marlborough, to which institution all his personal friends belong. The prince is known not to approve altogether of club life.

There is a younger son of a well-known peer now farming very extensively in Canada, who some years ago was what might be termed a confirmed club loafer. On one occasion he overheard the prince make some remarks about the amount of time many young men nowadays wasted in clubs. Two months later the son of the peer in question had sailed for Canada. "But for the prince's remark which I overheard," he said to a friend before he started, "I believe I would have gone on wasting my time until I was too old to be of any use in the world."

But perhaps the prince of Wales' really most intimate friends are his children. Not so very long ago the Princess Mary expressed a wish one day to pay a visit to the zoo. The prince had arranged to leave London for Scotland that afternoon, but he altered his arrangements and took the Princess Mary and Prince Henry to the zoo instead.

"Make Good."

Apologies count for but little in the business world. Good intentions possess value only when they are fortified by actual accomplishments. The test of all things is that which measures results. These constitute the court of last resort. If they are of a desirable nature the one bringing them to pass is recognized as worthy of confidence. If they are not, he is asked to retrace his steps and revamp his line of operation.—Fraternal Monitor.

INDIANS WERE DESTROYED

White Man Coveted Land of Onas for Sheep and Used Treachery.

In his article on his adventures among the Ona Indians of Tierra del Fuego in Harper's for August, Charles W. Furlong charges the white colonists with having wantonly destroyed this once strong race.

"Less than three decades ago the primitive inhabitants, the Ona Indians, lived, hunted and fought from Angarda point in Magellan strait to Beagle channel.

"Had the whole island been like the southern half, to-day the Onas, in all probability, would be in control of practically all of their original domain. Had it been like the northern half, the world would undoubtedly look upon the hunting grounds of an extinct race. As it is, within less than thirty years the Onas have shrunk from perhaps 3,000 to 300, and all because they possessed land the white man coveted for his sheep, and had inborn courage and ferocity strong enough to oppose him.

"With the establishment of the first sheep range, in the early '80s, began a cruel and persistent warfare on the part of the white man. In reprisal for the land from which he was driven, the Ona raided the range at night for the 'white guanaco,' as he called the strange animal, the sheep, which he found not only easily captured, but sweeter and more tender to the taste than the wild guanacos of his island.

"These raids were so persistent and assumed such magnitude that it really became a case of Indian or sheep, and the scattered settlers with their rangers began a warfare of extermination in which hirelings were engaged and the 'chunkies' shot on sight. Occasionally a large number with their women and children were rounded up and shipped to Dawson island, where tuberculosis-infected quarters soon accomplished their work. It being a case primarily of bullets against arrows in an open country, the result was obvious. In treachery the white man outdid the Indian. He invariably took him at a disadvantage and played false with his truce, even resorting to poisoning one of the Ona's main food supplies, the blubber of stranded whale."

Rome is where art is.

NOTES FROM MEADOWBROOK FARM

By William Pitt

Remember that the best is the cheapest in the long run.

The keeper is more valuable than the tool sometimes.

The best is the cheapest in the long run for the table.

Horse sweat pad [illegible] have sweat pad [illegible]

With the lights [illegible] lighten up on the feed question for the horse.

A handful or oil meal daily in the horse's ration will help put a gloss upon his coat.

The wife will prove very helpful [illegible] to her and many a bad complication will be spared.

Milk is good for the hens as well as the pigs. See if you cannot prove them right. It helps to make eggs.

How are the drains about the house? Time to think about getting them in good shape for the winter months.

Hold the wheat in the bin rather than sell at too low a price. It is almost certain to run into money before the year is over.

Food left in the trough by the hens is the best kind of evidence that you are feeding too generously. Find only what will be eaten up clean.

To produce good eggs and get them on the market in the best possible condition one must provide good housing, food and water regularly, and above all keep the nests clean. Eggs should be gathered daily, and when the temperature is high they should be gathered twice a day. Reject all doubtful eggs and keep the eggs in a cool a place as possible.

Much has been said in the papers about "petroleum butter," and the curiosity it put the anxiety of the dairy farmers has been excited. Dairy Commissioner Foust of Philadelphia secured a sample of "petroleum butter" and had it analyzed. He found it was composed of 80 per cent vaseline, two per cent salt and 18 per cent com starch. The rest was water. The sample looked much like vaseline and is said to taste like it. Mr. Foust decided that it could not be sold as butter.

Drained soils are generally well ventilated soils, for as the water percolates through and lowers the water table, it draws an equal amount of air into the soil. Then when another rain falls and a sheet of water is formed on the surface of the field, it presses down upon the soil air, and has a tendency to force it out through the drains, and in settling draws another volume of air into the soil, so that every shower helps to change the air in a drained field. The drains themselves constitute ventilating flues by means of which air circulates through the soil more or less because of changes in temperature and barometric

The simplest form of silo is the stave silo. It should be made from two-inch narrow plank, properly beveled and held together by strong iron bands. The staves, after beveling so that when fitted together they will form a circle of the desired size, are placed on end on a solid foundation and properly fitted. These are strengthened and held in place by stout iron hoops, which are so made that they may be tightened or loosened at will. Doors should be built at intervals from the top to the bottom so that the silage may easily be got out. It is not necessary to put a roof on this silo, but it is much to be preferred. This style of the silo should be kept well painted, both inside and out. If properly built and taken care of a stave silo is durable, rigid and air-tight.

Gapes in young chickens is caused, according to Prof. H. A. Surface, state zoologist of Indiana, by eating of earthworms. There are parasites in the earth worms which find their way into the windpipe of the chicken and lodge there, where they take the form of little red worms. The best preventive is to keep the chickens from the surface of the ground, or use salt or strong water on the soil, so as to kill the earth worms, or strew strong lime or something of the kind on the ground, so that the chicks will not get hold of the worms to eat them. After the chicks have been attacked with gapes, however, you can dislodge the worms by making a very small loop of twisted horse hair, draw out the tongue of the chick slightly, insert the horse hair loop in the windpipe opening, which will be seen between the forks at the base of the tongue, and, twisting the hair around, withdraw it. The worms are likely to be found within the loop, or some of them will have been thus removed, and the operation can be repeated. Another remedy is to dip the tip of a soft feather into kerosene and insert it in the windpipe opening to dislodge and kill the worms. Such treatment, although severe, is better than letting the worms remain undisturbed, to severely annoy the fowls and even kill them. Mixing turpentine or other substances in the food of the young poultry has not proven satisfactory as a remedy for gapes.

Clean up the rubbish in garden and orchard and burn. In this way many a harmful insect is destroyed.

Sudden changes in diet are harmful to all farm animals, especially the horse. With the fall in the hard work, be careful how you turn the horses on grass.

Success in dairying is determined by the wisdom and care which is displayed in breeding better cattle, by selecting the right feed, and increasing the fertility of the soil.

Pumpkins are fine feed for fattening hogs.

Variety of feed should be provided for the hens.

Ginger tea and [illegible] is good for [illegible] horse.

Cut out the old canes from the berry bush in [illegible]

Keep the [illegible] and feed [illegible] feed every [illegible]

[illegible] to provide [illegible] profit [illegible]

[illegible] all the condition for [illegible] a little time to [illegible] before working and [illegible]

[illegible] and Swiss for [illegible] [illegible] will [illegible] the feed for [illegible]

[illegible] the milk [illegible]

[illegible] in order [illegible] [illegible] to and [illegible]

Mix [illegible] as soon as [illegible] the milk from cow. It will keep sweet and have a finer flavor when thus handled.

Peat moss is said, never [illegible] grapes. They do up the vines, however after bird and wasp have punctured the skins. Place the [illegible] where it belongs.

Unsound feet in a horse are responsible, indirectly or in a contributional weakness which is sure to appear in the off [illegible] Therefore be sure the mate and sire are both sound.

Without some system of accounts how could the merchant do business safely. And yet much [illegible] counting is as important for the farmer as for the merchant.

Be sure the bit is not so narrow as to irritate and pain the mouth of the horse. Such condition leads to unwillingness which often may result in the horse taking the bit in his teeth and bolting in short order.

Here is a dust powder which is non-poisonous and is sure death to cabbage worms etc. Mix dusted lime with a good sprinkling of fine table salt. It can be placed in a can having a perforated top and sprinkled upon the plants troubled with the worms. This is a good idea to save for next season.

A garden without fruit trees and berry bushes is only half a garden. There should be enough for family use in season, for canning and preserving and such like for winter use, and some to sell. Starting with strawberries, which come in very early and the first fruit of the season, there should be added raspberries, blackberries, gooseberries, currants and grapes. The great advantages of small fruits are that they occupy small space, are easy to grow, they begin bearing early and the fruit is the most delightful and the most wholesome of all foods. They are an ornament to any farm or home grounds.

Prof. G. F. Hunziker, head of the dairy department of the Indiana experiment station at Purdue, and Prof. G. W. Spitzer, dairy chemist of the same institution, have just completed experiments to determine the cause of the low per cent of butterfat in a large portion of the evaporated milk on the market as reported by chemists and pure food departments throughout the country. Although milk containing the required per cent of butter fat, when made into evaporated milk, and an analysis by the usual methods made shows a shortage of from 0.5 to two per cent of fat, by the experiments explained in the bulletin it has been found that there is no less fat present, but that the ordinary Babcock test and the official methods of fat estimation do not liberate all the fat present. The fat column in the test bottle is peculiarly cloudy and emulsion charred and curdy deposits, making accurate readings difficult. Uniformly correct results are obtained by the use of a one-fourth dilution of evaporated milk and of dilute acid after the first whirling of the tester in the place of water. Correct results are also obtained by other extraction.

David Buffum has this to say in the Atlantic Monthly regarding the "mission of the land," and he is about right: The mission of the land is to produce and keep on producing food, live stock, lumber and other commodities for the service of man. He who owns land and is indifferent to this, is guilty of a moral wrong; and he who takes good land out of commission and suffers it to be unproductive and useless is guilty of a greater one. This is the only criterion by which we can properly judge of the right of an individual to own land in large tracts. The good results attendant upon small individual holdings are natural. The purposes of nature in the upward evolution of man are usually better carried out in this way, and not because, as is so frequently argued, every man has an inherent right to its ownership. The lazy, the incapable and the densely ignorant assuredly have no such right, and land is too precious and its mission too high to be thus wasted. If the owner of a great country estate can farm his land as well as or better than if it were in small holdings; if, following the precept of Swift, he make two ears of corn or two blades of grass grow where one grew before; if he supply his section with a better breed of horses, cattle or sheep, well and good; no one with any knowledge of economics could say he was doing any injury to the world or mankind. It is not the amount of land that he owns, but what he does with it for which he is morally responsible.

During the molting season take the male birds from the flock.

The return from a piece of land is not so much dependent upon the soil as upon the kind of management which that piece of ground receives. Many a seemingly worthless piece of land has been made to produce a profit under skillful handling.

Sound in Arctic Air.

The arctic air is very favorable for the transmission of sound.

WEALTH OF LATIN AMERICA

BY HERBERT F. JACKSON

THE SPIRIT of internationalism in its broadest application was the pervading characteristic of relations between the various countries of America during 1908.

The year was marked by numerous gatherings of the representative elements of national life both in Latin America and the United States and on all occasions indications of a unanimity of sentiment and community of interest were markedly displayed.

Of paramount importance was the carrying into effect of the various conventions of the Washington Peace Conference of 1907 entered into by the republics of Central America. In accordance with these conventions the Central American court of justice held its first session in May, 1908, at Cartago, Costa Rica, the first judicial decision being rendered in December. On September 15 the Central American bureau was inaugurated in the capital of Guatemala for the furtherance of reciprocal interests among the nations of Central America and with the assembling of the first Central American conference at Tegucigalpa, Honduras, in the first month of 1909, additional emphasis is given to the intention of the nations interested to embrace all feasible means for the development of their material possibilities.

The participation of Pan-America was a feature of the Lake Mohonk conferences of 1908 and 1909 and active interest was indicated in such industrial assemblies as the International Fisheries congress, the irrigation congress, the Trans-Mississippi Commercial congress, the Rivers and Harbors congress and the Conservation congress, all of which were held in the United States and attended by delegates from the republics to the south.

In the field of science the Fifth Pan-American Medical congress, meeting in Guatemala City during August, was an event of note, and the gathering of savants of the western hemisphere in Santiago de Chile in December, for the purpose of holding the first Pan-American Scientific congress, marked the entry of the United States into the realm of intellectual activity covered by the four Latin-American scientific congresses previously held. As a compliment to this co-operative action, Washington was selected for the next meeting place of the congress, in 1912.

Intellectual stimulus has been aroused through the holding of students' congresses and the year 1908 was marked by an increased number of Latin-American students in United States universities as well as by a vastly augmented interest on the part of the United States in the applied educational methods of Latin-American countries.

Not the least contributing factor in this interest is the better knowledge being daily acquired through the tide of travel which is setting toward Latin America and for which improved communication facilities are largely responsible.

With the assembling of the fourth International Conference of American States in Buenos Aires in 1910 the common interests of the American nations will be still further accentuated and the results of the previous meetings at Washington, Mexico and Rio de Janeiro reported on in the light of recent events demonstrating the status of America as a whole in world affairs.

The aggregate of trade for the various countries composing the International Union of American Republics during 1908 was $4,847,019,947, against $5,415,798,197 in the preceding year. This loss of over $550,000,000 is attributable to well-known economic causes which affected commercial centers throughout the world.

In the total for the year the share of the United States is represented by $2,869,282,928, composed of imports, $1,116,449,681, and exports $1,752,833,247, as compared with $3,346,596,025, composed of $1,423,169,820 and $1,923,426,205 for imports and exports, respectively, in 1907, a decrease of $477,313,097 being indicated.

Latin America figured in the grand total for $1,977,737,019, showing a decline of $89,647,659 in the trade volume as compared with the previous year.

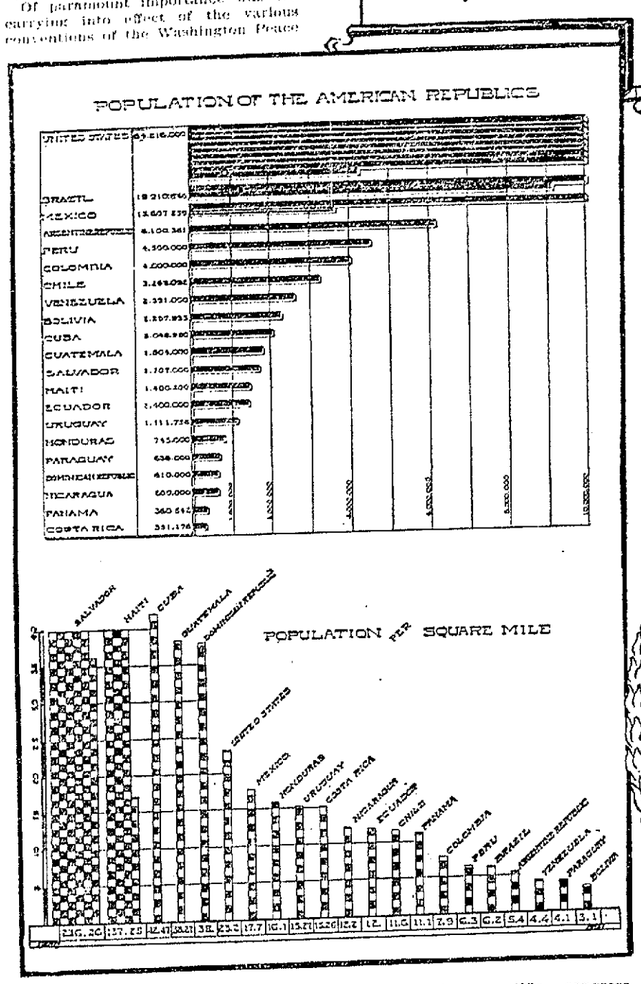

Imports into all of Latin America during 1908 amounted in value to $893,253,998, against $1,060,297,852 in 1907, the indicated decline for this branch of trade being $167,043,854.

On the other hand exports with a total valuation of $1,084,483,021 show a gain of $15,578,701 over the figures for 1907, when Latin-American merchandise was shipped abroad to the value of $1,068,904,320.

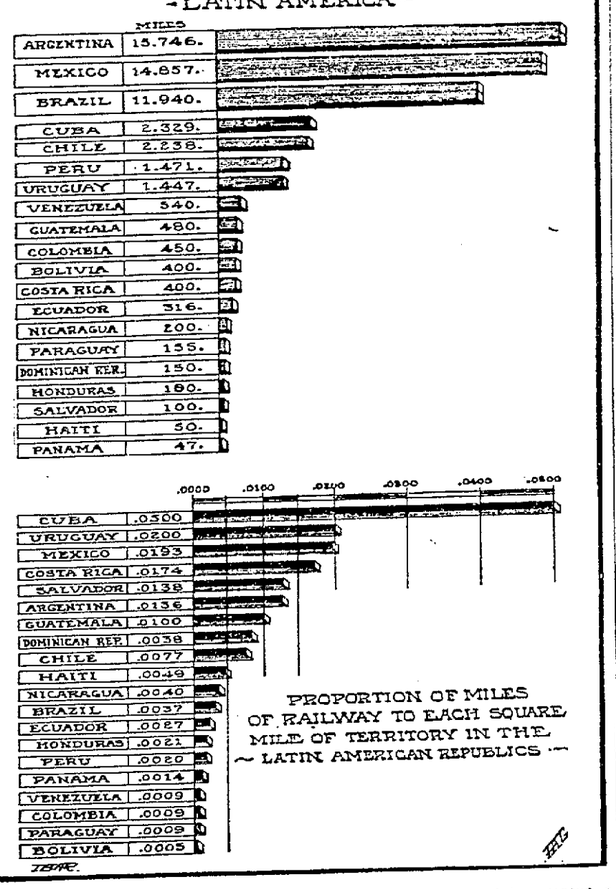

From the foregoing statement it is seen that in spite of certain adverse conditions in the financial world the demand for articles of Latin-American origin created a trade balance in favor of the producing countries to the extent of $191,229,023, in which sum the exports for the year exceeded the imports.

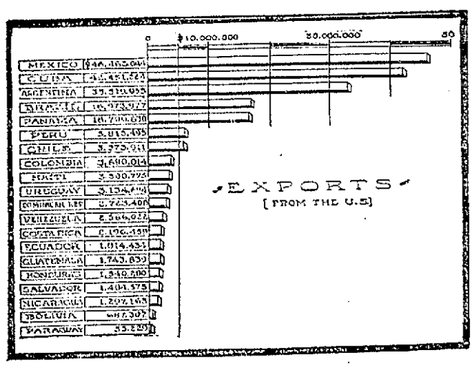

In the year's trade total for Latin America the United States' share was $468,216,455, as compared with $558,279,201 in 1907, receipts of Latin-American merchandise figuring on the trade lists of the country for $271,498,425 and shipments of United States goods to those countries being represented by $196,718,030, as compared with imports worth $317,726,133 and exports $240,553,068 in 1907.

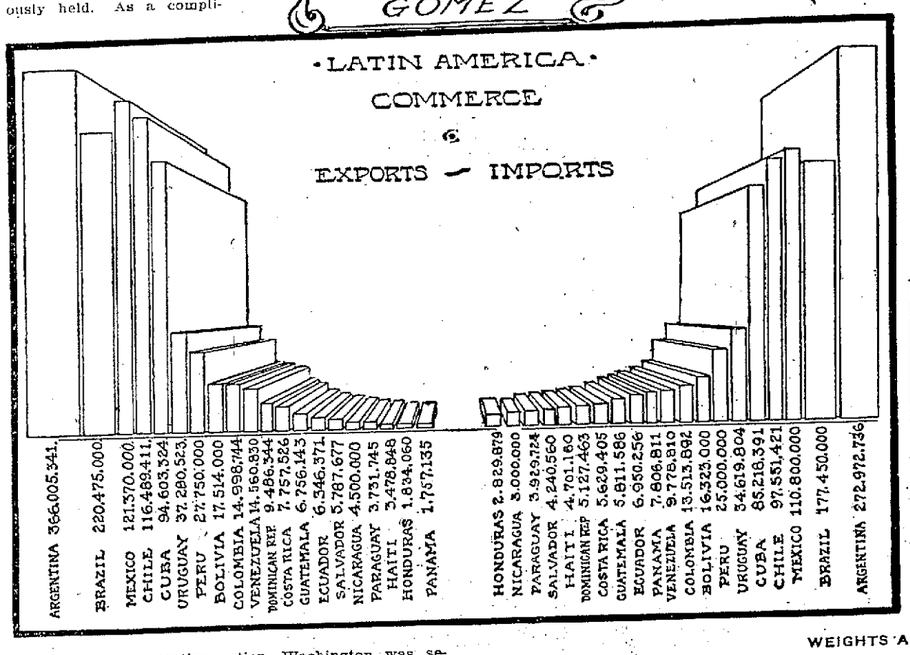

In considering the figures given above, adverse conclusions must not be drawn as to the value of the Latin-American field of trade. The falling off in the exchange of commodities for the year 1908 with the United States, as already suggested, was due almost entirely to unfavorable and unusual economic conditions. The reliable measure of such value is determined by comparing the statistics of the present with those of 10 years ago, and here a great increase is shown. The outlook for the coming year is good, and there is an awakening among business men in both North and South America to the possibilities of trade exchange heretofore undeveloped which must have a beneficial effect on Pan-American commerce.

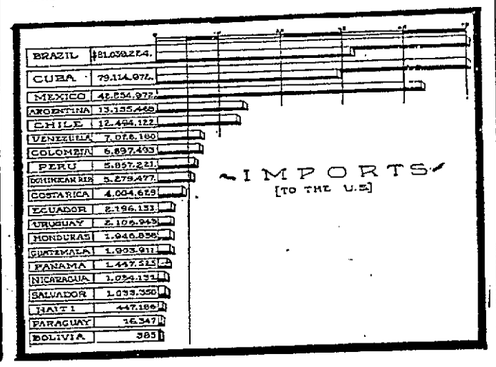

TRADE OF AMERICA IN 1908.

	Imports.	Exports.	Total.
Argentine Rep.	$272,972,736	$366,005,341	$638,978,077
Bolivia	16,323,000	17,514,000	33,837,000
Brazil	177,450,000	220,475,000	397,925,000
Chile	97,551,421	116,489,411	214,040,832
Colombia	13,513,892	14,998,744	28,512,636
Costa Rica	5,629,405	7,757,525	13,386,930
Cuba	85,218,391	94,603,324	179,821,715

Venezuela	9,778,810	14,560,830	24,339,640
Totals	$2,009,703,679	$2,837,816,268	$4,847,019,947

WEIGHTS AND MEASURES.

The following table gives the chief weights and measures in commercial use in Mexico and the republics of Central and South America, and their equivalents in the United States:

Denomination.	Where used.	U. S. equiv'l'nt
Are	Metric	0.2471 acre.
Arobe	Paraguay	25 lbs.
Arroba (dry)	Argentine Republic	25.3171 lbs.
Do.	Brazil	32.38 lbs.
Do.	Cuba	25.3664 lbs.
Do.	Venezuela	25.4042 lbs.
Arroba (liquid)	Cuba and Venezuela	4.263 gals.
Barril	Arg. Rep. and Mexico	20.0787 gals.
Carga	Mexico and Salvador	300 lbs.
Centaro	Central America	4.2631 gals.
Cuadra	Argentine Republic	4.2 acres.
Do.	Paraguay	78.9 yds.
Do.	Paraguay (square)	8.077 sq. ft.
Do.	Uruguay	2 ac. (nearly)
Cubic meter	Metric	35.3 cu. ft.
Fanega (dry)	Central America	1.5745 bu.
Do.	Chile	2.575 bu.
Do.	Cuba	1.599 bu.
Do.	Mexico	1.54728 bu.
Do.	Uruguay (double)	7.776 bu.
Do.	Uruguay (single)	3.888 bu.
Do.	Venezuela	1.599 bu.
Frasco	Argentine Republic	2.5096 qts.
Do.	Mexico	2.5 qts.
Gram	Metric	15.432 gr.
Hectare	do	2.471 acres.
Hectoliter (dry)	do	2.838 bu.
Hectoliter (liq.)	do	26.417 gals.
Kilogram (kilo)	do	2.2046 lbs.
Kilometer	do	0.621376 mile.
League (land)	Paraguay	4.632 acres.
Libra	Argentine Republic	1.0127 lbs.
Do.	Central America	1.043 lbs.
Do.	Chile	1.014 lbs.
Do.	Cuba	1.0161 lbs.
Do.	Mexico	1.01465 lbs.
Do.	Peru	1.0143 lbs.
Do.	Uruguay	1.0143 lbs.
Do.	Venezuela	1.0161 lbs.
Liter	Metric	1.0567 qts.
Manzana	Costa Rica	1 5-6 acres.
Marc	Bolivia	0.507 lb.
Meter	Metric	39.37 in.
Pie	Argentine Republic	0.9478 ft.
Quintal	do	101.42 lbs.
Do.	Brazil	130.06 lbs.
Do.	Chile, Mexico, Peru	101.61 lbs.
Do.	Paraguay	100 lbs.
Do.	Metric	220.46 lbs.
Suerte	Uruguay	2,700 cuadras. (See Cuadra)
Vara	Argentine Republic	34.1208 in.
Do.	Central America	33.874 in.
Do.	Chile and Peru	33.367 in.
Do.	Cuba	33.384 in.
Do.	Mexico	33 in.
Do.	Paraguay	34 in.
Do.	Venezuela	33.384 in.

KING THAT IS TO BE

Heir-Apparent to British Throne Reserved and Dislikes Ceremony.

What is known in society as the Marlborough house set is far smaller now than when the king was prince of Wales, says a writer in the Boston Transcript. The present heir to the throne, though he inherits many of the qualities which have made his majesty the most universally popular monarch that ever wore the English crown, is admittedly of a reserved and rather retiring disposition, and the circle of people who are permitted to enjoy his intimacy is a small one.

Sir Arthur Bigge, the prince's private secretary, is rather a taciturn individual, and a story is told that on one occasion, when the prince was sitting next to him at a state banquet at Buckingham palace, given by Queen Victoria, his royal highness remarked to him humorously: "I like sitting next to you, Sir Arthur, for, like myself, you prefer thinking to talking."

The prince, it is well known, has a very great dislike to ceremonial, and wishes to be treated, as far as is consistent with etiquette, as an ordinary guest wherever he stays. A rather characteristic story is told of his royal highness when he was a guest at a country house-party some years ago. Among the guests was a young man who very correctly addressed the prince as "your royal highness," but he repeated the expression more often than was necessary. "My dear sir," said the prince, at last, "I know I am a royal highness, but please do not remind me of the fact so very often."

The prince is not at all as much of a clubman as was the king when prince of Wales. Indeed, the only club the prince frequents is the Marlborough, to which institution all his personal friends belong. The prince is known not to approve altogether of club life.

There is a younger son of a well-known peer now farming very extensively in Canada, who some years ago was what might be termed a confirmed club loafer. On one occasion he overheard the prince make some remarks about the amount of time many young men nowadays wasted in clubs. Two months later the son of the peer in question had sailed for Canada. "But for the prince's remark which I overheard," he said to a friend before he started, "I believe I would have gone on wasting my time until I was too old to be of any use in the world."

But perhaps the prince of Wales' really most intimate friends are his children. Not so very long ago the Princess Mary expressed a wish one day to pay a visit to the zoo. The prince had arranged to leave London for Scotland that afternoon, but he altered his arrangements and took the Princess Mary and Prince Henry to the zoo instead.

"Make Good."

Apologies count for but little in the business world. Good intentions possess value only when they are fortified by actual accomplishments. The test of all things is that which measures results. These constitute the court of last resort. If they are of a desirable nature the one bringing them to pass is recognized as worthy of confidence. If they are not, he is asked to retrace his steps and revamp his line of operation.—Fraternal Monitor.

INDIANS WERE DESTROYED

White Man Coveted Land of Onas for Sheep and Used Treachery.

In his article on his adventures among the Ona Indians of Tierra del Fuego in Harper's for August, Charles W. Furlong charges the white colonists with having wantonly destroyed this once strong race.

"Less than three decades ago the primitive inhabitants, the Ona Indians, lived, hunted and fought from Angarda point in Magellan strait to Beagle channel.

"Had the whole island been like the southern half, to-day the Onas, in all probability, would be in control of practically all of their original domain. Had it been like the northern half, the world would undoubtedly look upon the hunting grounds of an extinct race. As it is, within less than thirty years the Onas have shrunk from perhaps 3,000 to 300, and all because they possessed land the white man coveted for his sheep, and had inborn courage and ferocity strong enough to oppose him.

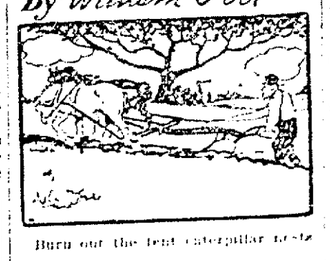

"With the establishment of the first sheep range, in the early '80s, began a cruel and persistent warfare on the part of the white man. In reprisal for the land from which he was driven, the Ona raided the range at night for the white guanaco, as he called the strange animal, the sheep, which he found not only easily captured, but sweeter and more tender to the taste than the wild guanacos of his island.

"These raids were so persistent and assumed such magnitude that it really became a case of Indian or sheep, and the scattered settlers with their rangers began a warfare of extermination in which hirelings were engaged and the 'chunkies' shot on sight. Occasionally a large number with their women and children were rounded up and shipped to Dawson island, where tuberculosis-infected quarters soon accomplished their work. It being a case primarily of bullets against arrows in an open country, the result was obvious. In treachery the white man outdid the Indian. He invariably took him at a disadvantage and played false with his truce, even resorting to poisoning one of the Ona's main food supplies, the blubber of stranded whale."

Rome is where art is.

NOTES FROM MEADOWBROOK FARM

By William Pitt

Burn out the first caterpillar nests.

The sheep should never be handled roughly.

The non-layer makes a good eater for the table.

Horses with tender shoulders should have sweat pads used upon them.

With the lightening of the work lighten up on the feed ration for the horse.

A handful or oil meal daily in the horse's ration will help put a gloss upon his coat.

The wife will prove your best counsellor. Listen to her and many a legal complication will be spared.

Milk is good for the hens as well as the pigs. See if you cannot spare them some. It helps to make eggs.

How are the drains about the house? Time to think about getting them in good shape for the winter months.

Hold the wheat in the bin rather than sell at too low a price. It is almost certain to run into money before the year is over.

Food left in the trough by the hogs is the best kind of evidence that you are feeding too generously. Feed only what will be eaten up clean.

To produce good eggs and get them on the market in the best possible condition one must provide good housing, food and water regularly, and above all keep the nests clean. Eggs should be gathered daily, and when the temperature is high they should be gathered twice a day. Reject all doubtful eggs and keep the eggs in as cool a place as possible.

Much has been said in the papers about "petroleum butter," and the curiosity if not the anxiety of the dairy farmers has been excited. Dairy Commissioner Foust of Philadelphia secured a sample of "petroleum butter" and had it analyzed. He found it was composed of 80 per cent. vaseline, two per cent. salt and 10 per cent. cornstarch. The rest was water. The sample looked much like vaseline and is said to taste like it. Mr. Foust decided that it could not be sold as butter.

Drained soils are generally well ventilated soils, for as the water percolates through and lowers the water table, it draws an equal amount of air into the soil. Then when another rain falls and a sheet of water is formed on the surface of the field, it presses down upon the soil air, and has a tendency to force it out through the drains, and in settling draws another volume of air into the soil, so that every shower helps to change the air in a drained field. The drains themselves continue ventilating flues by means of which air circulates through the soil more or less because of changes in temperature and barometric.

The simplest form of silo is the stave silo. It should be made from two-inch narrow plank, properly beveled and held together by strong iron bands. The staves, after beveling so that when fitted together they will form a circle of the desired size, are placed on end on a solid foundation and properly fitted. These are strengthened and held in place by strong iron hoops, which are so made that they may be tightened or loosened at will. Doors should be built at intervals from the top to the bottom so that the silage may easily be got out. It is not necessary to put a roof on this silo, but it is much to be preferred. This style of the silo should be kept well painted, both inside and out. If properly built and taken care of a stave silo is durable, rigid and air-tight.

Capes in young chickens is caused, according to Prof. H. A. Surface, state zoologist of Indiana, by eating of earthworms. There are parasites in the earth-worms which find their way into the windpipe of the chicken and lodge there, where they take the form of little red worms. The best preventive is to keep the chickens from the surface of the ground, or use salt or strong water on the soil, so as to kill the earth-worms, or strew strong lime or something of the kind on the ground, so that the chicks will not get hold of the worms to eat them. After the chicks have been attacked with gapes, however, you can dislodge the worms by making a very small loop of twisted horse hair, draw out the tongue of the chick slightly, insert the horse hair loop in the windpipe opening, which will be seen between the forks at the base of the tongue, and, twisting the hair around, withdraw it. The worms are likely to be found within the loop, or some of them will have been thus removed, and the operation can be repeated. Another remedy is to dip the tip of a soft feather into kerosene and insert it in the windpipe opening to dislodge and kill the worms. Such treatment, although severe, is better than letting the worms remain undisturbed, to severely annoy the fowls and even kill them. Mixing turpentine or other substances in the food of the young poultry has not proven satisfactory as a remedy for gapes.

Clean up the rubbish in garden and orchard and burn. In this way many a harmful insect is destroyed.

Sudden changes in diet are harmful to all farm animals, especially the horse. With the lull in the hard work, be careful how you turn the horses on grass.

Success in dairying is determined by the wisdom and care which is displayed in breeding better cattle, by selecting the right feed, and increasing the fertility of the soil.

Pumpkins are fine food for fattening hogs.

Variety of feed should be provided for the hens.

Gunpowder and lard is good for scratches on the horse.

Cut out the old canes from the berry bushes and burn them.

Keep the pullets pushed ahead. Extra feed now means early egg laying.

Half-starved sheep will clean up a breech lot but will not make any profit for their owners.

A tired horse is in no condition for food or water. Give a little time to rest and cool off before watering and feeding.

Keep some of the oat sheaves for the poultry this winter. They will enjoy them hung out the feed for themselves.

A small grain ration every day will be found profitable to the milk pail if the cow is to be profit earning class at all.

The Leghorns are rivaled in other members of the class, are even but a reflection of the things we do and have taught them.

Milk should be cooled as soon as possible after drawing from cow. It will keep longer and have a finer flavor when thus handled.

Bees, it is said, never puncture grapes. They do sip the juice, however, after birds and wasps have punctured the skins. Place the blame where it belongs.

Unsound feet in a horse are generally indicative of a constitutional weakness which is sure to appear in the offspring. Therefore be sure the mare and sire are both sound.

Without some system of accounts how could the merchant do business safely. And yet such business accounting is as important for the farmer as for the merchant.

Be sure the bit is not so narrow as to irritate and pain the mouth of the horse. Such condition leads to unruliness which often may result in the horse taking the bit in his teeth and bolting in sheer desperation.

Here is a dust powder which is non-poisonous and is sure death to cabbage worms, etc.: Air-slacked lime with a good sprinkling of fine table salt. It can be placed in a can having a perforated top and sprinkled upon the plants troubled with the worms. This is a good idea to save for next season.

A garden without fruit trees and berry bushes is only half a garden. There should be enough for family use in season, for canning and preserving and such like for winter use, and some to sell. Starting with strawberries, which come in very early and the first fruit of the season, there should be added raspberries, blackberries, gooseberries, currants and grapes. The great advantages of small fruits are that they occupy small space, are easy to grow, they begin bearing early and the fruit is the most delightful and the most wholesome of all foods. They are an ornament to any farm or home grounds.

Prof. O. F. Hunziker, head of the dairy department of the Indiana experiment station at Purdue, and Prof. G. W. Spitzer, dairy chemist of the same institution, have just completed experiments to determine the cause of the low per cent. of butterfat in a large portion of the evaporated milk on the market as reported by chemists and pure-food departments throughout the country. Although milk containing the required per cent. of butter fat, when made into evaporated milk, and an analysis by the usual methods made shows a shortage of from 0.5 to two per cent of fat, by the experiments explained in this bulletin it has been found that there is no less fat present, but that the ordinary Babcock test and the official methods of fat estimation do not liberate all the fat present. The fat column in the test bottle is generally cloudy and containg charred and curdly deposits, making accurate readings difficult. Uniformly correct results are obtained by the use of a one-fourth dilution of evaporated milk and of dilute acid after the first whirling of the tester in the place of water. Correct results are also obtained by other extraction.

David Buffum has this to say in the Atlantic Monthly regarding the "mission of the land," and he is about right: The mission of the land is to produce and keep on producing food, live stock, lumber and other commodities for the service of man. He who owns land and is indifferent to this, is guilty of a moral wrong; and he who takes good land out of commission and suffers it to lie unproductive and useless is guilty of a greater one. This is the only criterion by which we can properly judge of the right of an individual to own land in large tracts. The good results attendant upon small individual holdings are natural. The purposes of nature in the upward evolution of man are usually better carried out in this way, and not because, as is so frequently argued, every man has an inherent right to its ownership. The lazy, the incapable and the densely ignorant assuredly have no such right, and land is too precious and its mission too high to be thus wasted. If the owner of a great country estate can farm his land as well as or better than if it were in small holdings; if, following the precept of Swift, he make two ears of corn or two blades of grass grow where one grew before; if he supply his section with a better breed of horses, cattle or sheep, well and good; no one with any knowledge of economics could say he was doing any injury to the world or mankind. It is not the amount of land that he owns, but what he does with it for which he is morally responsible.

During the molting season take the male birds from the flock.

The return from a piece of land is not so much dependent upon the soil as upon the kind of management which that piece of ground receives. Many a seemingly worthless piece of land has been made to produce a profit under skillful handling.

Sound in Arctic Air.

The arctic air is very favorable for the transmission of sound.

STATE PARK GETS $25,000 DONATION

Senator Stephenson to Aid in Beautifying Place.

PROMISES $25,000 DONATION

New Door County Public Park May Be Named After the Junior United States Senator—Is Fine Tract.

Madison—The 3,000-acre park which the state has purchased in the Door county peninsula may be named "Stephenson park" after United States senator Isaac Stephenson of Marinette.

The senator has promised $25,000 toward the improvement contemplated by the state park board and it is broadly rumored that the contribution may be increased. Pledges of the fund named amount was secured by Park Comrr. ioner T. J. Cunningham of Madison.

State Treasurer Dahl, who has just returned from the park country, is pleased to over the prospect of helping the cause, but is not a notable one in every way. The tract already possesses many natural advantages.

In addition to the amount to be given by Senator Stephenson for improvement the park board has $20,000 of its own to spend for this purpose. The board has not yet decided upon the nature of all the improvement, but the principal work will be to clear away much of the underbrush, and what civilization has marred the beauty of the land to restore it some what to its natural state.

For Better Wardens.

Notable improvement in the efficiency and personnel of the game warden department is looked for under the supervision of Chief Game Warden George W. Rickman, which already has accomplished significant results. Quite a number of changes have been made quietly and unsensationally in the personnel, taking principally into account the testimony at the senatorial investigation last winter, and several vacancies will be filled soon. There will be a civil service examination for candidates for game warden positions on October 2, and there seems to be every disposition on the part of the chief game warden to cooperate with the civil service commission in upbuilding the department. There is a noticeable decrease in the amount of pressure of a political nature brought to bear on the department, and that is considered one of the most significant signs of an improvement. P. E. Doty, secretary of the civil service commission, believes that the staff of wardens retained and those to be added will represent a higher grade of men, due largely to the fact that the position is now more attractive to men who are willing to do their duty as game wardens and who refuse to use their position to push the political fortunes of candidates for office. There also is prospect of an increase in the salaries of wardens from $2.50 to $3 a day and expenses.

Carries Power to Ashland.

If the development of Wisconsin waterpowers continues at the rate it has gone for the last five years, Bad river for its entire length will be harnessed within a few years. Copper Falls will be the next scene of active operations. Plans are now being made by an Ashland company for the construction of a plant at Copper Falls that will develop 700 K. W. of hydro-electrical power. The current will be transmitted across country to Ashland for distribution. The White River Power plant is being rebuilt on a large scale.

Builds Power Loader.

A mammoth log loader is now being completed at the Stevens plant at Marinette by O. A. Raymond and will be equipped with a 10 horsepower gasoline engine. The loader will be mounted upon a large sleigh and can be hauled from place to place. During the last several months a large number of loaders have been turned out by Mr. Raymond and the loaders are in use all over the country. Mr. Raymond started the construction of loaders to be operated by horses, several years ago.

Makes Fiberrush Chairs.

The American Manufacturing Company is re-establishing a new line of "fiberrush" chairs and other articles of furniture at Sheboygan. Richard Krueger of Jackson, Mich., is in charge of the new department and is at present conducting the manufacture of a line of samples but the department will start turning out the product with a regular crew about the first of the year.

New Incorporations.

Articles of incorporation were filed in the office of Secretary of State Frear as follows:

Big Creek Creamery Company, La Valle; capital, $200; incorporators, Albert Selkar, John Finley, William Lucht, V. Jackson and A. Pound.

SS. Peter and Paul congregation, Aurora, Taylor county; no capital stock; incorporators, Rt. Rev. Augustin F. Schinner, Very Rev. Walter Fardy, Rev. Constantine Frydrychowicz, Felix Kusprzykiewicz and Peter Gumski.

Amendments filed:

W. E. Allen Company, Milwaukee, changing its name to George Eller Lumber Company.

Door County Equity Elevator Company, increasing its capital stock from $8,000 to $20,000.

A. O. Smith Company, Milwaukee, increasing its capital stock from $500,000 to $1,200,000.

Stange-Elbs Lumber Company of Grand Rapids, changing its name to E. W. Elbs Company.

North Milwaukee Light & Power Company, Milwaukee, increasing its capital stock from $12,000 to $30,000.

Stands by Judge Lueck.

The Wisconsin supreme court denied the petition of Attorney General F. L. Gilbert for an alternative writ of mandamus compelling Judge Lueck of Juneau to revoke his order dismissing a complaint of perjury against P. J. Buckley of Waukesha. Buckley was employed by the Wisconsin Central Railroad Company and was alleged to have falsely testified in a suit in which that company was a party. The complaint was dismissed because the alleged false testimony was not material to the issue in controversy.

Model Fruit for Fair.

What is to be called Improvement day that can be made [illegible] President George McKinley has issued a proclamation [illegible] the 20th of the month, the day of the dedication of the [illegible].

More land, more and more buildings. More land and more buildings. A manufacturers' building, in that Milwaukee means acres and acres hereafter, and lots of manufacturers and more chances to sell cars come out here and show their products to a great need. But it takes land, more land. Yesterday, with 25,000 people, the grounds were crowded.

"Other buildings are needed also," added the president. "The great crowds have filled the two that we had with enthusiasm. The mammoth exhibits have been a real source of gratification to him and he wants a better, bigger fair.

"More such buildings as our model barn and model school are needed," he said.

"Yesterday Assemblyman C. H. Lerchen came out to me that we build a model farmer's home with model kitchen and a model system of ventilation. I told him of that plan and told him it must. It is a new idea. I think it could be a good thing."

To Consider Land Purchases.

The purchase of additional land for the erection of racing table and the building of the electric railway loop into the fair grounds will be the subject for discussion at a meeting of the state fair board to be held in Milwaukee. The land to be purchased will undoubtedly be the so-called Fernandina tract immediately adjoining the ground on the east.

It was the ground that was meant when the appropriation was passed, and it was the only one mentioned in the agreement before the committee on claims which approved the measure. It is the plan to erect the table in such manner that horses and other forms can be taken in without having to haul the loads through the gates.

Complain Against Rates.

The Western Lime & Cement Company of Milwaukee has filed a complaint with the interstate commerce commission against the Milwaukee road on account of the rate on a shipment of lime from Sherwood to Hollandale. The complaint alleges that the rate was twice what it should have been.

The Menasha Woodenware Company has filed a complaint against the same road on account of the rate on a car of wooden pails shipped from Erie, Pa.

Middleport Lime complain of rates on a car of thereof shipped via the Milwaukee road from Racine Junction to Dennison, S. D.

President Olin Resigns.

John M. Olin resigned as president of the Madison Park and Pleasure Drive association and member of the board of directors. The association was organized 17 years ago through the efforts of Mr. Olin and he has been president ever since. As the result of his zeal and energy and with the assistance of public spirited citizens beautiful drives have been built and several parks established. Mr. Olin gave as reasons for his resignation that the work of the association has so increased that in justice to himself and his professional engagements he cannot continue longer as president.

Norwegian Pioneers in Reunion.

Norsemen and the members of their families to the number of several hundred were assembled in Stoughton taking part in the biennial meeting of the Norwegian Pioneer Association of America. C. J. Mehaas of this city is president, J. I. Hoppersted of Decorah, Ia., is secretary and I. S. Kolhei of Cottonwood, Minn., is treasurer. The association was organized in Madison, Wis., in 1896 for social purposes and also to gather and preserve historical data of the early pioneers. Members must be of Norwegian blood or extraction, and have resided in America 10 years or more.

Feel Prosperity's Wave.

On account of the large number of rush orders the Aluminum Goods Company are running the factory at Two Rivers until 8:15 evenings. A full force is employed in every department and the plant is taxed to its capacity. From present indications the plant will continue to run evenings the entire winter. All manufacturing plants are rushed with orders and labor of all kinds is scarce in this city.

Cannot Hold Office.

It became known that the state civil service commission refused to approve of the reappointment of any of the deputy game wardens who were present at the midnight conference at the home of State Game Warden Stone last winter when it was agreed to withhold certain facts from the senatorial investigation committee. The deputies in question were Kingsley, Johnson, Bowman, Tuttle, Richman and Brown.

Many Medals for Butter.

Making butter by hand in the good old-fashioned way down on the farm is not a process too obsolete to receive recognition in the national dairy show in Milwaukee on October 14 to 24. Marketing this product direct to a critical trade is the most profitable outlet available in many sections and this homely branch of the dairying industry is to be recognized for the first time gold and silver medals and diplomas being awarded.

A number of conventions are to be held in conjunction with the show. Dates have been set as follows: October 18, International Milk Dealers' association, Official Dairy Instructors' association; October 19, National Association of Ice Cream Manufacturers, National Dairy union, Dairy Farmers' association; October 20, American Creamery Butter Makers' association, Cow Testers' association, National Creamery Butter Makers' association; October 21-22, National Creamery Butter Makers' association.

C. T. Graves, Maitland, Mo., has been selected to judge Jersey cattle on October 18, when awards also are to be made in the Holstein division.

Public Utilities Can Collect.

Public utilities are entitled to avail themselves of reasonable means to enforce payment of bills, either requiring cash deposits or securities in advance or by discontinuing service when bills are not paid as required by the rules of the company.

A decision to this effect was announced by the railroad commission in an action against the Wisconsin Telephone Company by one of its clients over the payment of a service bill.

ROAD AND FARM IMPROVEMENT

CLEVERLY BUILT ICE BOX

Refrigerator Which Keeps Milk, Butter and Other Perishable Goods Cool Without Ice.

By MILLER PURVIS.

While I was in California this summer I saw almost everywhere coolers or refrigerators which were used to keep milk sweet, butter firm, and to cool water, all this being done without the use of ice. I made one of these coolers myself and most of those I saw were made by local carpenters, although they are kept on sale in some of the towns.

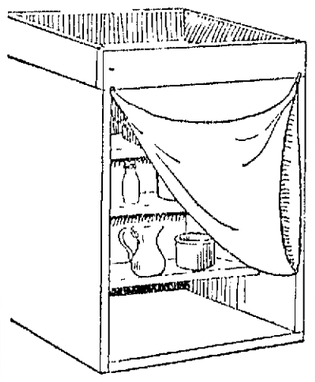

I am not an expert with tools and in the remote place where I happened to be tool were scarce but with only a square saw and hatchet I made the cooler and it worked just as well as any other one I ever saw.

We kept butter perfectly firm in it and fresh meat cool and sweet. All sorts of stewed fruit we kept in it much longer than it would have kept outside, as the temperature was above 100 degrees for weeks at a time and went as high as 110 more than once.

The sketch shows the cooler with the front curtain back to show the shelves.

We would put place fruit cans full of drinking water in the cooler and it was kept cool and refreshing, and probably much more wholesome for drinking purposes than it would have been had it been iced.

To make one of these coolers a skeleton frame made of 2x2 inch posts, joined by 1x2 inch strips, is set up

Cooler Without Ice.

In this shelves are put at convenient distances apart and the four sides are covered with burlap. I used barley sacks for this purpose.

The cooler I made was three feet square. Ordinarily a water-tight box eight or ten inches deep the size of the top is made and set on the top of the frame. Around the box near the bottom a row of gimlet holes is bored and these are fitted with plugs.

The box is filled with water and the plugs in the holes are loosened until the water seeps out just enough to run down through the burlap on the sides and keep it wet all the time. The burlap on the front side is fastened to only one post, the top and the other side being kept in place by rings along the edge which are slipped over nails partly driven in.

This constitutes the door through which access is gained to the inside of the cooler. Once in a while I saw one with a skeleton door over which the burlap was stretched as screen wire would be over a screen door, but this was considered rather elaborate for most people.

PREVENT COW SPILLING FEED

Ordinary Candy Bucket May Be Employed to Stop Animal From Slobbering Feed.

Take an ordinary candy bucket and bore a hole in each side. To this fasten the halter in such a manner that the cow cannot lift her head out of the pail. After she starts to eat she cannot tip the pail over nor slobber her feed all over the floor.

Holds Feed.

HARM IN STAGNANT WATER

All Shallow Lots Should Be Drained and Kept Dry, and All Breeding Places Filled.

As pools of stagnant water, cisterns and neglected drains are breeding places for mosquitoes, Prof. Surface, the Pennsylvania state zoologist, recommends that all tanks of water, cisterns or vessels which hold water, or which might be filled with water after a rain, be covered or screened with a screen of at least 18 meshes of wire to the inch. Standing water on lots on commons should not be permitted. All shallow lots should be drained and kept dry, and post holes filled, old tin cans and bottles emptied, and all breeding places destroyed. All stable refuse should be removed at least every week. Where there are large natural bodies of water which cannot be drained, the surface should be disinfected and oiled with kerosene at frequent and regular intervals. Kerosene is invaluable in this connection, and it is also good as a disinfectant. Chloride of lime, or common copperas (sulphate of iron) can be thrown into cesspools.

Enemies of Bees.

The worst enemies of the bee are the foul brood and black brood. One or the other of these diseases are in some parts of the state, and black brood has been very bad in New York state. These diseases of bees have been carefully studied by the department in Washington, and we have some pretty definite information on the matter. The treatment for both is that of removing all the combs and starting the bees fresh, without any contaminated honey, in a new hive, and the use of the old combs for wax.

Poultry Raising Profitable.

The poultryman who is making a profit from his poultry will no doubt see the importance of making poultry raising an industry which he is proud of, and do all in his power to maintain and advance all lines of poultry raising. Poultry production in the United States has become one of the greatest industries in the world. In every section of the world chickens occupy the attention of many persons, some of whom are in the business for profit, others for pleasure.

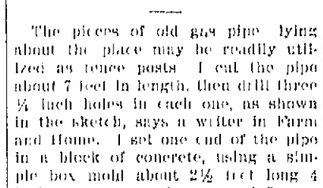

PROMOTE GOOD ROAD MAKING

Nobody Knows Better Than Farmer What a Valuable Asset to Community Good Road Is.

Good roads are simply a result of thorough drainage and keeping the surface of the roadbed smooth and well packed. So keep all drain ditches open, and the road drag moving. Nothing comes to nearly filling all the requirements for maintaining a perfect roadbed as the simple drag.

Fill up all low places, and work the dirt toward the center of the road. Cut or trim all hedges bordering the highway that the good effect of sun and wind may be applied. Do your full share of improving the road and try to persuade your neighbor that he should do the same, and the most gratifying results are certain.

As in most everything, it's the little items that combine to promote good road making. If there are some short, deep pits between your place and

Split-Log Drag.

town, how long would it take to throw a bovelful or two of dirt into these pitfalls and mudholes? It would save you and your neighbor many a jerk and jolt, to say nothing of the wear and tear on horses, harness and vehicles.

Some way with the approaches to nine out of every ten bridges you bump over while driving to town. Patch those treacherous holes in the ladder, too. A horse's leg is easily broken in one of these wicked-looking holes.

Make it a rule to stop the team and throw at least a dozen rocks and pebbles out of the track into the ditch every time you drive to town. You get mighty tired of the jerking and jolting they give you. They also knock out your wagon and buggy tires more than most men think.

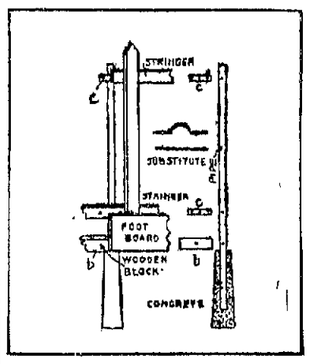

A diagram and illustration of a split-log grader is given herewith for the benefit of those interested in the construction and maintenance of good roads. Nobody knows better than the farmer what a valuable asset to a community a good road is.

UTILIZE PIPES FOR POSTS

Old Pieces of Gas Piping May Be Used to Good Advantage in Fencing in the Farm.

The pieces of old gas pipe lying about the place may be readily utilized as fence posts. Cut the pipe about 7 feet in length, then drill three ¼ inch holes in each one, as shown in the sketch, says a writer in Farm and Home. Set one end of the pipe in a block of concrete, using a simple box mold about 2½ feet long 4 inches square at the top and 5 or 6 inches square at the base.

The cleats, c c, are made of old tire iron, 1x¼ inch. These are bolted to

Working Plans.

the pipe at the two top holes. A block, b, is bolted to the bottom hole. Stringers are attached to the iron cleats. Pickets are nailed to the stringers and a foot board is fastened to the block, b.

VALUE OF POULTRY MANURE

How to Prepare Drippings from Grain-Fed Poultry for Enriching the the Garden Soil.

The drippings from grain-fed poultry, sowed, is nearly equal in value to guano, says the Baltimore American. It should be beaten fine and carefully sifted. The most economical and best method is to mix it with twice its bulk of fine, sifted woods' earth, or good rich soil from an old pasture, turn it over two or three times with the shovel, sprinkle as it is being turned with just enough water to dampen the mass, then throw up into a compact, conical heap, and let stand until fermentation sets in; it should be turned over once more when it is ready to use; the fermentation makes it available for quick action. The compost may be used in the hill for corn, cabbage and tomatoes; it may also be spread round the plants and worked into the ground with the hoe. It should be mixed with the earth before dropping the seed. It all depends upon how the hens are fed as to the value of the drippings.

FARM AND GARDEN NOTES.

It is better to sow rutabaga turnips in rows than broadcast.

Apple culture in Texas should be developed more assiduously.

Rotation must be practiced in the garden or truck field to obtain the best results.

Black Winter or Spanish radishes should be sown in August or September with turnips.

He who lets the weeds go to seed this month is storing up for himself infinite trouble next year.

It has been said that "weeds are the devil's flower." Certain it is that they play the mischief with a crop.

For best results in the vineyard plenty of water is necessary. During the hot season sub-irrigation is advisable.

A fall crop of potatoes will be found profitable, if the grower has kept his land in good tilth during the summer.

The eighth annual convention of the National Nut Growers' association will be held at Albany, Ga., October 12, 13 and 14, 1909.

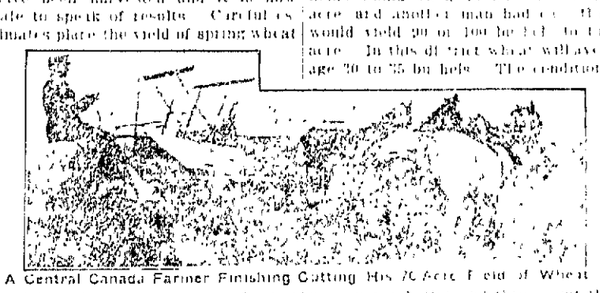

All decaying cabbage should be dug up and destroyed. Black rot and other fungus diseases and insect pests will thus be held back.

All rubbish should be removed from the garden before it is plowed. Debris of any sort is annoying and interferes with cultivation.

WESTERN CANADA

During the early days in the period of the growth of the grain crop in Western Canada, as well as throughout the ripening and garnering period, there is yearly growing an increasing interest throughout the United States as to the results when harvest is completed. This means much to the thousands of Americans who have made their homes in some of the three Provinces that form that vast agricultural domain, and are of considerable interest to the friends they have left behind.

The year 1909 is no disappointment. The crops of wheat, oats and barley have been harvested and it is now safe to speak of results. Careful estimates place the yield of spring wheat

A Central Canada Farmer Finishing Cutting His 70 Acre Field of Wheat.

at 30 bushels per acre, winter wheat at over 40 bushels, and oats exceed 50 bushels per acre. Barley also has proved an abundant yield. What will attract the reading public more than volumes of figures will be the fact that those who have been induced through the influence of the Government to accept of 160 acres of free grant land, or, by the persuasion of friends to leave their home State of Dakota, Minnesota, Iowa, Illinois, Michigan, Indiana, Ohio, Nebraska or the other States from which people have gone, have done well. Financially, they are in a better position than many of them ever expected to be, and in the matter of health, in social conditions, they have lost nothing.

One person who has just returned from a trip through the Lethbridge District, where winter wheat has a strong hold with farmers, says:

"We saw some magnificent sights. The crops were, in fact, all that could be desired.

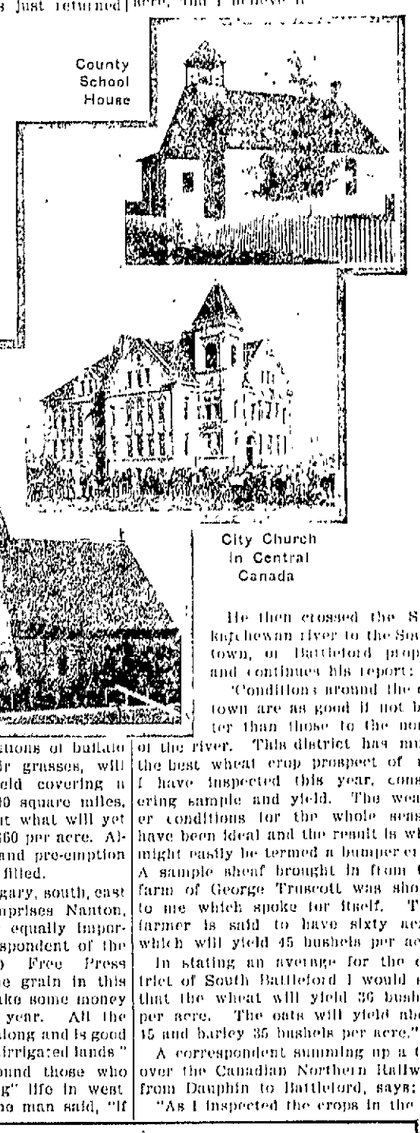

"In a few years from now these great plains over whose breadth for years roved hundreds of thousands of herds of cattle, following the millions of buffalo that once grazed their grasses, will be a solid grain field covering a territory of over 30,000 square miles, and very little of it but what will yet be worth from $10 to $60 per acre. Already the homestead and pre-emption lands are being well filled.

In the district of Calgary, south, east and north, which comprises Nanton, High River and other equally important districts, a correspondent of the Winnipeg (Manitoba) Free Press says: (Aug. 21) "The grain in this district is going to make some money for the farmers this year. All the crop is now crowding along and is good on both irrigated and unirrigated lands."

There are to be found those who speak of a "pioneering" life in western Canada, but as one man said, "If this is pioneering I don't for the life of me see what our forefathers had to complain of." He didn't know, though, for the pioneering of his forefathers was discomfort and hardship. The opening up and development of western Canada, with its railroad lines to carry one to almost the uttermost part of it, the telegraph line to flash the news to the outside world, the telephone to talk to one's neighbor, the daily and weekly mail service which brings and carries letters to the friends in distant parts; the schools headed by college-bred and highly certificated teachers; the churches manned by brilliant divines; the clubs; the social and festive life; what is there about any of this to give to the man who goes there to make his home the credit of being a pioneer? Nothing! He might as well be in any of the old middle-west States. In other parts of the world the production of wheat is dimin[illegible] today but it diminishes. Canada will [illegible] therefore it is safe to predict that a few years hence Canada will be looked to by the world will be looked to more as Canada for its wheat supply and especially will the Canadian Northwest [illegible] part of western Canada is destined to have a hundred-mile square of wheat without a break. Yesterday we were driven west and north of Moose Jaw through 50 miles of developed wheat acreage, and well-worked summer-fallows. One of these fields would yield 30 bushels to the acre and another man had one that would yield 50 or 60 bushels to the acre. In this district wheat will average 20 to 25 bushels. The conditions were never better, and there is not the district the people are a third of a mile from prosperous.

It would be unfair to close this article without quoting from an expert crop correspondent regarding the two Battlefords in Central Saskatchewan on the line of the Canadian Northern Railway. Writing on August 18th of this year, he says:

"It is necessary to drive about six or seven miles out of the town of North Battleford in order to see the best crops of the district. This morning I was driven about 20 miles to the north and west of the town, and in all the drive did not see a poor crop. I saw one where crop which the owner estimates will yield 40 bushels per acre, and I believe it."

He then crossed the Saskatchewan river to the South town, or Battleford proper, and continues his report:

"Conditions around the old town are as good if not better than those to the north of the river. This district has much the best wheat crop prospect of any I have inspected this year, considering sample and yield. The weather conditions for the whole season have been ideal and the result is what might easily be termed a bumper crop. A sample sheaf brought in from the farm of George Truscott was shown to me which spoke for itself. This farmer is said to have sixty acres which will yield 45 bushels per acre.

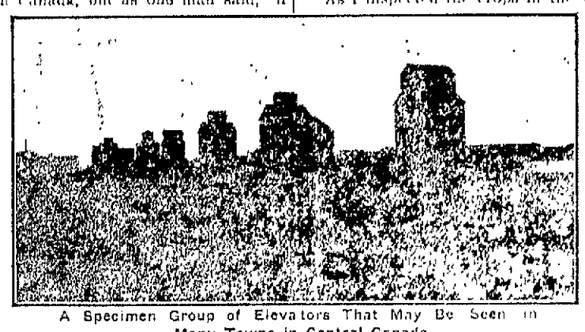

In stating an average for the district of South Battleford I would say that the wheat will yield 36 bushels per acre. The oats will yield about 45 and barley 35 bushels per acre."

A correspondent summing up a trip over the Canadian Northern Railway, from Dauphin to Battleford, says:

"As I inspected the crops in the various districts I found the farmers and other citizens without exception filled with expectant enthusiasm over this year's prospects. No district was found which could not boast of fields of 35 bushels per acre wheat, or 50 to 60 bushels per acre oats, and of 40 bushels per acre of barley."

It is not an unusual thing in many parts of western Canada for a farmer to have 10,000 to 30,000 bushels of wheat. In the Rouleau district it is said that there are several farmers who will have 20,000 bushels of oats, any many fields will return one hundred bushels to the acre.

It takes an army of men to handle the Western Canada crop, and it is estimated that 30,000 people have been brought in this year to assist in the great undertaking; there being excursions from the outside world nearly every day for the past six weeks.

A Specimen Group of Elevators That May Be Seen in Many Towns in Central Canada.

Too Rapid.

She—Why do you call your chauffeur a leaky vessel? Does he gossip about the fun you have on your motoring parties?

He—No; but I am always bailing the fellow out.

A Contrary Course.

"Here's Jimmy's doctor said he must get away from business and have more fresh air."

"Well?"

"How is he going to get fresh air in a salt sea trip?"

Thrifty.

Stella—Are they economical?

Bella—Yes; they eloped to save the cost of a wedding and are living happily to save the cost of a divorce.

Heavy Contributors.

Professor—Name two of America's most prolific writers.

Freshman—Pro Bono Publico and Constant Reader.—Lippincott's.

The gladness of young people should be encouraged far beyond the point of youth into the shade of mellower days.—Florida Times-Union.

Big Price for an Orchid.

Three hundred dollars was recently paid in Colombia for a single plant of a rare orchid. The natives, in order to expedite the collection of these orchids, fell the trees on which they grow, and then strip them of these floral parasites.

Reassurance.

"Look here! Didn't I tell you not to come around here begging again?"

"Yes'm; but I thought dat I'd drop around an' ask you if you really meant it."

A Northern Light.

Press Agent—How shall I write up the chief actor in the north pole expedition drama?

Manager—Of course, as a polar star.

The Sand Artist.

Knicker—Can he do sand sculpturing?

Bocker—Yes, he cut out several fellows at the beach.

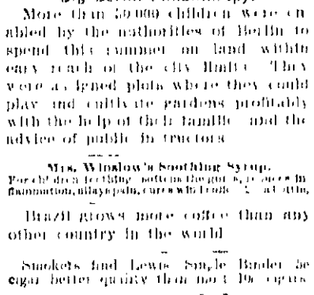

Europe has 20,000 newspapers, of which Germany possesses the largest number. England, however, has the greatest number of daily newspapers.

FALL PAINTING.

The majority of property owners are under the impression that spring time is the only proper time for painting. The fall of the year offers several advantages for the painting of buildings. The weather is usually favorable, and the paint has a chance to harden and become set before the cold weather sets in. Paint applied in the spring is apt to crack and peel off during the winter, as the heating of houses in winter causes a shrinkage of the wood, and the severe cold and the winter's blasts and storms.

National Lead Company, 1902 Trinity Building, New York city, makers of pure white lead, Dutch Boy Painter's Helper, offers to its customers a complete outfit consisting of a blow pipe and heat tester, book of color schemes, etc. State whether you want exterior or interior decorating.

MISSED IT.

Aunt Well, Johnny, I suppose you had a nice vacation in the country.

Johnny Yes, well I had lots of nice apple an' peache an' watermelons an' things, but I got there too early. Them things wasn't ripe yet.

$100 Reward, $100.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

STATE PARK GETS $25,000 DONATION

Senator Stephenson to Aid in Beautifying Place.

PROMISES $25,000 DONATION

New Door County Public Park May Be Named After the Junior United States Senator—Is Fine Tract.

Madison.—The 3,700-acre park which the state has purchased in the Door county peninsula may be named "Stephenson park," after United States Senator Isaac Stephenson of Marinette.

The senator has promised $25,000 toward the improvements contemplated by the state park board, and it is broadly rumored that this contribution may be increased. Pledge of the first-named amount was secured by Park Commissioner T. E. Brittingham of Madison.

State Treasurer Dahl, who has just returned from the park country, is enthusiastic over the prospect of making the state's first park a notable one in every way. The tract already possesses many natural advantages.

In addition to the amount to be given by Senator Stephenson for improvements, the park board has $20,000 of its own to spend for this purpose. The board has not yet decided upon the nature of all the improvements, but the principal work will be to clear away much of the underbrush, and where civilization has marred the beauty of the land, restore it somewhat to its natural state.

For Better Wardens.

Notable improvement in the efficiency and personnel of the game warden department is looked for under the supervision of Chief Game Warden George W. Rickeman, which already has accomplished significant results. Quite a number of changes have been made quietly and unostentatiously in the personnel, taking principally into account the testimony at the senatorial investigation last winter, and several vacancies will be filled soon. There will be a civil service examination for candidates for game warden positions on October 2, and there seems to be every disposition on the part of the chief game warden to cooperate with the civil service commission in upbuilding his department. There is a noticeable decrease in the amount of pressure of a political nature brought to bear on the department, and that is considered one of the most significant signs of an improvement. F. E. Doty, secretary of the civil service commission, believes that the staff of wardens retained and those to be added will represent a higher grade of men, due largely to the fact that the position is now more attractive to men who are willing to do their duty as game wardens and who refuse to use their position to push the political fortunes of candidates for office. There also is prospect of an increase in the salaries of wardens from $2.50 to $3 a day and expenses.

Carries Power to Ashland.

If the development of Wisconsin waterpowers continues at the rate it has gone for the last five years, Bad river for its entire length will be harnessed within a few years. Copper Falls will be the next scene of active operations. Plans are now being made by an Ashland company for the construction of a plant at Copper Falls that will develop 700 K. W. of hydro-electrical power. The current will be transmitted across country to Ashland for distribution. The White River Power plant is being rebuilt on a large scale.

Builds Power Loader.

A mammoth log loader is now being completed at the Stevens plant at Marinette by O. A. Raymond and will be equipped with a 40 horsepower gasoline engine. The loader will be mounted upon a large sleigh and can be hauled from place to place. During the last several months a large number of loaders have been turned out by Mr. Raymond and the loaders are in use all over the country. Mr. Raymond started the construction of loaders to be operated by horses, several years ago.

Makes Fiberrush Chairs.

The American Manufacturing Company is establishing a new line of "fiberrush" chairs and other articles of furniture at Sheboygan. Richard Krueger of Jackson, Mich., is in charge of the new department and is at present conducting the manufacture of a line of samples but the department will start turning out the product with a regular crew about the first of the year.

New Incorporations.

Articles of incorporation were filed in the office of Secretary of State Frear as follows:

Big Creek Creamery Company, La Valle; capital, $200; incorporators, Albert Seifkar, John Finley, William Lucht, V. Jackson and A. Pound.

SS. Peter and Paul congregation, Aurora, Taylor county; no capital stock; incorporators, Rt. Rev. Augustin F. Schinner, Very Rev. Walter Fardy, Rev. Constantine Frydrychowicz, Felix Kusprzykiewicz and Peter Gumski.

Amendments filed:

W. E. Allen Company, Milwaukee, changing its name to George Eller Lumber Company.

Door County Equity Elevator Company, increasing its capital stock from $8,000 to $20,000.

A. O. Smith Company, Milwaukee, increasing its capital stock from $500,000 to $1,200,000.

Stange-Ellis Lumber Company of Grand Rapids, changing its name to E. W. Ellis Company.

North Milwaukee Light & Power Company, Milwaukee, increasing its capital stock from $12,000 to $30,000.

Stands by Judge Lueck.

The Wisconsin supreme court denied the petition of Attorney General F. L. Gilbert for an alternative writ of mandamus compelling Judge Lueck of Juneau to revoke his order dismissing a complaint of perjury against P. J. Buckley of Waukesha. Buckley was employed by the Wisconsin Central Railroad Company and was alleged to have falsely testified in a suit in which that company was a party. The complaint was dismissed because the alleged false testimony was not material to the issue in controversy.

Model Farm for Fair.

"What is the greatest improvement that can be made here?" President George McKerrow, state board of agriculture, was asked as he stood on the administration building steps on the closing day of the fair.

"More land," he said emphatically. "More land—and more buildings. A manufactures building, so that Milwaukee manufacturers and merchants, and state manufacturers and merchants as well, can come out here and show their products, is a great need. But, first, more land, more land. Yesterday, with 48,000 people, the grounds were crowded.

"Other buildings are needed also," added the president. The great week has filled the state fair head with enthusiasm. The mammoth exhibits have been a real source of pardonable pride to him, and he wants a better, bigger fair.

"More such buildings as our model barn and model school are needed," he said.

"Yesterday Assemblyman C. E. Estabrook suggested to me that we build a model farmer's house, with model kitchen and a model system of ventilation. I had thought of that plan and I told him it met with my favor. I think it would be a good thing."

To Consider Land Purchase.

The purchase of additional land for the erection of racing stables and the building of the electric railway loop into the state fair grounds will be the subject before a meeting of the state fair board to be held in Milwaukee. The land to be purchased will undoubtedly be the so-called Flemming tract immediately adjoining the grounds on the east.

It was this ground that was meant when the appropriation was passed, and it was the only one mentioned in the arguments before the committee on claims, which approved the request for the money. It is the plan to erect the stables in such manner that forage and other stores can be taken in without having to haul the loads through the gates.

Complain Against Rates.

The Western Lime & Cement Company of Milwaukee has filed a complaint with the interstate commerce commission against the Milwaukee road on account of the rate on a shipment of lime from Sherwood to Hollandale. The complaint alleges that the rate was twice what it should have been.

The Menasha Woodenware Company has filed a complaint against the same road on account of the rate on a car of wooden pails shipped from Erie, Pa.

Meidinger Bros. complain of rates on a car of threshers shipped via the Milwaukee road from Racine Junction to Lemmon, S. D.

President Olin Resigns.

John M. Olin resigned as president of the Madison Park and Pleasure Drive association and member of the board of directors. The association was organized 17 years ago through the efforts of Mr. Olin and he has been president ever since. As the result of his zeal and energy and with the assistance of public-spirited citizens beautiful drives have been built and several parks established. Mr. Olin gave as reasons for his resignation that the work of the association has so increased that in justice to himself and his professional engagements he cannot continue longer as president.

Norwegian Pioneers in Reunion.

Norsemen and the members of their families to the number of several hundred were assembled in Stoughton taking part in the biennial meeting of the Norwegian Pioneer Association of America. C. J. Melaas of this city is president, J. J. Hopperstad of Decorah, Ia., is secretary and I. S. Kolhei of Cottonwood, Minn., is treasurer. The association was organized in Madison, Wis., in 1896, for social purposes and also to gather and preserve historical data of the early pioneers. Members must be of Norwegian blood or extraction, and have resided in America 40 years or more.

Feel Prosperity's Wave.

On account of the large number of rush orders, the Aluminum Goods Company are running the factory at Two Rivers until 8:15 evenings. A full force is employed in every department and the plant is taxed to its capacity. From present indications the plant will continue to run evenings the entire winter. All manufacturing plants are rushed with orders and labor of all kinds is scarce in this city.

Cannot Hold Office.

It became known that the state civil service commission refused to approve of the reappointment of any of the deputy game wardens who were present at the midnight conference at the home of State Game Warden Stone last winter when it was agreed to withhold certain facts from the senatorial investigation committee. The deputies in question were Kingsley, Johnson, Bowman, Tuttle, Richman and Brown.

Many Medals for Butter.

Making butter by hand in the good old-fashioned way down on the farm is not a process too obsolete to receive recognition in the national dairy show in Milwaukee on October 14 to 24. Marketing this product direct to a critical trade is the most profitable outlet available in many sections and this homely branch of the dairying industry is to be recognized for the first time, gold and silver medals and diplomas being awarded.

A number of conventions are to be held in conjunction with the show. Dates have been set as follows: October 18, International Milk Dealers' association, Official Dairy Instructors' association; October 19, National Association of Ice Cream Manufacturers, National Dairy union, Dairy Farmers' association; October 20, American Creamery Butter Makers' association, Cow Testers' association, National Creamery Butter Makers' association; October 21-22, National Creamery Butter Makers' association.

C. T. Graves, Maitland, Mo., has been selected to judge Jersey cattle on October 18, when awards also are to be made in the Holstein division.

Public Utilities Can Collect.

Public utilities are entitled to avail themselves of reasonable means to enforce payment of bills, either requiring cash deposits or securities in advance or by discontinuing service when bills are not paid as required by the rules of the company.

A decision to this effect was announced by the railroad commission in an action against the Wisconsin Telephone Company by one of its clients over the payment of a service bill.

ROAD AND FARM IMPROVEMENT

CLEVERLY BUILT ICE BOX

Refrigerator Which Keeps Milk, Butter and Other Perishable Goods Cool Without Ice.

By MILLER PURVIS.

While I was in California this summer I saw almost everywhere coolers or refrigerators which were used to keep milk sweet, butter firm, and to cool water, all this being done without the use of ice. I made one of these coolers myself and most of those I saw were made by local carpenters, although they are kept on sale in some of the towns.

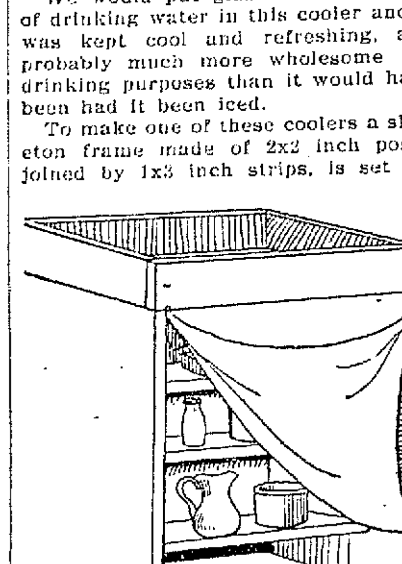

I am not an expert with tools and in the remote place where I happened to be tools were scarce, but with only a square, saw and hatchet I made the cooler and it worked just as well as any other one I ever saw.

We kept butter perfectly firm in it, and fresh meat cool and sweet. All sorts of stewed fruit was kept in it much longer than it would have kept outside, as the temperature was above 100 degrees for weeks at a time and went as high as 110 more than once.

The sketch shows the cooler with the front curtain back to show the shelves.

We would put glass fruit cans full of drinking water in this cooler and it was kept cool and refreshing, and probably much more wholesome for drinking purposes than it would have been had it been iced.

To make one of these coolers a skeleton frame made of 2x2 inch posts, joined by 1x3 inch strips, is set up.

Cooler Without Ice.

In this shelves are put at convenient distances apart and the four sides are covered with burlap. I used barley sacks for this purpose.

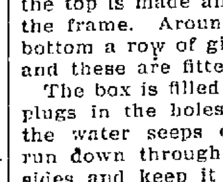

The cooler I made was three feet square. Ordinarily a water-tight box eight or ten inches deep the size of the top is made and set on the top of the frame. Around the box near the bottom a row of gimlet holes is bored and these are fitted with plugs.

The box is filled with water and the plugs in the holes are loosened until the water seeps out just enough to run down through the burlap on the sides and keep it wet all the time. The burlap on the front side is fastened to only one post, the top and the other side being kept in place by rings along the edge which are slipped over nails partly driven in.

This constitutes the door through which access is gained to the inside of the cooler. Once in a while I saw one with a skeleton door over which the burlap was stretched as screen wire would be over a screen door, but this was considered rather elaborate for most people.

PREVENT COW SPILLING FEED

Ordinary Candy Bucket May Be Employed to Stop Animal From Slobbering Feed.

Holds Feed.

Take an ordinary candy bucket and bore a hole in each side. To this fasten the halter in such a manner that the cow cannot lift her head out of the pail. After she starts to eat she cannot tip the pail over nor slobber her feed all over the floor.

HARM IN STAGNANT WATER

All Shallow Lots Should Be Drained and Kept Dry, and All Breeding Places Filled.

As pools of stagnant water, cisterns and neglected drains are breeding places for mosquitoes, Prof. Surface, the Pennsylvania state zoologist, recommends that all tanks of water, cisterns or vessels which hold water, or which might be filled with water after a rain, be covered or screened with a screen of at least 18 meshes of wire to the inch. Standing water on lots on commons should not be permitted. All shallow lots should be drained and kept dry, and post holes filled, old tin cans and bottles emptied, and all breeding places destroyed. All stable refuse should be removed at least every week. Where there are large natural bodies of water which cannot be drained, the surface should be disinfected and oiled with kerosene at frequent and regular intervals. Kerosene is invaluable in this connection, and it is also good as a disinfectant. Chloride of lime, or common copperas (sulphate of iron) can be thrown into cesspools.

Enemies of Bees.

The worst enemies of the bee are the foul brood and black brood. One or the other of these diseases are in some parts of the state, and black brood has been very bad in New York state. These diseases of bees have been carefully studied by the department in Washington, and we have some pretty definite information on the matter. The treatment for both is that of removing all the combs and starting the bees fresh, without any contaminated honey, in a new hive, and the use of the old combs for wax.

Poultry Raising Profitable.

The poultryman who is making a profit from his poultry will no doubt see the importance of making poultry raising an industry which he is proud of, and do all in his power to maintain and advance all lines of poultry raising. Poultry production in the United States has become one of the greatest industries in the world. In every section of the world chickens occupy the attention of many persons, some of whom are in the business for profit, others for pleasure.

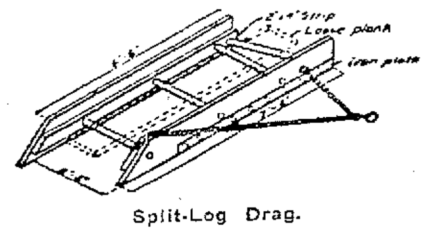

PROMOTE GOOD ROAD MAKING

Nobody Knows Better Than Farmer What a Valuable Asset to Community Good Road Is.

Good roads are simply a result of thorough drainage, and keeping the surface of the roadbed smooth and well packed. So keep all drain ditches open, and the road drag moving. Nothing comes so nearly filling all the requirements for maintaining a perfect roadbed as the simple drag.

Fill up all low places, and work the dirt toward the center of the road. Cut or trim all hedges bordering the highway, that the good effect of sun and wind may be applied. Do your full share of improving the road and try to persuade your neighbor that he should do the same, and the most gratifying results are certain.

As in most everything, it's the little items that combine to promote good road making. If there are some short, deep ruts between your place and

Split-Log Drag.

town how long would it take to throw a shovelful or two of dirt into these public nuisances? It would save you and your neighbor many a jerk and jolt, to say nothing of the wear and tear on horses, harness and vehicles.

Same way with the approaches to nine out of every ten bridges you bump over while driving to town. Patch those treacherous holes in the bridges, too. A horse's leg is easily broken in one of these wicked-looking holes.

Make it a rule to stop the team and throw at least a dozen rocks and pebbles out of the track into the ditch every time you drive to town. You get mighty tired of the jerking and jolting they give you. They also knock out your wagon and buggy tires more than most men think.

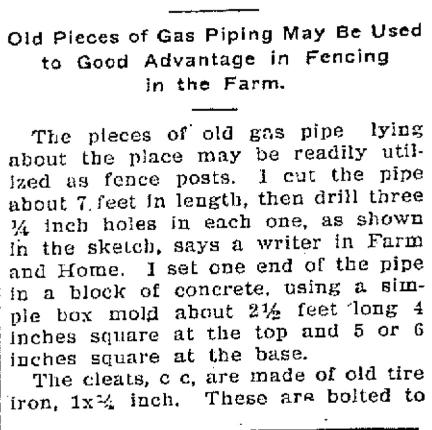

A diagram and illustration of a split-log grader is given herewith for the benefit of those interested in the construction and maintenance of good roads. Nobody knows better than the farmer what a valuable asset to a community a good road is.

UTILIZE PIPES FOR POSTS

Old Pieces of Gas Piping May Be Used to Good Advantage in Fencing in the Farm.

The pieces of old gas pipe lying about the place may be readily utilized as fence posts. I cut the pipe about 7 feet in length, then drill three ¼ inch holes in each one, as shown in the sketch, says a writer in Farm and Home. I set one end of the pipe in a block of concrete, using a simple box mold about 2½ feet long 4 inches square at the top and 5 or 6 inches square at the base.

The cleats, c c, are made of old tire iron, 1x¼ inch. These are bolted to

Working Plans.

the pipe at the two top holes. A block, b, is bolted to the bottom hole. Stringers are attached to the iron cleats. Pickets are nailed to the stringers and a foot board is fastened to the block, b.

VALUE OF POULTRY MANURE

How to Prepare Drippings from Grain-Fed Poultry for Enriching the Garden Soil.

The drippings from grain-fed poultry, sowed, is nearly equal in value to guano, says the Baltimore American. It should be beaten fine and carefully sifted. The most economical and best method is to mix it with twice its bulk of fine, sifted woods' earth, or good rich soil from an old pasture, turn it over two or three times with the shovel, sprinkle as it is being turned with just enough water to dampen the mass, then throw up into a compact, conical heap, and let stand until fermentation sets in; it should be turned over once more when it is ready to use; the fermentation makes it available for quick action. The compost may be used in the hill for corn, cabbage and tomatoes; it may also be spread round the plants and worked into the ground with the hoe. It should be mixed with the earth before dropping the seed. It all depends upon how the hens are fed as to the value of the drippings.

FARM AND GARDEN NOTES.

It is better to sow rutabaga turnips in rows than broadcast.

Apple culture in Texas should be developed more assiduously.

Rotation must be practiced in the garden or truck field to obtain the best results.

Black Winter or Spanish radishes should be sown in August or September with turnips.

He who lets the weeds go to seed this month is storing up for himself infinite trouble next year.

It has been said that "weeds are the devil's flower." Certain it is that they play the mischief with a crop.

For best results in the vineyard plenty of water is necessary. During the hot season sub-irrigation is advisable.

A fall crop of potatoes will be found profitable, if the grower has kept his land in good tilth during the summer.

The eighth annual convention of the National Nut Growers' association will be held at Albany, Ga., October 12, 13 and 14, 1909.

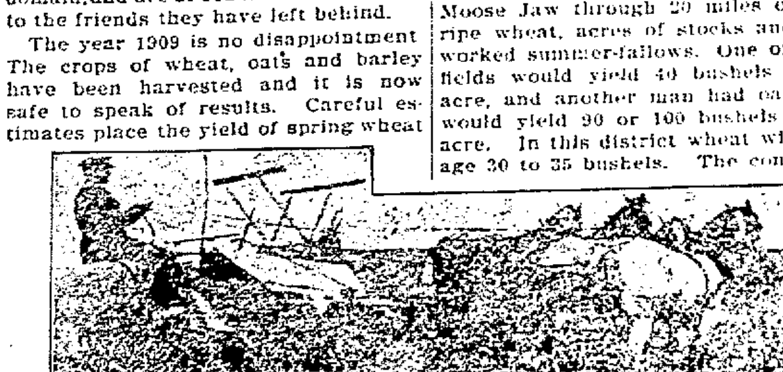

All decaying cabbage should be dug up and destroyed. Black rot and other fungus diseases and insect pests will thus be held back.

All rubbish should be removed from the garden before it is plowed. Debris of any sort is annoying and interferes with cultivation.

WESTERN CANADA

During the early days in the period of the growth of the grain crop in Western Canada, as well as throughout the ripening and garnering period, there is yearly growing an increasing interest throughout the United States as to the results when harvest is completed. These mean much to the thousands of Americans who have made their homes in some of the three Provinces that form that vast agricultural domain, and are of considerable interest to the friends they have left behind.

The year 1909 is no disappointment. The crops of wheat, oats and barley have been harvested and it is now safe to speak of results. Careful estimates place the yield of spring wheat

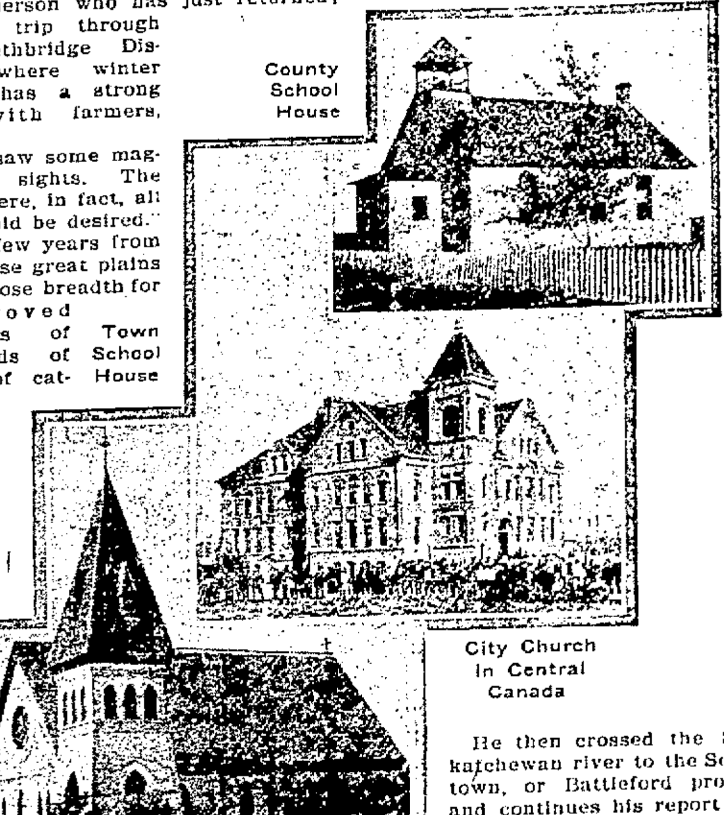

A Central Canada Farmer Finishing Cutting His 70-Acre Field of Wheat

at 30 bushels per acre, winter wheat at over 40 bushels, and oats exceed 50 bushels per acre. Barley also has proved an abundant yield. What will attract the reading public more than volumes of figures will be the fact that those who have been induced through the influence of the Government to accept of 160 acres of free grant land; or, by the persuasion of friends to leave their home State of Dakota, Minnesota, Iowa, Illinois, Michigan, Indiana, Ohio, Nebraska or the other States from which people have gone, have done well. Financially, they are in a better position than many of them ever expected to be, and in the matter of health, in social conditions, they have lost nothing.

One person who has just returned from a trip through the Lethbridge District, where winter wheat has a strong hold with farmers, says:

"We saw some magnificent sights. The crops were, in fact, all that could be desired."

In a few years from now these great plains over whose breadth for years roved hundreds of thousands of herds of cattle, following the millions of buffalo that once grazed their grasses, will be a solid grain field covering a territory of over 30,000 square miles, and very little of it but what will yet be worth from $40 to $60 per acre. Already the homestead and pre-emption lands are being well filled.

City Church in Central Canada

In the district of Calgary, south, east and north, which comprises Nanton, High River and other equally important districts, a correspondent of the Winnipeg (Manitoba) Free Press says: (Aug. 21) "The grain in this district is going to make some money for the farmers this year. All the crop is now crowding along and is good on both irrigated and unirrigated lands."

There are to be found those who speak of a "pioneering" life in western Canada, but as one man said, "If this is pioneering I don't for the life of me see what our forefathers had to complain of." He didn't know, though, for the pioneering of his forefathers was discomfort and hardship. The opening up and development of western Canada, with its railroad lines to carry one to almost the uttermost part of it, the telegraph line to flash the news to the outside world, the telephone to talk to one's neighbor, the daily and weekly mail service which brings and carries letters to the friends in distant parts; the schools headed by college-bred and highly certificated teachers; the churches manned by brilliant divines; the clubs; the social and festive life; what is there about any of this to give to the man who goes there to make his home the credit of being a pioneer? Nothing! He might as well be in any of the old middle-west States. In other parts of the world the production of wheat is diminishing today; but as it diminishes Canada's will increase; therefore, it is safe to predict that in a few years from now a large part of the world will be looking to western Canada for its wheat supply, and especially will the United States. In many parts of western Canada it is possible to have a hundred-mile square of wheat, without a break. A writer says: "We were driven west and north of Moose Jaw through 20 miles of dead ripe wheat, acres of stooks and well-worked summer-fallows. One of these fields would yield 40 bushels to the acre, and another man had oats that would yield 90 or 100 bushels to the acre. In this district wheat will average 30 to 35 bushels. The conditions were never better and throughout the district the people are assured of a most prosperous year."

It would be unfair to close this article without quoting from an expert crop-correspondent regarding the two Battlefords in Central Saskatchewan, on the line of the Canadian Northern Railway. Writing on August 18th of this year, he says:

"It is necessary to drive about six or seven miles out of the town of North Battleford in order to see the best crops of the district. This morning I was driven about 20 miles to the north and west of the town and in all the drive did not see a poor crop. I saw one wheat crop which the owner estimates will yield 40 bushels per acre, and I believe it."

He then crossed the Saskatchewan river to the South town, or Battleford proper, and continues his report:

"Conditions around the old town are as good if not better than those to the north of the river. This district has much the best wheat crop prospect of any I have inspected this year, considering sample and yield. The weather conditions for the whole season have been ideal and the result is what might easily be termed a bumper crop. A sample sheaf brought in from the farm of George Truscott was shown to me which spoke for itself. This farmer is said to have sixty acres which will yield 45 bushels per acre.

In stating an average for the district of South Battleford I would say that the wheat will yield 36 bushels per acre. The oats will yield about 45 and barley 35 bushels per acre."

A correspondent summing up a trip over the Canadian Northern Railway, from Dauphin to Battleford, says:

"As I inspected the crops in the various districts I found the farmers and other citizens without exception filled with expectant enthusiasm over this year's prospects. No district was found which could not boast of fields of 35 bushels per acre wheat, or 50 to 60 bushels per acre oats, and of 40 bushels per acre of barley.'

It is not an unusual thing in many parts of western Canada for a farmer to have 10,000 to 30,000 bushels of wheat. In the Rouleau district it is said that there are several farmers who will have 20,000 bushels of oats any many fields will return one hundred bushels to the acre.

It takes an army of men to handle the Western Canada crop, and it is estimated that 30,000 people have been brought in this year to assist in the great undertaking; there being excursions from the outside world nearly every day for the past six weeks.

A Specimen Group of Elevators That May Be Seen in Many Towns in Central Canada

Too Rapid.

She—Why do you call your chauffeur a leaky vessel? Does he gossip about the fun you have on your motoring parties?

He—No; but I am always bailing the fellow out.

A Contrary Course.

"Here's Jimmy's doctor said he must get away from business and have more fresh air."

"Well?"

"How is he going to get fresh air in a salt sea trip?"

Thrifty.

Stella—Are they economical?

Bella—Yes; they eloped to save the cost of a wedding and are living happily to save the cost of a divorce.

Heavy Contributors.

Professor—Name two of America's most prolific writers.

Freshman—Pro Bono Publico and Constant Reader.—Lippincott's.

The gladness of young people should be encouraged far beyond the point of youth into the shade of mellower days.—Florida Times-Union.

Big Price for an Orchid.

Three hundred dollars was recently paid in Colombia for a single plant of a rare orchid. The natives, in order to expedite the collection of these orchids, fell the trees on which they grow, and then strip them of these floral parasites.

Reassurance.

"Look here! Didn't I tell you not to come around here begging again?"

"Yes'm; but I thought dat I'd drop around an' ask you if you really meant it."

A Northern Light.

Press Agent—How shall I write up the chief actor in the north pole expedition drama?

Manager—Of course, as a polar star.

The Sand Artist.

Knicker—Can he do sand sculpturing?

Bocker—Yes, he cut out several fellows at the beach.

Europe has 20,000 newspapers, of which Germany possesses the largest number. England, however, has the greatest number of daily newspapers.

FALL PAINTING.

The majority of property owners are under the impression that spring time is the only painting time. But the fall of the year offers several advantages to the painter. One of the most important is that surfaces are almost sure to be dry, and there is no frost or inner moisture to work out after the paint is applied.

Pure white lead—the Dutch Boy Painter kind—mixed with pure linseed oil (tinted as desired) gives a winter coat to a building that is an armor against the severest attacks of the winter rain, sleet, winds and snow.

National Lead Company, 1902 Trinity Bldg., New York city, makers of pure white lead, Dutch Boy Painter trademark, are offering to those interested a complete painter's outfit, consisting of a blow pipe and lead tester, book of color schemes, etc. State whether you want exterior or interior decorating.

MISSED IT.

Aunt—Well, Johnny, I suppose you had a nice sojourn in the country?

Johnny—I'm, well, I had lots of nice apples an' peaches an' watermelons an' things, but I guess them sojourn things wasn't ripe yet.

$100 Reward, $100.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

Address F. J. CHENEY & CO., Toledo, O.

Sold by all Druggists, 75c.

Take Hall's Family Pills for constipation.

Standard Oil Walls.

The Standard Oil Company's real estate holdings in Bayonne, N. J., where its largest oil refining plant in the east is situated, have been increased from $7,360,000, the value fixed upon them in 1908 for taxation, to $13,000,000. The company is appealing against the increases fixed upon the realty by the Hudson county board of equalization.

Big Berlin Philanthropy.

More than 50,000 children were enabled by the authorities of Berlin to spend this summer on land within easy reach of the city limits. They were assigned plots where they could play and cultivate gardens profitably with the help of their families and the advice of public instructors.

Mrs. Winslow's Soothing Syrup.
For children teething, softens the gums, reduces inflammation, allays pain, cures wind colic. 25c a bottle.

BIRON

Mrs. St Louis who is visiting at the Edgar Kellogg home, left Sunday morning for your city with friend.

Mr. and Mrs. Ed Watts of your city, spent Sunday in the city with the latter's parents.

Mr. and Mrs. A. L. Akey and son Jeffrey, and Mr. and Mrs. Joel De Mars and children attended the Lee well party given in honor of the Bat Sharkey family by Rudolph on Monday night. A most enjoyable time is reported.

Miss Edith Rae spent Sunday with her parents at the south side.

The Ladies of the Baptist church were entertained by Mrs. Willmott one day last week.

The reports are that Mr. and Mrs. J. T. Herron, who have had charge of the hotel here for some time past are going to leave in the near future. We are all sorry to hear such news for Mr. and Mrs. Herron have made the best kind of a neighbor and have a host of friends in this vicinity.

George Bates, Jr., spent Sunday at Rudolph with his parents and friends.

Mr. and Mrs. Edgar Kellogg and Mrs. St Louis attended the Herman Kellogg wedding in your city last Wednesday.

Mr. and Mrs. Art Sweeney are the proud owner of a baby girl born last Sunday.

Mr. and Mrs. Chas. Kellogg and Mrs. P. L. Fowler of your city, Sundayed in the burg with Mr. and Mrs. Edgar Kellogg.

Mrs. Archie Sharrett and children Bernice and Ruby, and Mrs. Will Harroun spent Sunday at Merhan.

Mr. and Mrs. Emil Hahn of your city were guests of friends in this burg Sunday.

FOURTEEN MILE CREEK

The Baptist Aid society met with Mrs. Axon Davidson on Wednesday.

Nye Rouse, mother and sister attended the Friendship fair Thursday.

Ben Griffith was a guest at the L. Jero home Sunday.

George Nelson and wife attended the Friendship fair and on their way home they stayed all night with Mrs. L. Jero and family.

Hilo Brown and family visited at the Dave Ramsey home at Saratoga on Saturday and Sunday.

Miss Flossie Manlove of Wild Rose is here visiting with old friends and neighbors.

Eugene Phelps and wife went to Grand Marsh Wednesday to visit at the Millar home for a few days.

Albert Jero and family went to Friendship Tuesday to take in the three days of fair.

We hear the laundry whistle of J. D. Spear's engine in this neighborhood again.

A Trotting Steer.

Stevens Point Journal: A good many freak pleasure crafts have appeared from time to time in Stevens Point's streets but George Roe of Saratoga, rather took the head prize when he appeared on the street today with a small white steer attached to a stylish runabout carriage. It was not only an unusual outfit but an exceptional steer. He was driven by lines and could do a trotting stunt that was quite remarkable for its speed and graceful movement. This party has two of the little white oxen. They are thoroughly broken and trained and are very docile and responsive. They will carry a man on their backs like a pony.

Grand Rapids Boy Gets a Saloon Lemon.

Marshfield News:—Herman Voight whose home is at Grand Rapids had a rather queer experience at Chippewa Falls last week. He was returning from the Dakota harvest fields and had with him $80 of his earnings. On his way back he fell in with another young man who proposed to let him in on a saloon deal as part owner for the $80. Voight very foolishly gave him the money. The saloon was to be located on one of the principal streets of Chippewa Falls. Voight wanted to see the place of business but was put off from day to day until he got suspicious. With the help of the district attorney and the police the confidence man was located and arrested. After considerable trouble Voight got $43 of his money back.

Hurt by a Corn Cutter.

John Tammor, who lives near Arpin came to the city on Tuesday morning with a badly lacerated hand, which was caught in the knives of a corn cutter while in motion. It is expected that he will be able to save the hand, although some of the fingers will probably be stiff.

PITTSVILLE.

(From the Record.)

George Shlegel met a violent and almost shocking death in his father's grist mill in this city Saturday last at about 9 o'clock in the forenoon. He had been caught in the shafting of the machinery in the basement of the mill and mangled beyond recognition. The young man had gone into the basement of the mill to put a belt on a pulley. The machinery was so constructed that he was obliged to lean over the shaft to put on the belt. There is much conjecture as to how he became entangled in the belt, but the most plausible theory is that the belt was thrown by the rapidly revolving pulley over the young man's head and that he had not time to loosen himself before it had wound up on the shaft drawing him with it in its revolutions. When found he was still on the belt, one leg wound about it several times, which accounted for the terrible fractures of that member. The head and upper part of the body were making the furious circuit, striking above against the woodwork of the mill and below into the ground, breaking and shivering the woodwork and making an excavation in the old earth below of fully eight inches. George Schlegel was a few months under seventeen years of age, born at Fort Scott, Kansas, and has lived a Pittsville with his family for the past eight years. He was of an unassuming nature, admired and respected by all and the bereaved family have the sympathy of all in this most trying ordeal.

Emma Turkalske and Geo. Whitrock, of the town of Sigel, were married at the home of the bride's parents, Mr. and Mrs. John Turkalske yesterday, the 22nd inst., at the Turkalske homestead near here. The young couple will live in the Town of Sigel where the groom has a farm. The young people have the good wishes of all.

A pleasant surprise was tendered Mr. and Mrs. J. C. Kuntz Monday evening, the occasion being the 10th anniversary of their wedded life. An enjoyable evening was had and good things to eat.

RUDOLPH.

Dr. Jackson is in Berlin attending the Berlin fair.

Mrs. Eleanor Taylor is visiting in LaCrosse.

Frank Wortman and son and Nic Ratelle were among those from here who attended the state fair.

Frank Wachman and John Osalesky were called to Milwaukee last week by a telegram stating that brother-in-law was seriously ill. When they arrived there they found that it was a joke played on them by one of their relatives, as they found their brother-in-law well and enjoying a glass of beer on their arrival. They took the joke all right and visited several days among relatives before their return home.

Martin Hilgers reports an unusually fine crop of potatoes.

Mrs. Chas. Martin and children have been the guests of Mr. and Mrs. Aug. Jacoby.

Jasper Crotteau, Ed Bransdott and John Bates took an auto ride in Grand Rapids on Saturday.

Ed Shurkey is entertaining his brother-in-law and wife from Morris, Minn.

John Reinhart sold over 100 sheep to the Rudolph Packing Co. on Monday.

Dan Rezin sold almost his entire flock of sheep to the Rudolph Packing Co. on Monday, and Moses Barr sold his flock.

Ernest Wilki, who recently purchased the Corner farm, took possession the past week.

Fred Ott purchased the Geo. Riley home near the Green Bay depot the past week, consisting of a house, barn and two lots. The place was formerly owned by Wm. Love.

Mrs. L. Barber of Milwaukee arrived here to attend the Sharkey-Berard wedding.

John K. Blonien of Fond du Lac closed the deal for the Bat Sharkey farm on Monday. Consideration $6000. Mr. Blonien is a practical farmer and will take possession Oct. 1st. Mr. and Mrs. Bat Sharkey will leave within a week for Watrskan, Alberta, Canada, to make their home.

John Frilchie purchased an eighty of H. Wupperman which already joins Mr. Frilchie's farm.

Dr. Abernethy, the great English physician, said, "Watch your kidneys. When they are affected, life is in danger." Foley's Kidney Remedy makes healthy kidneys, corrects urinary irregularities, and tones up the whole system. John E. Daly and Johnson & Hill Co.

ONE WEAK SPOT.

Most Grand Rapids People Have a Weak Spot and Too Often It's the Back.

Everyone has a weak spot.
Too often it's a bad back.
Twinges follow every sudden twist.
Dull aching keeps up day and night.
Tells you the kidneys need help—
For backache is really kidney ache.
A kidney cure is what you need.
Doan's Kidney Pills cure sick kidneys.
Cure backaches and urinary ills.
Good proof in the following statement.

Charles H. Curtis, 741 Church St., Stevens Point, Wis., says: "I suffered terribly from a pain in the small of my back and at times could hardly dress myself in the morning on account of the trouble. I hardly know what was the matter, but finally decided that my kidneys were disordered. I then procured a box of Doan's Kidney Pills and began their use. This remedy acted promptly and I have no hesitation in saying that it is one of great effectiveness in cases of kidney trouble."

For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, New York, sole agents for the United States.

Remember the name—Doan's—and take no other.

Warning.

Do not be persuaded into taking anything but Foley's Honey and Tar for chronic coughs, bronchitis, hay fever, asthma, and lung trouble, as it stops the cough and heals the lungs. John E. Daly and Johnson & Hill Co.

SIGEL

There was a large crowd at Carlson's auction Friday. The Carlson people will move to Altoona to reside.

Mrs. E. Martinson is reported as getting better.

Walter Larson who was here to attend the funeral of his sister, returned to his work at Minneapolis on Wednesday.

Those from out of town who attended the funeral here last week, were, Messrs. Edstrom, Jenson, and Gust Lundgren and wives, John Lundgren and Ed Brantdt of Rudolph, Mr. and Mrs. Axle Anderson and Mrs. And. Anderson of Port Edwards, and Mr. and Mrs. Quist of Milladore.

Edgar Wortland has returned to Almond after spending a few days in our burg.

Misses Borden and Floy Berg called on Grand Rapids friends over Saturday.

Misses Mary and Jennie Lundberg returned to Chicago last week to resume their duties there after enjoying a three weeks vacation under their parental roof.

Sven Holberg, Gust Ogren and Martin Prince are doing mason work at the Rapids.

Ole Holstrum left on Friday night for Minnesota, where he will be employed the coming winter.

Miss Polly Bushmaker is employed at the Rapids.

There was a large crowd in attendance at the dance held at the Budde home Sunday night.

Miss Anna Bushmaker departed Sunday night for Junction City, where she will be employed.

Hilmor Holberg, Oscar Nelson, Alex Pearson, Charley and Herman Peterson returned from Merrill on Thursday, after having been employed there the past summer.

Mr. Wilson departed last week for Chicago, after spending the summer here.

Jens Larson leaves next week for Eau Claire where he will be engaged for some time building a new house on the Carlson Bros. farm, who are intending to move up there.

Mr. and Mrs. J. Kacoja and family of Milwaukee returned to their home on Monday after a weeks visit here with the Brostowitz families. Mr. Kacoja is on the police force at Milwaukee.

Mrs. K. Blockwitz returned to her home in Milwaukee on Monday after a visit at the Peter Brostowitz home.

Jim Blockwitz and family of Minneapolis are visiting at the Peter Brostowitz and Peter Schoutz home.

Mr. and Mrs. Joe Klappa and children of Biron spent Sunday at the L. Perch home.

Misses Berdena Berg, Tillie Carlson, Floy Berg, Ida Nordstrum and Hannah Kronholm were Sunday guests of Miss Hulda Holstrom.

Y. P. S. meets with Mr. and Mrs. A. Newman on Friday night. All are cordially invited.

Miss Anna Walters and a friend of Grand Rapids spent Sunday at the Walters home.

Misses Hannah Kronholm and Ida Nordstrum were Rudolph shoppers on Saturday.

Mr. Lindquist and family of Rockford, Ill., have taken possession of the Carlson farm.

Chas. Carlson left on Tuesday for Altoona.

Eric Granstedt and Leander Nordstrum spent Sunday here.

George Bushmaker of Junction City spent Sunday with relatives here.

Carl Holstrom intends to leave for Minneapolis in the near future.

Edwin Berg spent Tuesday at the Rapids on business.

Many people delude themselves by saying "it will wear away," when they notice symptoms of kidney and bladder trouble. This is a mistake. Take Foley's Kidney Remedy, and stop the drain on the vitality. It cures backache, rheumatism, kidney and bladder trouble, and makes every trace of pain, weakness, and urinary trouble disappear. John E. Daly and Johnson & Hill Co.

NEKOOSA.

(From the Times.)

Farmers in this region express themselves as quite satisfied with the corn crop this year—that is, most of the farmers are getting more corn than they expected, but the weather was too dry for a good potato yield. Early potatoes yielded well, and the late varieties, planted early, were a satisfactory crop, but the late ones, planted the latter part of June are small and few in a hill, especially on the high ground where it will hardly pay to dig them. Those on the low ground are of fair size.

James B. Nash of this city has been appointed assistant manager of the Nekoosa Edwards Paper Co.'s manufacturing department, which places him in charge of the three mills at Nekoosa and Port Edwards. Mr. Nash has had charge of the Nekoosa plant for several years and it is in proper recognition of his ability that he has been singled out as the man to place in the position as manager of all three mills as assistant to C. F. Steele, the general manager.

Miss Anna Edwards and Mr. Frank Zeller were united in marriage at St. Michael's Catholic church at Junction City on Tuesday, September 11, attended by the Misses Sophie Kane and Nettie Sokloske and Messrs. Emmett Cahill and Jesse Lapene. The bride is a daughter of Mr. and Mrs. Chas. Edwards of this city, the groom's parents being Mr. and Mrs. Frank Zeller of Junction City, where the wedding reception was held.

A. F. Zurfluh has added a wholesale liquor business at the Palace saloon and John Sinumat has been rewarded the contract to build an addition to the west side of the present building, two stories high and the full length to the old building.

Dr. Geo. Pomainville was at Milwaukee hospital on Thursday and Friday where he had an operation on his arm which he injured some time ago.

"Can be depended upon" is an expression we all like to hear, and when it is used in connection with Chamberlain's Colic, Cholera and Diarrhoea Remedy it means that it never fails to cure diarrhoea, dysentery or bowel complaints. It is pleasant to take and equally valuable for children and adults. Sold by all dealers.

Farmers, A Bargain.

240 acres good clay soil, new buildings, good pasture fenced in, close neighbors, 3 miles to town, 20 miles from Grand Rapids. Will also sell at bargain prices five one and two seated spring wagons, one two-horse delivery wagon, one good second hand spring wagon, one nearly new steel tired top buggy.

We are not going to leave, we are here to stay and guarantee all work. We want your repairing and painting. We sell buggy tops, buggy cushions, curtains, etc., It will pay you to patronize us, we have up-to-date facilities and our prices will please you.

Ordinance No. 138.

An Ordinance Directing The Issue Of Funding Of General City Indebtedness Bonds Of The City Of Grand Rapids Wisconsin To The Amount Of $30,000, And Providing For The Payment Thereof.

The common council of the city of Grand Rapids, Wisconsin, do ordain as follows:

SECTION 1. That the funding of general city indebtedness bonds of the city of Grand Rapids, Wisconsin, to the amount of $30,000 duly authorized by section 925-133 of the Wisconsin statutes shall be issued in denominations of $1,000 each, except the last bond of this series which shall be for the sum of $21,000 all under date of September 15, 1909, and the interest shall be evidenced by semi annual interest coupons of $20.00 each payable on the 15th day of September and the 15th day of March of each year. Both principal and interest of the said bonds shall be made payable at the office of the city treasurer in the city of Grand Rapids, Wood County, Wisconsin, and at the option of the holder in exchange on Milwaukee, Chicago or New York.

SECTION 2. The said bonds and interest coupons shall be substantially of the following form subject to the necessary variations as to numbers, maturities, etc.

STATE OF WISCONSIN.
County of Wood.

No. 1 $1,000

CITY OF GRAND RAPIDS.

Funding of general city indebtedness bonds.

KNOW ALL MEN BY THESE PRESENTS, That the city of Grand Rapids Wood County, Wisconsin, is justly indebted and for value received hereby promises to pay to the bearer on the 15th day of February, 1920, the principal sum of $1,000 with interest thereon at the rate of four per cent per annum, payable semi annually on the 15th days of March and September as evidenced by and on the presentation and surrender of the annexed interest coupons as they severally become due. Both principal and interest hereof are payable at the office of the city treasurer in the city of Grand Rapids, Wood County, Wisconsin, and at the option of the holder in exchange on Milwaukee, Chicago or New York.

This bond is one of a series of ten bonds of the same date and amount aggregating $30,000 issued for the purpose of funding the general city indebtedness of the said city of Grand Rapids.

It is hereby recited and certified that the issue hereof is duly authorized by section 925-133 of the Wisconsin statutes and by a three fourths vote of all the members of the common council elect at a regular meeting after due publication of the proposal ordinance authorizing the same in the official paper of said city; that legal provision has been made for the levy and collection of an annual tax sufficient to meet the payment of the interest and principal hereof as the same becomes due; that all acts, conditions and things required or proper to be done precedent to or in the issuance of this bond have been legally had, done and performed, and that the amount of this bond together with all the other indebtedness of said city of Grand Rapids does not exceed any statutory, constitutional, or other legal limitation thereon. For the payment of principal and interest hereof the full faith, credit and resources of the said city are hereby irrevocably pledged.

In witness whereof the said city of Grand Rapids has caused this bond to be signed by its Mayor and Clerk under its corporate seal and the interest coupons hereto attached to be signed with the lithograph signature of said clerk as of the date of the 15th day of September, 1909.

Clerk. Mayor.

COUPON NO. ONE. $20.00

No. 1

On March 15, 1910, the city of Grand Rapids, Wisconsin, will pay to the bearer at the office of the city treasurer of said city and at the option of the holder in exchange on Milwaukee, Chicago or New York, the sum of $20.00 for interest on the indebtedness bond, dated Sept. 15th, 1909, and numbered Bond.

Clerk.

Bond No. 1 shall be payable on March 15, 1920.

Bond No. 2 shall be payable on March 15, 1921.

Bond No. 3 shall be payable on March 15, 1922.

Bond No. 4 shall be payable on March 15, 1923.

Bond No. 5 shall be payable on March 15, 1924.

Bond No. 6 shall be payable on March 15, 1925.

Bond No. 7 shall be payable on March 15, 1926.

Bond No. 8 shall be payable on March 15, 1927.

Bond No. 9 shall be payable on March 15, 1928.

Bond No. 10 shall be for the sum of $21,000 payable on March 15, 1929.

Section 3. There is hereby authorized and directed to be levied on all the taxable property of the said city of Grand Rapids for the year 1909 and each and every year thereafter while said bonds or any portion thereof are outstanding and unpaid a sufficient annual tax to provide for and meet the payment of the interest and principal of the said bonds as and when the same become due and payable and it is hereby made the duty of the proper officers each year to make the levy and collection of the said taxes sufficient in amount for such purposes and to apply the said taxes to the payment of the interest and principal of the said bonds in the manner authorized.

Section 4. This ordinance shall take effect and be in full force from and after its passage and publication.

FRANK POMAINVILLE,
Mayor.

Passed, adopted and approved by a vote of ¾ of all the members of the common council elect at a regular meeting held on the 7th day of September, 1909.

Attest:

C. E. BOLES,
City Clerk.

Testifies After Four Years.

Carlisle Center, N. Y., G. B. Burhans, writes: "About four years ago I wrote you that I had been entirely cured of kidney trouble by taking two bottles of Foley's Kidney Remedy, and after four years I am again pleased to state that I have never had any return of those symptoms, and I am evidently cured to stay cured." Foley's Kidney Remedy will do the same for you. John E. Daly and Johnson & Hill Co.

A. W. Rich, Plaintiff,
vs.
S. W. Finkelstein and Mrs. S. W. Finkelstein, his wife, Defendants.

Notice is hereby given that by virtue of and pursuant to a judgment of foreclosure and sale duly rendered in the above entitled action in the circuit court for said county on the 31st day of August, 1909, in favor of the above named plaintiff, and against the above named defendants therein (more than one year having elapsed since said entry and no part of such judgment having been paid), Michael Griffin, as Sheriff of said County of Wood, will on the 13th day of November, A. D. 1909, at 10 o'clock in the forenoon of that day at the front door of the Court House in the City of Grand Rapids, in said Wood County, offer for sale and sell at auction to the highest bidder for cash all the following premises described in said judgment, to wit:

The Northwest quarter of the Southwest quarter of Section Seventeen (17), Township Twenty-one (21) North, of Range Six (6) East, in Wood County, Wisconsin.

Dated September 22, 1909.

Michael Griffin,
Sheriff of Wood County, Wisconsin.

Goggins, Brazeau & Briere,
Plaintiff's Attorneys,
Grand Rapids, Wisconsin.

Sept. 22 Oct. 6

State of Wisconsin, Wood County, In County Court.

In the matter of the last will and testament of James Roulhac, deceased.

On reading and filing the petition of Paul Krall, representing that James Roulhac, deceased, in his lifetime, by his contract in writing, agreed to sell and convey to the petitioner certain land and real estate therein described upon the terms and conditions therein stated, and showing that he has made certain payments thereon in accordance with said contract, and praying that the executor of the will of said James Roulhac, deceased, be authorized and directed to execute a conveyance to him the said lands.

It is ordered that said petition be heard at a special term of this court to be held at the court house in the city of Grand Rapids on the 15th day of October on the opening of court of said day or as soon thereafter as counsel can be heard.

It is further ordered that notice of such hearing be given to all persons interested by the publication of a copy of this order for three weeks prior to the day of such hearing in the Grand Rapids Tribune, a weekly newspaper published in said County.

Dated September 22, 1909.

By the Court,
W. J. Conway,
County Judge.

Sept. 8 October 20

State of Wisconsin, Wood County In Circuit Court.

Parkinson-Marling Lumber Company, a Wisconsin Corporation, Plaintiff,
vs.
Henry Peterson and Anna M. Peterson, his sister, Defendants.

Summons

The State of Wisconsin to the said Defendants:

You are hereby summoned to appear within twenty days after the service of this summons, exclusive of the day of service, and defend the above entitled action in the court aforesaid; and in case of your failure so to do judgment will be rendered against you according to the demands of the complaint, of which a copy is herewith served upon you. This action is brought to foreclose a mechanics lien.

Dated this 25th day of August, A. D. 1909.

W. E. Wheelan,
Plaintiff's Attorney.

P. O. Address, 101 South Second St.,
Grand Rapids, Wood County, Wisconsin.

Sept. 8 October 20

BIRON

Mrs St. Louis, who is visiting at the Edgar Kellogg home, spent Sunday in your city with friends.

Mr. and Mrs. Ed. Witte of your city, spent Sunday in this burg with the latter's parents.

Mr. and Mrs. A. L. Akey and son Jeffrey, and Mr. and Mrs. Jeff DeMars and children attended the farewell party given in honor of the Eat Sharkey family at Rudolph Saturday night. A most enjoyable time is reported.

Miss Edith Rae spent Sunday with her parents at the south side.

The ladies of the Baptist church were entertained by Mrs. Willmott one day last week.

The reports are that Mr. and Mrs. J. T. Herron, who have had charge of the hotel here for some time past, are going to leave in the near future. We are all sorry to hear such news for Mr. and Mrs. Herron have made the best kind of a neighbor and have a host of friends in this vicinity.

George Bates, Jr., spent Sunday at Rudolph with his parents and friends.

Mr. and Mrs. Edgar Kellogg and Mrs. St. Louis attended the Hannon-Kellogg wedding in your city last Wednesday.

Mr. and Mrs. Art Sweeney are the proud owners of a baby girl born last Sunday.

Mr. and Mrs. Chas. Kellogg and Mrs. F. L. Fancher of your city, Sundayed in this burg with Mr. and Mrs. Edgar Kellogg.

Mrs. Archie Shearier and children, Bernice and Ruby, and Mrs. Will Harroun spent Sunday at Meehan.

Mr. and Mrs. Emil Hahn of your city were guests of friends in this burg Sunday.

FOURTEEN MILE CREEK

The Baptist Aid society met with Mrs. Aron Davidson on Wednesday.

Nye Rouse, mother and sister attended the Friendship fair Thursday.

Ron Griffith was a guest at the L. Joro home Sunday.

George Helser and wife attended the Friendship fair and on their way home they stayed all night with Mrs. L. Joro and family.

Hile Brown and family visited at the Dave Ramsay home at Saratoga on Saturday and Sunday.

Miss Flossie Maulnix of Wild Rose is here visiting with old friends and neighbors.

Eugene Phelps and wife went to Grand Marsh Wednesday to visit at the Miller home for a few days.

Albert Joro and family went to Friendship Tuesday to take in the three days of fair.

We hear the familiar whistle of J. D. Spear's engine in this neighborhood again.

A Trotting Steer.

Stevens Point Journal:—A good many freak pleasure crafts have appeared from time to time in Stevens Point's streets but George Ree of Saratoga, rather took the head prize when he appeared on the street today with a small white steer attached to a stylish runabout carriage. It was not only an unusual outfit but an exceptional steer. He was driven by lines and could do a trotting stunt that was quite remarkable for its speed and graceful movement. This party has two of the little white oxen. They are thoroughly broken and trained and are very docile and responsive. They will carry a man on their backs like a pony.

ADVERTISED LETTERS.

Ladies:—Behl, Miss Minnie, card; Devons, Mrs. Lena; Gorham, Miss Grace; Hewitt, Mrs. Lydia; Hirsch, Miss Clara, card; La Maire, Miss Pearl, card; Mailek, Helena; Marvin, Mrs. Kitty; Moorce, Miss L., card; Spencer, Miss E., card; Tansoy, Mrs. Jamie, card.

Gentlemen:—Annas, Wm.; Banger, Will O.; DeMars, Oliver, card; Dognory, Odillorn, card; Douglas, T. B. card; Farmer, W. Sr., card,; Gordon, Moris, card; Heller, John G., card; Hunter, V. J., card; Keys, C. W., card; Kuishek, P. card; Smith, S. card.

Grand Rapids Boy Gets a Saloon Lemon.

Marshfield News:—Herman Voight whose home is at Grand Rapids had a rather queer experience at Chippewa Falls last week. He was returning from the Dakota harvest fields and had with him $41 of his earnings. On his way back he fell in with another young man who proposed to let him in on a saloon deal as part owner for the $41. Voight very foolishly gave him the money. The saloon was to be located on one of the principal streets of Chippewa Falls. Voight wanted to see the place of business but was put off from day to day until he got suspicious. With the help of the district attorney and the police the confidence man was located and arrested. After considerable trouble Voight got $13 of his money back.

Hurt by a Corn Cutter.

John Tummer, who lives near Arpin came to the city on Tuesday morning with a badly lacerated hand, which was caught in the knives of a corn cutter while in motion. It is expected that he will be able to save the hand, although some of the fingers will probably be stiff.

PITTSVILLE.

(From the Record.)

George Shlegel met a violent and most shocking death in his father's grist mill in this city Saturday last at about 9:30 o'clock in the forenoon. He had been caught in the shafting of the machinery in the basement of the mill and mangled beyond recognition. The young man had gone into the basement of the mill to put a belt on a pulley. The machinery was so constructed that he was obliged to lean over the shaft to put on the belt. There is much conjecture as to how he became entangled about the shaft, but the most plausible theory is that the belt was thrown by the rapidly revolving pulley over the young man's head and that he had not time to loosen himself before it had wound up on the shaft, drawing him with it in its revolutions. When found he was still on the shaft, one leg wound about it several times, which accounts for the terrible fractures of this member. The head and upper part of the body were making the larger circuit, striking above against the woodwork of the mill and below into the ground, breaking and shivering the woodwork and making an indentation in the solid earth below of fully eight inches. George Schlegel was a few months under seventeen years of age, born at Fort Scott, Kansas, and has lived a Pittsville with his family for the past eight years. He was of an unassuming nature, admired and respected by all and the bereaved family have the sympathy of all in this most trying ordeal.

Emma Turkofske and Geo. Whitrock, of the town of Sigel, were married at the home of the bride's parents, Mr. and Mrs. John Turkofske yesterday, the 22nd inst., at the Turkofske homestead near here. The young couple will live in the Town of Sigel where the groom has a farm. The young people have the good wishes of all.

A pleasant surprise was tendered Mr. and Mrs. J. C. Kartz Monday evening, the occasion being the 40th. anniversary of their wedded life. An enjoyable evening was had and good things to eat.

RUDOLPH.

Dr. Jackson is in Berlin attending the Berlin fair.

Miss Louise Taylor is visiting in LaCrosse.

Frank Whitman and son and Nic Ratelle were among those from here who attended the state fair.

Frank Wichman and John Osahski were called to Milwaukee last week by a telegram stating their brother-in-law was seriously ill. When they arrived there they found that it was a joke played on them by one of their relatives, as they found their brother-in-law well and enjoying a glass of beer on their arrival. They took the joke all right and visited several days among relatives before their return home.

Martin Hilgers reports an unusually fine crop of potatoes.

Mrs Chas Martin and children have been the guests of Mr. and Mrs Aug. Jacoby.

Jasper Crotteau, Ed Branstadt and John Bates took an auto ride to Grand Rapids on Saturday.

Bat Sharkey is entertaining his brother-in-law and wife from Morris, Minn.

John Reinhart sold over 100 sheep to the Reiland Packing Co. on Monday.

Dan Rezin sold almost his entire flock of sheep to the Reiland Packing Co. on Monday, and Moses Blair sold 35 of his flock.

Ernest Wilki, who recently purchased the Corner farm, took possession the past week.

Fred Ott purchased the Geo. Riley home near the Green Bay depot the past week, consisting of a house, barn and two lots. The place was formerly owned by Wm. Love.

Mrs. L. Barber of Milwaukee arrived here to attend the Sharkey-Berard wedding.

John K. Blonien of Fond du Lac closed the deal for the Bat Sharkey farm on Monday. Consideration $7000. Mr. Blonien is a practical farmer and will take possession Oct. 1st. Mr. and Mrs. Bat Sharkey will leave within a week for Watuskin, Alberta, Canada, to make their home.

John Fritchie purchased an eighty of H. Wipperman which already joins Mr. Fritchie's farm.

Dr. Abernethy, the great English physician, said, "Watch your kidneys. When they are affected, life is in danger." Foley's Kidney Remedy makes healthy kidneys, corrects urinary irregularities, and tones up the whole system. John E. Daly and Johnson &Hill Co.

ONE WEAK SPOT.

Most Grand Rapids People Have a Weak Spot and too Often It's the Back.

—Everyone has a weak spot.
Too often it's a bad back.
Twinges follow every sudden twist.
Dull aching keeps up day and night.
Tells you the kidneys need help—
For backache is really kidney ache.
A kidney cure is what you need.
Doan's Kidney Pills cure sick kidneys.
Cure backaches and urinary ills.

Good proof in the following statement.

Charles H. Curtis, 711 Church St., Stevens Point, Wis., says: "I suffered terribly from a pain in the small of my back and at times could hardly dress myself in the morning on account of the trouble. I hardly knew what was the matter, but finally decided that my kidneys were disordered. I then procured a box of Doan's Kidney Pills and began their use. This remedy acted promptly and I have no hesitation in saying that it is one of great effectiveness in cases of kidney trouble."

For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, New York, sole agents for the United States.

Remember the name—Doan's—and take no other.

Warning.

Do not be persuaded into taking anything but Foley's Honey and Tar for chronic coughs, bronchitis, hay fever, asthma, and lung trouble, as it stops the cough and heals the lungs. John E. Daly and Johnson & Hill Co.

SIGEL

There was a large crowd at Carlson's auction Friday. The Carlson people will move to Altoona to reside.

Mrs. E. Martinson is reported as getting better.

Walter Larson who was here to attend the funeral of his sister, returned to his work at Minneapolis on Wednesday.

Those from out of town who attended the funeral here last week, were, Messrs. Edstrom, Jensen, and Gust Lundgren and wives, John Lundgren and Ed Branstedt of Rudolph, Mr. and Mrs. Axle Anderson and Mrs. And. Anderson of Port Edwards, and Mr. and Mrs. Quist of Milladore.

Edgar Worlund has returned to Almond after spending a few days in our burg.

Misses Berdena and Floy Berg called on Grand Rapids friends over Saturday.

Misses Mary and Jennie Lundberg returned to Chicago last week to resume their duties there after enjoying a three weeks vacation under their parental roof.

Sven Holberg, Gust Ogren and Martin Prince are doing mason work at the Rapids.

Ole Holstrum left on Friday night for Minnesota, where he will be employed the coming winter.

Miss Polly Bushmaker is employed at the Rapids.

There was a large crowd in attendance at the dance held at the Rudde home Sunday night.

Miss Anna Bushmaker departed Sunday night for Junction City, where she will be employed.

Hilmer Holberg, Oscar Nelson, Alex Pearson, Charley and Herman Peterson returned from Merrill on Thursday, after having been employed there the past summer.

Mr. Wilson departed last week for Chicago, after spending the summer here.

Jens Larson leaves next week for Eau Claire where he will be engaged for some time building a new house on the Carlson Bros. farm, who are intending to move up there.

Mr. and Mrs. J. Kaceja and family of Milwaukee returned to their home on Monday after a weeks visit here with the Brostowitz families. Mr. Kaceja is on the police force at Milwaukee.

Mrs. K. Blockwitz returned to her home in Milwaukee on Monday after a visit at the Peter Brostowitz home.

Jim Blockwitz and family of Minneapolis are visiting at the Peter Brostowitz and Peter Schentz home.

Mr. and Mrs. Joe Klappa and children of Biron spent Sunday at the L. Perch home.

Misses Berdena Berg, Tillie Carlson, Floy Berg, Ida Nordstrum and Hannah Kronholm were Sunday guests of Miss Hulda Holstrom.

Y. P. S. meets with Mr. and Mrs. A. Newman on Friday night. All are cordially invited.

Miss Anna Walters and a friend of Grand Rapids spent Sunday at the Walters home.

Misses Hannah Kronholm and Ida Nordstrum were Rudolph shoppers on Saturday.

Mr. Lindquist and family of Rockford, Ill., have taken possession of the Carlson farm.

Chas. Carlson left on Tuesday for Altoona.

Eric Grunstedt and Leander Nordstrum spent Sunday here.

George Bushmaker of Junction City spent Sunday with relatives here.

Carl Holstrom intends to leave for Minneapolis in the near future.

Edwin Berg spent Tuesday at the Rapids on business.

Many people delude themselves by saying "It will wear away," when they notice symptoms of kidney and bladder trouble. This is a mistake. Take Foley's Kidney Remedy, and stop the drain on the vitality. It cures backache, rheumatism, kidney and bladder trouble, and makes every trace of pain, weakness, and urinary trouble disappear. John E. Daly and Johnson & Hill Co.

NEKOOSA.

(From the Times.)

Farmers in this region express themselves as quite satisfied with the corn crop this year—that is, most of the farmers are getting more corn than they expected, but the weather was too dry for a good potato yield. Early potatoes yielded well, and the late varieties, planted early, were a satisfactory crop, but the late ones, planted the latter part of June are small and few in a hill, especially on the high ground where it will hardly pay to dig them. Those on the low ground are of fair size.

James B. Nash of this city has been appointed assistant manager of the Nekoosa-Edwards Paper Co.'s manufacturing department, which places him in charge of the three mills at Nekoosa and Port Edwards. Mr. Nash has had charge of the Nekoosa plant for several years and it is in proper recognition of his ability that he has been singled out as the man to place in the position as manager of all three mills as assistant to G. F. Steele, the general manager.

Miss Anna Edwards and Mr. Frank Zeller were united in marriage at St. Michael's Catholic church at Junction City on Tuesday, September 14, attended by the Misses Sophie Kane and Nettie Sokloske and Messrs. Emmett Cahill and Jesse Lapene. The bride is a daughter of Mr. and Mrs. Chas. Edwards of this city, the groom's parents being Mr. and Mrs. Frank Zeller of Junction City, where the wedding reception was held.

A. F. Zurfluh has added a wholesale liquor business at the Palace saloon and John Simmet has been rewarded the contract to build an addition to the west side of the present building, two stories high and the full length to the old building.

Dr. Geo. Pomainville was at Milwaukee hospital on Thursday and Friday where he had an operation on his arm which he injured some time ago.

"Can be depended upon" is an expression we all like to hear, and when it is used in connection with Chamberlain's Colic, Cholera and Diarrhoea Remedy it means that it never fails to cure diarrhoea, dysentery or bowel complaints. It is pleasant to take and equally valuable for children and adults. Sold by all dealers.

Farmers, A Bargain

240 acres good clay soil, new buildings, good pasture fenced in, close neighbors, 3 miles to town, 26 miles from Grand Rapids. Will also sell at bargain prices five one and two seated spring wagons, one two-horse delivery wagon, one good second hand spring wagon, one nearly new steel tired top buggy.

We are not going to leave, we are here to stay and guarantee all work. We want your repairing and painting. We sell buggy tops, buggy cushions, curtains, etc., It will pay you to patronize us, we have up-to-date facilities and our prices will please you.

Ordinance No. 138.

An Ordinance Directing The Issue Of Funding Of General City Indebtedness Bonds Of The City Of Grand Rapids Wisconsin To The Amount Of $30,000. And Providing For The Payment Thereof.

The common council of the city of Grand Rapids, Wisconsin, do ordain as follows:

SECTION 1. That the funding of general city indebtedness bonds of the city of Grand Rapids, Wisconsin, to the amount of $30,000 duly authorized by section 925-133 of the Wisconsin statutes shall be issued in denominations of $1,000 each, except the last bond of this series which shall be for the sum of $21,000 all under date of September 15, 1909, and the interest shall be evidenced by semi-annual interest coupons of $20.00 each payable on the 15th day of September and the 15th day of March of each year. Both principal and interest of the said bonds shall be made payable at the office of the city treasurer in the city of Grand Rapids, Wood County, Wisconsin, and at the option of the holder in exchange on Milwaukee, Chicago or New York.

SECTION 2. The said bonds and interest coupons shall be substantially of the following form subject to the necessary variations as to numbers, maturities, etc.

STATE OF WISCONSIN.
County of Wood.

No. 1. $1,000.

CITY OF GRAND RAPIDS.

Funding of general city indebtedness bonds.

KNOW ALL MEN BY THESE PRESENTS, That the city of Grand Rapids Wood County, Wisconsin, is justly indebted and for value received hereby promises to pay to the bearer on the 15th day of February, 1920, the principal sum of $1,000 with interest thereon at the rate of four per cent per annum, payable semi-annually on the 15th days of March and September as evidenced by and on the presentation and surrender of the annexed interest coupons as they severally become due. Both principal and interest hereof are payable at the office of the city treasurer in the city of Grand Rapids, Wood County, Wisconsin, and at the option of the holder in exchange on Milwaukee, Chicago or New York.

This bond is one of a series of ten bonds of the same date and amount aggregating $30,000 issued for the purpose of funding the general city indebtedness of the said city of Grand Rapids.

It is hereby recited and certified that the issue hereof is duly authorized by section 925-133 of the Wisconsin statutes and by a three-fourths vote of all the members of the common council elect at a regular meeting after due publication of the proposed ordinance authorizing the same in the official paper of said city; that legal provision has been made for the levy and collection of an annual tax sufficient to meet the payment of the interest and principal hereof as the same becomes due; that all acts, conditions and things required or proper to be done precedent to or in the issuance of this bond have been legally had, done and performed, and that the amount of this bond together with all the other indebtedness of said city of Grand Rapids does not exceed any statutory, constitutional, or other legal limitation thereon. For the payment of principal and interest hereof the full faith, credit and resources of the said city are hereby irrevocably pledged.

In witness whereof the said city of Grand Rapids has caused this bond to be signed by its Mayor and Clerk under its corporate seal and the interest coupons hereto attached to be signed with the lithograph signature of said clerk as of the date of the 15th day of September, 1909.

Clerk. Mayor.

COUPON NO. ONE.

No. 1. $20.00

On March 15, 1910, the city of Grand Rapids, Wisconsin, will pay to the bearer at the office of the city treasurer of said city and at the option of the holder in exchange on Milwaukee, Chicago or New York, the sum of $20.00 for interest on this indebtedness bond, dated Sept. 15th, 1909, and numbered Bond.

Clerk.

Bond No. 1 shall be payable on March 15, 1920.
Bond No. 2 shall be payable on March 15, 1921.
Bond No. 3 shall be payable on March 15, 1922.
Bond No. 4 shall be payable on March 15, 1923.
Bond No. 5 shall be payable on March 15, 1924.
Bond No. 6 shall be payable on March 15, 1925.
Bond No. 7 shall be payable on March 15, 1926.
Bond No. 8 shall be payable on March 15, 1927.
Bond No. 9 shall be payable on March 15, 1928.
Bond No. 10 shall be for the sum of $21,000 payable on March 15, 1929.

Section 3. There is hereby authorized and directed to be levied on all the taxable property of the said city of Grand Rapids for the year 1909 and each and every year thereafter while said bonds or any portion thereof are outstanding and unpaid a sufficient annual tax to provide for and meet the payment of the interest and principal of the said bonds as and when the same become due and payable and it is hereby made the duty of the proper officers each year to make the levy and collection of the said taxes sufficient in amount for such purposes and to apply the said taxes to the payment of the interest and principal of the said bonds in the manner authorized.

Section 4. This ordinance shall take effect and be in full force from and after its passage and publication.

FRANK POMAINVILLE,
Mayor.

Passed, adopted and approved by a vote of ¾ of all the members of the common council elect at a regular meeting held on the 7th day of September, 1909.

Attest: C. E. BOLES,
City Clerk.

Testifies After Four Years.

Carlisle Center, N. Y., G. B. Burhans, writes: "About four years ago I wrote you that I had been entirely cured of kidney trouble by taking two bottles of Foley's Kidney Remedy, and after four years I am again pleased to state that I have never had any return of those symptoms, and I am evidently cured to stay cured." Foley's Kidney Remedy will do the same for you. John E. Daly and Johnson & Hill Co.

Goggins, Barzeau & Briere,
Plaintiff's Attorneys,
Grand Rapids, Wisconsin.

Sept. 22 Oct. 6

State of Wisconsin, Wood County, In County Court.

In the matter of the last will and testament of James Rouhan, deceased.

On reading and filing the petition of Paul Kroll, representing that James Rouhan, deceased, in his lifetime, by his contract in writing, agreed to sell and convey to the petitioner certain land and real estate therein described upon the terms and conditions therein stated, and showing that he has made certain payments thereon in accordance with said contract, and praying that the executor of the will of said James Rouhan, deceased, be authorized and directed to execute and convey to him the said lands.

It is ordered that said petition be heard at a special term of this court to be held at the court house in the city of Grand Rapids on the 15th day of October on the opening of court of said day or as soon thereafter as counsel can be heard.

It is further ordered that notice of such hearing be given to all persons interested by the publication of a copy of this order for three weeks prior to the day of such hearing in the Grand Rapids Tribune, a weekly newspaper published in said county.

Dated September 22, 1909.

By the Court,
W. J. Conway,
County Judge

Chamberlain's Colic Cholera and Diarrhoea Remedy is today the best known medicine in use for the relief and cure of bowel complaints It cures griping, diarrhoea, dysentery and should be taken at the first unnatural looseness of the bowels It is equally valuable for children and adults It always cures Sold by all dealers

An item in the Wild Rose Times is to the effect that the two bank robbers who have been serving a five year sentence at Fort Leavenworth, Kansas for robbing the post office at Wild Rose they having told to rob the bank there, are to be released upon being released from the Fort Leavenworth prison Four men entered the bank at Wild Rose on the 7th of October 1905 and made an attempt to rob the bank, but they were scared away before they got the money A posse of citizens surrounded them in a wood and one of the robbers was killed Later one of them committed suicide and the other two were given jail sentences

Why His Marriage Failed.

He regarded children as a nuisance
He did all his courting before marriage
He never talked over his affairs with his wife
He never had time to go anywhere with his wife
He doled out money to his wife as to a beggar
He looked down upon his wife as an inferior being.
He never took time to get acquainted with his family
He thought of his wife only for what she could bring him
He never dreamed that there were two sides to marriage.
He never dreamed that a wife needs praise or compliments.
He had one set of manners for home and another for society
He paid no attention to his personal appearance after marriage
He married an ideal, and was disappointed to find it had flaws.
He thought his wife should spend all her time doing housework
He treated his wife as he would not have dared to treat another woman
He never dreamed that his wife needed a vacation, recreation, or change.
He never made concessions to his wife's judgment, even in unimportant matters
He thought the marriage vow had made him his wife's master, instead of her partner
He took all the little attentions lavished on him by his wife as his by "divine right," and not as favors
He always carried his business troubles with him instead of locking them in his store or office when he closed —O S Marden

Our city fathers seem to be figuring on putting in some pavement about the city some time in the future, and this is as it should be it is to be hoped, however, that before the pavement is put in that every property owner along the street where the pavement is to be put in will be compelled to put in the water and sewer connections to the property line so that the pavement will not be torn up continually as has been the case with the macadam that was put down in this city several years ago Where a property owner will not put in the connections himself the city should put them in for him and charge the cost up against the property

Don't waste your money buying plasters when you can get a bottle of Chamberlain's Liniment for twenty five cents A piece of flannel dampened with this liniment is superior to any plaster for lame back, pains in the side and chest, and much cheaper. Sold by all dealers

What "Kellner's" Mean on Coal.

—It means that Kellner stands back of every ton of it guaranteeing the weight and quality ready if need be to take the coal out if you say it's not satisfactory. You buy coal of Kellner this year —tf

KELLNER COAL COMPANY

Ringlings to go to Europe.

John Ringling, who has returned to Wisconsin from a visit to the Seattle exposition and the Ringling Bros circus in the west sails from New York today for London, England It is expected that the Ringlings will invade England and the continent next year with their circus Thus, Wisconsin will produce the greatest amusement enterprise that ever crossed the Atlantic ocean

From a humble cottage in Baraboo Wis, to a town house in London is a far cry but John Ringling has attained to these latter within a quarter of a century Not only that, he maintains a luxurious residence on the North Shore drive, Chicago, a garage of a half dozen big motor cars, a yacht on Lake Michigan, and the finest private car carried over any railroad in America John Ringling evidently intends to break through the barrier which has debarred the circus man from social triumphs in the elect drawing rooms of the elite One big circus man of the east with all his millions, possessing the finest country estate in America, in New York state with the largest golf links in the world, was barred from enjoying the favor of the Four Hundred Will John Ringling succeed where the others failed?

The Ringlings have winter quarters in England and enough railroad cars to transport their big circus thus it will be an easy matter for them to cross the big pond and show all Europe what a Wisconsin circus is like

LOW ONE-WAY FARES TO THE PACIFIC COAST VIA CHICAGO, MILWAUKEE & ST. PAUL RY.

"MEET ME AT THE FIRST NATIONAL BANK"

Anything a boy wants

Many imported premiums

This premium one of our most popular—is a striking or punching bag pear shape hangs from the ceiling, made of strong oil leather Boy's size with swiveling cord and face

Develops a boy smart, clean muscles makes him active sturdy and strong We offer it for 200 wrappers or 85c and 160 wrappers Used at any sporting goods store would cost more than double this

Grandma heads Pearl Borax and Export Borax Soap wrappers all three count on the same premiums

You can accumulate the necessary wrappers *in a third of the usual time*

Grandma Not a washing powder but a *borax* powdered soap Saves soap bills

Pearl A pure white floating soap the large cake for 5c

Export Borax Soap the *borax* laundry soap Better than any naphtha soap for washing with cold water Can also be used in hot water

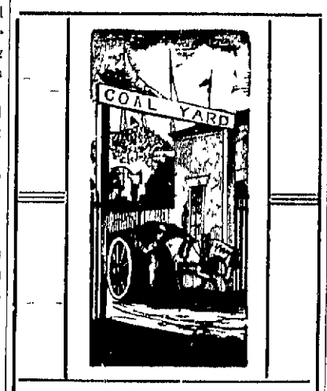

See illustrated list of premiums in each package at your grocers

Start a wrapper collection

When House Cleaning Don't Bother with the Washing

Take it to Normington Brothers the Laundrymen they will do it for you at the lowest prices and in the best possible manner.

Fuel Essay - Courage

Courage is the thing Nature tucks under the waistcoat of the man who can—it's the iron in his ego fearlessness in his bosom Quality never courts complaints, and it's dealing in products that has the power of attracting confidence But, the best need the push of courage to keep them going until they gather the momentum of public opinion, and then, bless your sole, you can't stop them And it's the coal of quality, back of Bossert Bros & Co that made it live and blossom and spread wherever there were coal users For good coal and wood call phone 416 or 54, and we deliver the goods

Bossert Bros. & Co.

Our Pilot

To perfect bread, pies, cakes, etc., is to use VICTORIA flour.

If you wish a flour of superlative quality that is perfect for family use you purchase a sack of VICTORIA.

Exacting care from the purchase of the wheat to the time the flour is put into the sack assures you of the best flour when you buy VICTORIA.

How to Save Fuel

Briefly-Buy a

Cole's Hot Blast Coal Stove.

It cuts the fuel bill in two because it burns the gas rising from burning coal. Gives over the chimney in either stoves **Cole's Hot Blast** really makes $3 soft coal work like $6 hard coal Come in and see this smokeless feed door Does away with dust, dirt and smoke in the house

Our Cutlery has a great reputation in this neighborhood because when our prices are cheap, the goods are not

GOOD HEALTH

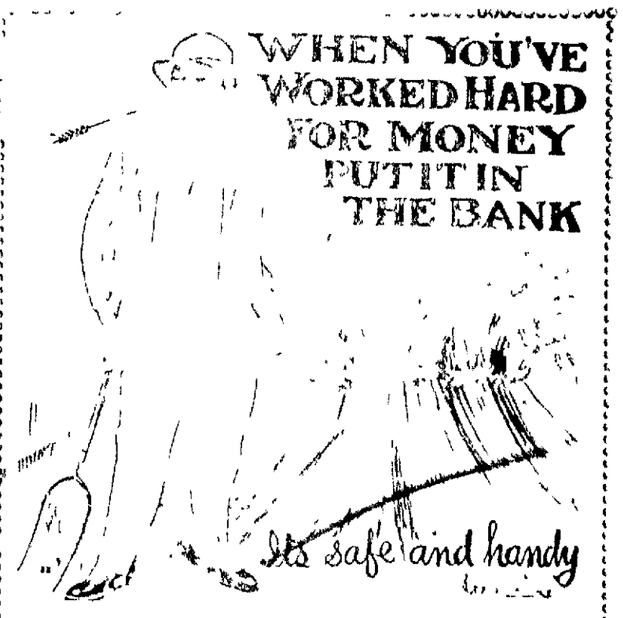

Is reflected in person who couples a careful, wholesome diet with the moderate use of an invigorating, healthful food beverage like

GRAND RAPIDS BEER

The ruddy good nature manifest in those who indulge in an occasional good glass of beer, like ***Grand Rapids Beer,*** is proverbial They are good natured because they have gained strength, health and vigor from its use In striking contrast are the pessimistic coffee or tea drinkers and the optimistic beer drinker

Try our beer. It is the acme of healthful liquid refreshments.

Edward and Clara Eberhardt are in Milwaukee this week to attend the Buss-Eberhardt wedding.

Mr. and Mrs. Thomas Bratton of Rudolph were in the city on Monday attending to some business matters.

Officer Jack Garihee left on Monday for a few days visit at the LaCrosse fair and join his family who have been visiting there for some time.

The last Sunday train for the season was run over the Green Bay & Western on the 26th instant. The Sunday trains have proven quite popular during the past season and it is probable that the train will be put on again next season.

Mr. and Mrs. Chas. Fritz expect to leave in a few weeks for Leonard, N. D., where they will spend the winter with their daughter and if they find the climate beneficial to Mrs. Fritz's health they will remain there.

Mrs. Carrie T. Cameron has removed from Milwaukee to Pasadena, Cal., where she expects to make her home in the future. Mrs. Cameron's many friends in this city and vicinity will wish her health and happiness in her new home.

H. H. Sydow and nephew Lester returned on Monday from Watertown where they spent a week visiting with his father and attending the Watertown fair. Mr. Sydow reports a fine time and says the Watertown fair was a huge success this year, the attendance one day being over 20,000.

A. L. Akey and son Jeffrey of Biron were pleasant callers at this office on Saturday afternoon. Mr. Akey and family were on their way to Rudolph to attend a big surprise party which was given that night in Marceau's hall in honor of Mr. and Mrs. Bat Sharkey, who are soon to leave for Canada where they will make their future home.

Chamberlain's Colic, Cholera and Diarrhoea Remedy is today the best known medicine in use for the relief and cure of bowel complaints. It cures griping, diarrhoea, dysentery, and should be taken at the first unnatural looseness of the bowels. It is equally valuable for children and adults. It always cures. Sold by all dealers.

An item in the Wild Rose Times is to the effect that the two bank robbers who have been serving a five year sentence at Fort Leavenworth, Kansas, for robbing the post office at Wild Rose, they having tried to rob the bank there, are to be rearrested upon being released from the Fort Leavenworth prison. Four men entered the bank at Wild Rose on the 7th of October, 1905 and made an attempt to rob the bank, but they were scared away before they got the money. A posse of citizens surrounded them in a wood and one of the robbers was killed. Later one of them committed suicide and the other two were given jail sentences.

Why His Marriage Failed.

He regarded children as a nuisance.

He did all his courting before marriage.

He never talked over his affairs with his wife.

He never had time to go anywhere with his wife.

He doled out money to his wife as to a beggar.

He looked down upon his wife as an inferior being.

He never took time to get acquainted with his family.

He thought of his wife only for what she could bring him.

He never dreamed that there were two sides to marriage.

He never dreamed that a wife needs praise or compliments.

He had one set of manners for home and another for society.

He paid no attention to his personal appearance after marriage.

He married an ideal, and was disappointed to find it had flaws.

He thought his wife should spend all her time doing housework.

He treated his wife as he would not have dared to treat another woman.

He never dreamed that his wife needed a vacation, recreation, or change.

He never made concessions to his wife's judgment, even in unimportant matters.

He thought the marriage vow had made him his wife's master, instead of her partner.

He took all the little attentions lavished on him by his wife as his by "divine right," and not as favors.

He always carried his business troubles with him, instead of locking them in his store or office when he closed.—O. S. Marden.

Our city fathers seem to be figuring on putting in some pavement about the city some time in the future, and this is as it should be It is to be hoped, however, that before the pavement is put in that every property owner along the street where the pavement is to be put in will be compelled to put in the water and sewer connections to the property line, so that the pavement will not be torn up continually as has been the case with the macadam that was put down in this city several years ago. Where a property owner will not put in the connections himself the city should put them in for him and charge the cost up against the property.

Don't waste your money buying plasters when you can get a bottle of Chamberlain's Liniment for twenty-five cents. A piece of flannel dampened with this liniment is superior to any plaster for lame back, pains in the side and chest, and much cheaper. Sold by all dealers.

What "Kellner's" Mean on Coal.

—It means that Kellner stands back of every ton of it guaranteeing the weight and quality ready if need be to take the coal out if you say it's not satisfactory. You buy coal of Kellner this year.—1t.

KELLNER COAL COMPANY.

Ringlings to go to Europe.

John Ringling, who has returned to Wisconsin from a visit to the Seattle exposition and the Ringling Bros. circus in the west, sails from New York today for London, England. It is expected that the Ringlings will invade England and the continent next year with their circus. Thus, Wisconsin will produce the greatest amusement enterprise that ever crossed the Atlantic ocean.

From a humble cottage in Baraboo, Wis., to a town house in London is a far cry, but John Ringling has attained to three latter within a quarter of a century. Not only that, he maintains a luxurious residence on the North Shore drive, Chicago, a garage of a half dozen big motor cars, a yacht on Lake Michigan, and the finest private car carried over any railroad in America. John Ringling evidently intends to break through the barrier which has debarred the circus man from social triumphs in the elect drawing-rooms of the elite. One big circus man of the east, with all his millions, possessing the finest country estate in America, in New York state with the largest golf links in the world, was barred from enjoying the favor of the Four Hundred. Will John Ringling succeed where the others failed?

The Ringlings have winter quarters in England and enough railroad cars to transport their big circus; thus it will be an easy matter for them to cross the big pond and show all Europe what a Wisconsin circus is like.

LOW ONE-WAY FARES TO THE PACIFIC COAST VIA CHICAGO, MILWAUKEE & ST. PAUL RY.

—Every day, from September 15 to October 15, 1909, inclusive, this Railway will sell low one-way colonist tickets from stations on its lines to Seattle, Tacoma, Spokane, Portland, Victoria, Vancouver, Butte, San Francisco, Los Angeles Salt Lake City, Ogden and to dozens of other points West and Northwest. Stop-overs allowed.

Low one-way tickets will also be on sale between above dates from stations on the Railway to Montana, Idaho and Washington stations on the new line to the Pacific Coast—the CHICAGO, MILWAUKEE & PUGET SOUND RAILWAY.

Stop-overs will also be allowed on these tickets, affording an excellent opportunity to see the wonderful new country opened by this new line.

For complete information regarding cost of ticket, sleeping car service and fares, route and train service, see nearest ticket agent of the Chicago, Milwaukee & St. Paul Railway. Descriptive folders regarding the country along the new line, from F. A. Miller, General Passenger Agent, Chicago.—3t.—Sept. 29

For the Housekeepers.

—We extend to you a cordial invitation to call and examine the largest and best selected stock of furniture in Wood county. If you are contemplating going to housekeeping just look over our stock and see how nice we can fit you out and you don't have to pay all cash down. Just a reasonable payment and the balance on monthly payments. Also a large stock of carpets and rugs shown on second floor.—J. R. Ragan, Spafford building, east side Freight paid on all outside shipments. We deliver the goods to your home.

"Doesn't Spender ever lay up any cold cash?"

"No; it burns in his pocket."—Cleveland Leader.

Important Date to Savings Depositors.

In accordance with our Savings Department rules, any money deposited on or before October 12th will be credited with three months interest on January 1st.

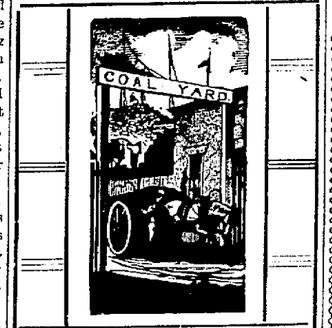

We speak of it in this public way as it is important for all our depositors to bear it in mind in order to receive the most interest possible in a short time.

The same rule will apply to new accounts opened before October 12th.

Fuel Essay - Courage

Courage is the thing Nature tucks under the waistcoat of the man who can—it's the iron in his ego—fearlessness in his bosom. Quality never courts complaints, and it's dealing in products that has the power of attracting confidence. But, the best need the push of courage to keep them going until they gather the momentum of public opinion, and then, bless your sole, you can't stop them. And it's the coal of quality, back of Bossert Bros & Co. that made it live and blossom and spread wherever there were coal users. For good coal and wood call phone 416 or 54, and we deliver the goods.

Bossert Bros. & Co.

How to Save Fuel

Briefly-Buy a

Cole's Hot Blast Coal Stove.

It cuts the fuel bill in two because it burns the gas arising from burning coal. Gas goes via the chimney in eather stoves. **Cole's Hot Blast** really makes $3 soft coal work like $9 hard coal. Come in and see that smokeless feed door. Does away with dust, dirt and smoke in the house.

Our Cutlery has a great reputation in this neighborhood because while our prices are cheap, the goods are not.

Anything a boy wants

Many imported premiums

This premium—one of our most popular—is a striking or punching bag, pear shape; hangs from the ceiling; made of strong, good leather. Boy's size with suspending cord and lace.

Develops a boy's muscles makes him active, sturdy and strong. We offer it for 200 wrappers or 80c and 60 wrappers. This bag at any sporting goods store would cost more than double this.

Grandma heads, Pearl front and Export borax Soap wrappers all three count on the same premiums.

You can accumulate the necessary wrappers *in a third of the usual time.*

Grandma—Not a washing powder but a *borax* powdered soap. Saves soap bills.

Pearl—a pure white floating soap, the large cake for 5c.

Export Borax Soap—the *borax* laundry soap. Better than any naphtha soap for washing with cold water. Can also be used in hot water.

See illustrated list of premiums in each package at your grocer's.

GRAND RAPIDS, WISCONSIN

The earth is one big, hard, uncharted rock to the crippled aviator.

When the army balloon corps is organized high privates will be in demand.

Don't hesitate to tell the census taker your age. He has sworn to be discreet.

It is estimated that out of a population of 10,000,000 in Great Britain, 12,000,000 are either under or on the poverty line.

The world over Americans have a reputation for doing things. That's why the foreign aviators at Rheims accord Curtiss a machine pecl.

Society may be improving, since the various scorching denunciations it has received. The latest come from Newport that there is a job for Sandow there.

People may not be able to explain rationally the popular sympathy with a jury that declares a man insane who reads poetry, but the sympathy is there, all the same.

Women who have won fame in the government lottery can it unmarried double. Get all the help they need for harvesting their crop, without applying to the employment agencies.

The scramble for social prestige at Newport has caused a French writer to revive an old Gaelic witticism: "I doubt if the people would take any thing like so much trouble to get into heaven."

It has been estimated that 10 per cent of the children under eight in the public schools of London drink at cocoa liquor "more or less regularly." And yet American children are called precocious.

The latest calculations on the course of Halley's comet, approaching the earth, exhibit no point of peril for aspiring aviators. Still, comets and flying machines both have been known to do things out of the day's run.

In Chicago they have started a school for tubercular children. Most of the sessions are held in the open air, and the children are said to act as if they were having a picnic. Their routine work takes in systematic care of the teeth, breathing exercises, gymnasties and the shower bath.

There is something very pathetic in the picture of the little shah of Persia trying to kill himself because, frightened at his lonely grandeur, he wants his parents. The emptiness of high royal honors in these stormy times strikes, even to the soul of a child, when he has to pay for them with his human needs.

It might have been supposed that California had enjoyed her share of earthquakes; but now while Mexican cities are partly in ruins and Spain is reporting tremors, California will feel herself fortunate at having escaped with the shake of recent date, which was so gentle that there were people in San Francisco and San Jose who did not feel it.

In his brief experience of the business of ruling an awakened people, the Shah Mohamed Ali has probably learned that there are times when wise people do best to adopt the motto: "Anything for a quiet life." He has been offered a pension of $75,000 a year if he will restore the national jewels. The likelihood is that he will take the offer and retire into Russia.

The work of arresting chauffeurs when they can be caught—and fining them for speeding goes merrily on, but with no appreciable diminution in the speeding. A little change in principle might work a great change in custom in this respect. If the automobile were arrested and fined and held for the payment of the fine things would soon wear a different aspect.

A new use was promptly found for the new Lincoln pennies. It seems, according to a Washington account, that they are in great demand by congressmen to present to babies in their districts, as the first issue will become in time rare coins. This use of the penny is significant in pointing the fact that in spite of its great achievements this is the age of small things—especially babies.

A New York magistrate wants the establishment of the whipping-post on account of the great number of wife-beating cases in his district. It is a pity that there is not the like official sympathy for ill-treated wives in this state, where the whipping-post has been established by law and practically nullified by the sympathy, for some occult reason, being given to the wife beater instead of to his victim.

A curious source of wealth is reported by the French consul at Mongtze, in upper Tonkin. It lies in wood mines. The wood originally was a pine forest, which the earth swallowed in some cataclysm. They lie in a slanting direction and in sandy soil, which covers them to a depth of about eight yards. As the top branches are well preserved, it is thought the geological convulsion which buried them cannot be of very great antiquity. The wood furnished by these timber mines is imperishable and the Chinese buy it for coffins.

The people of San Francisco have set a good example in giving Capt. Amundsen's sloop Gjoa, which successfully navigated the historic northwest passage, a place in a pool in Golden Gate park, where she can float safely for the benefit of visitors of the future who have an interest in geographical achievements. This plan should be followed wherever possible for the preservation of historic war vessels like "Old Ironsides" where they can lie at rest while they receive care sufficient to keep them from falling into decay.

A Cleveland judge has ruled that dishwashing is no part of a husband's duties. His honor might learn something by investigating things in families of which the Main Works spends most of her time playing bridge.

Abdul Hamid was a failure as a sultan, but he beat the doctors. They wanted to operate on him for an abscess of the throat, but he declined to have a knife used upon him and then got well. Turkey is better off without him and he is better off without the operation.

DEATH LIST GROWS

DEAD IN TROPICAL HURRICANE NOW NUMBER 55 IN LOUISIANA.

PROPERTY LOSS ENORMOUS

Miles of Territory Laid Waste—Crops Practically Ruined — Telegraph Wires Are Still Down to Many Points.

New Orleans. Fifty-five lives are known to have been lost and 55 others are reported to have perished in the tropical hurricane which starting last Sunday, continued throughout Monday and Monday night. The greatest loss of life occurred in Lower Terrebonne Parish. It is in that parish that 50 persons are said to be dead, but only 30 are authentically accounted for.

The property loss is far heavier than was first believed and instead of running into the hundreds of thousand will extend well into the million by the time the final details are tallied.

Miles of territory have been laid waste and crops have been practically ruined.

New Orleans is still sadly crippled in the way of railroad facilities and telephone and telegraph communication with the outside world.

Terrebonne Parish, La., definite, 20; reported, 40.
New Orleans, definite, 5.
Frenier, La., definite, 4.
Desair, La., definite, 3.
Jackson, Miss., definite, 2.
Baton Rouge, La., definite, 1.
Mandeville, La., definite, 1.
Bay St. Louis, Miss., definite, 1.
Donaldson, La., definite, 1.
Gramercy, La., definite, 1.
Grandpoint, La., reported, 4.
Pass Monachas, definite, 8.
Barataria Bay, La., reported, 1.

With 109 refugees from Grand Isle, a small island on the coast of Louisiana, about 60 miles south of New Orleans, the mail steamer Grand Isle brought the first news from Grand Isle and Cheniere Caminada, another island.

Not a life was lost on either island, but every head of live stock on both were swept into the gulf. The shrill cries of the frightened animals added to the terror of the panic stricken inhabitants.

Fields and Groves Laid Flat.

Fields of cane were laid flat and several orange groves destroyed, the trees being broken off or uprooted, and those which were left standing were stripped of all the fruit and foliage. Property damage on these islands alone run into the thousands.

In 1893 both islands were swept by one of the worst storms in the history of the gulf and 1,500 lives lost on Cheniere Caminada.

Coast Is Wiped Clean.

Jacksonville, Miss. The damage done by the hurricane in Mississippi was greatly exaggerated. There was comparatively small timber destruction, the yellow pine belt escaping almost entirely.

The crop damage, especially to cotton, was much smaller than indicated by early reports. The Mississippi Coast Traction Company's road of 18 miles, which cost $1,000,000, is almost a complete wreck. It runs between Long Beach and Biloxi.

Jackson, Miss. A relief train sent south on the main line of the Illinois Central railroad from this city has reached Pass Monachas, where the bodies of eight persons, including the station agent, wife and children, were recovered. The victims were drowned in a tidal wave during the recent hurricane.

FIERCE BATTLE WITH REDS

Game Warden Attempts to Arrest Poaching Indians and Lively Fight Results.

Lansing, Mich. State Game Warden Pierce received from Deputy Jack Rowell of Bessemer a report of a battle near the Wisconsin line between officers and a band of poaching Wisconsin Indians who had been killing deer and beaver in Michigan as their forefathers did before the white men established game laws.

Deputy Rowell reports that he went to the Indians' camp and after finding venison and beaver hides undertook to make an arrest. The six Indians, aided by their five squaws, attacked the deputy and his five men with guns and axes.

"The squaws were as bad as the men in the fight," reports Rowell, who adds that bloodshed is inevitable when he again attempts to arrest the red men.

Bishop Dunne Names Pastor.

Kewanee, Ill. — Bishop E. M. Dunne's first appointment since he became head of Peoria diocese was made when he appointed Rev. Francis W. Conrads, pastor of St. Joseph's parish here, to St. Anthony's church, Atkinson, Ill.

Canals on Mars Are Disappearing.

Boston.—A telegram received Wednesday by John Ritchie, Jr., from Prof. Percival Lowell at his observatory at Flagstaff, Ariz., states that recent observations show that the antarctic canals of Mars are disappearing.

Strikers and Officials Clash.

Omaha, Neb.—In a collision between the officers and deputy sheriffs and strikers' sympathizers Wednesday evening, William Berricck, 19 years old, a bystander, was shot and seriously wounded.

Thaw Loses Again.

Pittsburg, Pa.—Without comment on the petition, Judges Cohen, Swearingen and Carnahan handed down a decision Monday refusing to appoint a commission to determine if Harry K. Thaw is insane.

Decides Town Is "Wet."

Bristol, Va.—Judge Kelly decided the recent local option election was invalid and that the town is "wet." Preparation for opening several saloons is now under way. The "drys" will appeal.

Wheeling Beats the Pirates.

Wheeling, W. Va.—The Wheeling baseball team of the Central league won a one-sided contest from the Pittsburg team of the National league here Sunday by a score of 9 to 1. Few of the regulars of the Pittsburg club played.

Gets Life Sentence.

Marquette, Mich.—John E. Gibson, who killed a fellow soldier at Fort Brady, has been sentenced to a life term in the federal prison at Leavenworth, Kan.

HUDSON CELEBRATION BEGUN

FETE OPENS WITH A GRAND NAVAL RENDEZVOUS.

Half Moon, Replica of Dutch Explorer's Vessel, Is Accompanied by That of Fulton's Clermont.

New York.—The Hudson-Fulton celebration, for which New York has been so long preparing, opened auspiciously Saturday with the formal recognition of the presence of the American and foreign naval vessels and official guests. The international naval fleet, comprising more than 70 vessels, was anchored in the Hudson river from Seventy-second street northward, and was an imposing sight.

At 10:30 o'clock in the morning the replica of Henry Hudson's little Half Moon and that of Robert Fulton's Clermont escorted by a squadron of

Hudson's Half Moon.

torpedo boats, submarines, naval militia vessels and other craft, left the Kill Van Kull and proceeded to Stapleton, Staten Island, where the squadron was joined by the commanding officer of the naval parade. There was an interchange of civilities with citizens' committees here and at the Brooklyn shore, and at one o'clock the squadron started up the Hudson river.

As the bluff bowed little Half Moon and the funny, splashing Clermont entered the river cannon boomed from shore batteries and warships and the immense throng along the shores and on innumerable vessels cheered mightily. Behind the two queer craft trailed a great merchant fleet that had assembled in the lower bay and that was divided into ten big squadrons.

The Half Moon and Clermont were received with elaborate ceremony at the official reviewing stand and landing stage at One Hundred and Tenth street, and there they will remain anchored during the entire celebration, open for the inspection of the public.

In the international naval fleet the United States has 53 vessels, including 16 battleships and six cruisers, commanded by Rear Admiral Seaton Schroeder. The Netherlands sent the Utrecht, under command of Capt. van Hocking Colenbrander, in addition to the replica of the Half Moon, which was a present from the people of Holland. Germany is represented by four vessels, Great Britain by four, France by three, Italy by two, and Mexico, Cuba, Argentina and Guatemala by one each.

In the evening the naval parade was repeated with illuminations, and then the doings on shore begin. For the next week New York will be the most brilliantly illuminated place in the world during the evenings. It is calculated that the electric lighting will have a grand total of approximately 26,260,000 candle power, this not including the vast number of advertising signs, and taking into account only Greater New York. A remarkable feature of the illumination is an immense battery of search lights on Riverside drive that will make the Hudson as light as day for miles each way.

DIPLOMAT'S SON MARRIED

Richard T. Crane III., Whose Father Is Minister to China, Weds Miss Ellen Bruce.

South Boston, Va.—Two well-known American families were united Wednesday when Richard T. Crane III. of Chicago was married to Miss Ellen Douglas Bruce at Berry Hill, the home of the Bruce family, near this town. The ceremony was simple, but pretty. The young couple will make their home in Chicago after a wedding trip to Europe.

Mr. Crane is the son of Charles R. Crane, recently appointed minister to China. He is connected with the Crane Company of Chicago, which was founded by his grandfather, R. T. Crane. Miss Bruce's father, the late Alexander Bruce, was a well-known Virginia capitalist. Berry Hill, the home of the family, is one of the show places of Halifax county. Miss Bruce is a sister of Malcombo Bruce, who married Miss Myrtle Nelsen, daughter of C. C. Nelsen of Chicago.

Missouri Soldier-Physician Dead.

Kansas City, Mo. — Major Joseph F. Hume, a pioneer Missouri physician, died here Tuesday, aged 87 years. He served through the civil war in the Missouri home guards rising to the rank of major.

Former Iowan Receives Appointment.

Washington.—Following the decision to widen the scope of the division of the state department, Secretary Knox has appointed Philip Patchen, a newspaper correspondent here and formerly of Iowa, as its head.

Internal Revenue Receipts Increase.

Washington.—There was an aggregate increase of $1,190,037 in internal revenue receipts for last month as compared with the corresponding period of 1908. The August, 1909, receipts aggregated $20,284,735.

Millionaire Arrested.

Nome, Alaska.—Jafet Lindberg, the California millionaire mine owner and discoverer of Nome, was arrested here on two indictments charging perjury in connection with the trial of the Bear Cub mining case. Lindberg was released under $3,000 bond.

Col. Lockwood Retires.

Washington.—Col. Daniel W. Lockwood, the second ranking officer in the corps of engineers, will be placed on the retired list on Tuesday on account of age.

Posse Kills Two Negroes.

Houston, Tex.—Two unidentified negroes were killed by posses in the man hunt near Sandy Point. The negro, Steve Hayes, slayer of Armour Munson, is surrounded in the lowlands and capture or death is certain.

Settle the Boundary Dispute.

Lapaz.—Minister of Foreign Affairs Bustamente and the Peruvian minister to Bolivia signed a protocol for the settlement of the differences that long have existed between Peru and Bolivia over the boundary.

POPPING THE QUESTION

Now

WHY HE HESITATES.

GOV. JOHNSON LAID AT REST

ALL BUSINESS CEASES DURING FUNERAL SERVICES.

Dead Executive's Body Buried Beside That of His Mother In Family Lot.

St. Peter, Minn. — The remains of John A. Johnson, governor of Minnesota, whose death the state and nation mourn, were brought Thursday to this, his home town, for interment. As honorary escorts there came on the train the state officers, the St. Paul lodge of Elks, and the Knights of Pythias. Almost the entire population of St. Peter met the train, for Gov. Johnson was deeply loved and respected by all his fellow citizens.

The active pallbearers selected from among the governor's closest personal friends. They were:

Frank A. Day, who was his private secretary; F. B. Lynch, T. D. O'Brien, associate justice of the supreme court; E. T. Young, former attorney general; A. C. Weiss, manager of the Duluth Herald, and John G. Wise of Mankato.

The honorary pallbearers included the four living ex-governors of the state, L. F. Hubbard, John Lind, Samuel R. Van Sant and Knute Nelson, with Gov. A. O. Eberhart, C. M. Start, chief justice of the supreme court; Gov. John Burk of North Dakota and President Cyrus Northrup of the University of Minnesota.

Final funeral services were held in the Presbyterian church and were conducted by Rev. R. E. Clarke. The body of the dead governor was then interred in the Johnson family lot in the St. Peter cemetery, beside that of his mother.

Throughout the entire state there was a cessation of business and manufacturing from 3 to 3:05 o'clock this afternoon. Every wheel ceased turning and cars stopped. The bells of all churches, public and private institutions were tolled from 9:15 to 10 a. m. and from 3 to 3:05 p. m.

CONGRESSMEN RETURN HOME

Leave Honolulu After a Tour of Inspection of the Hawaiian Islands.

Honolulu. — The party of United States congressmen that has been touring the Hawaiian Islands left on the liner Mongolia for San Francisco. During their stay they made a thorough inspection of the roads of the archipelago, visiting the Islands of Hawaii and Maui, and the volcanic island of Kaui. They inspected the Hilo breakwater, the Pearl Harbor naval site as well as many sugar plantations.

The congressmen were given an ovation as they boarded the ship for home, thousands of Americans and natives lining the wharf to see the visitors depart.

Congressman Albert F. Dawson of Iowa in an interview given out here says that the greatest need of the Islands is improved transportation facilities with the main land of the United States, better roads, more railways and a safe harbor in each island of the group.

Mrs. Eddy Donates $5,000.

New York. — Mrs. Mary Baker G. Eddy has sent to the New York museum of safety and sanitation her check for $5,000. Mrs. Eddy stated that she did so in appreciation of the philanthropic efforts of the museum in the introduction of safety devices to minimize the accidents due to railway travel and the use of machinery.

Robert Hoe Is Dead.

London.—Robert Hoe, aged 70 years, head of R. Hoe & Company, printing press manufacturers of New York and London, died here after a short illness. Mr. Hoe had been in London several weeks on his annual visit. He suffered an acute attack of kidney trouble ten days ago and his death resulted.

Former Celebrated Actress Is Dead.

Burlington, N. J.—Mrs. Henry Chanfrau, formerly a celebrated actress, is dead at her home here, aged 79 years.

Shoots Woman and Self.

Kansas City, Mo.—William Jacobia, a real estate dealer of this city, 47 years old, shot and killed Mrs. S. F. Stoll at her home and then, running to his own home four blocks away, told his wife what he had done and killed himself in her presence.

Cholera Reaches Java.

Washington.—A telegram to the state department announces the appearance of cholera at Batavia, Java. There are no details as to the number of cases.

Escaped Leopard Causes Panic.

St. Paul, Minn.—A crowd of 300 persons was thrown into a panic when a leopard which was being exhibited in this city, broke from its cage. The animal attacked Martin Martinson, aged four years, and in the presence of the boy's father tore the boy's right arm almost from its socket and clawed one ear from the boy's head. The boy would have been killed had not Charles Reustrom, a blacksmith, rushed from his shop nearby and almost killed the beast with one blow with an ax.

INCREASE IN IMMIGRATION

Aliens Swell Population by More Than Half Million During Fiscal Year of 1909.

Washington — A net increase of 573,551 in the population of the United States by the arrival and departure of aliens was scored during the last fiscal year, against an increase of 207,867 the previous year. There was a falling off in immigration from 782,870 aliens during the previous fiscal year to 751,786 the past year, and the total inward passenger movement, representing immigrant and non-immigrant aliens admitted, aliens debarred and United States citizens arrived, numbered 103,392.

The aliens residing abroad and making a merely temporary trip to the United States are classed as non-immigrant aliens. There were 924,695 aliens, including the non-immigrants, admitted into this country during the past fiscal year.

These figures are given in the August immigration report of the department of commerce and labor. During the fiscal year 944,235 aliens, including 192,449 non-immigrants, were admitted and 370,684 including 174,590 non-immigrants, departed from these shores. There were 10,411 aliens debarred and 2,124 returned after landing. Those likely to become a public charge figured most in this list.

The grand total of immigration, from the fiscal year ending September 30, 1820, up to and including the past fiscal year, is given as 26,852,723.

SENDS CURE BY WIRELESS

Surgeon at Naval Hospital Flashes Prescription and Advice to Patient Miles at Sea.

Washington. — Cured by wireless is the latest drama of real life written in the navy department records by the marine hospital service. Capt. Dean of the lightship off Nantucket shoals is the hero of the drama and he owes his life to the surgeons in charge of the naval hospital at Newport.

Capt. Dean got off his feet a couple of weeks ago and was consigned to the sick bed by his first mate. This old salt administered to him and prescribed quinine, calomel and whisky from the ship's medicine chest. But the captain got no better and the seas no smoother. He was in a pretty bad way when one of the crew thought of the wireless.

The operator began to call for the naval hospital at Newport. When he got an answer he told the shore operator of Capt. Dean's dangerous condition. A message was sent to the surgeon, who prescribed by wireless and cured the patient miles away.

THE VANDERBILTS BREAK

W. K., Jr., and Wife Sign Separation Agreement Despite Efforts of Relatives.

New York. — William K. Vanderbilt, Jr., donor of the Vanderbilt cup for automobile races, and his wife, formerly Miss Virginia Fair of San Francisco, have signed a separation agreement, according to a local newspaper. Mrs. Vanderbilt is now returning from Europe to America with her two children, Muriel and William K. Vanderbilt, III. It is expected that the separation will be formally announced as soon as Mrs. Vanderbilt reaches New York. Efforts of Mrs. O. H. P. Belmont, mother of Mr. Vanderbilt, and Mrs. Herman Oelrichs, sister of Mrs. Vanderbilt, to avert the separation were without success.

William E. Corey Optimistic.

Baltimore, Md.—President William E. Corey of the United States Steel corporation, in an interview, discussing the outlook for the iron and steel trade, takes an exceedingly optimistic view of business conditions and railroad expansion.

Gored to Death by Bull.

Sterling, Ill.—Thomas Davis, a farmer of Carroll county, was gored to death by a vicious bull and then his body partly consumed by hogs before his loss had been discovered.

Capture Alleged Robbers.

Lexington, Ky.—Two men giving their names as Arthur Long of this city, and James Gleason of Louisville, were captured here after four unsuccessful attempts to blow up the safe in the freight depot of the Queen & Crescent railroad.

More Land for Settlers.

Washington.—A total of 409,300 acres of land in Utah was to-day designated for settlement as coming within the enlarged homestead act by Acting Secretary of the Interior Pierce.

Japanese Laborers Released.

Washington.—All the Japanese laborers who, while returning from the canneries in Canada where they had been working during the summer, were held up by the United States immigration officers, have been ordered readmitted into this country.

Charges Spain Caused Trouble.

Tangier.—The foreign board has drawn up a protest against the action of Spain in the Riff territory, claiming this to be a breach of the Algeciras agreement.

PEARY IS AT HOME

LARGE CROWDS GREET EXPLORER AT EVERY STOP.

COOK IS GIVEN BANQUET

Tells His Story at a Dinner Given by the Arctic Club of America at the Waldorf Astoria Hotel.

Portland, Me. — From the moment Commander Peary crossed the international boundary at Vanceboro, the eastern terminus of the Maine Central railroad, until he arrived at Portland his reception by the citizens of Maine amounted to a continuous ovation.

During the journey through Maine Commander Peary was cordial and appreciative, although he appeared to be rather tired. At every station where the train stopped between Vanceboro and Ojo Town there was a crowd of cheering country folk, who seemed to appreciate the fact that it was the first few hours that the commander was ready to be in his own land, with his own country's flag greeting him on every side.

New York. — With Commander Robert E. Peary seeking that fortunate seclusion at his Maine home and with Dr. Frederick A. Cook duly answering the most difficult questions it was doubtless it was expected that the north pole controversy would be permitted to rest for a while, but this expectation is probably shattered by a dispatch from the train on which Peary was speeding to his summer home, saying that he is preparing an indictment of 30 counts against Dr. Cook, and that he will publish these categorical allegations very soon.

At a banquet tendered to Dr. Cook Thursday evening by the Arctic Club of America, at the Waldorf-Astoria, the Brooklyn explorer delivered a speech in which after recounting the perils of those who have heretofore attempted to make the trip to the north pole, said:

"Now, gentlemen, I appeal to you as explorers and as men. Am I bound to appeal to any man for a license to look for the pole?

"Another criticism is the charge of our insufficient equipment. We have met this. You know that we had every possible aid to success in sledge traveling. A big ship is no advantage. An army of white men, who at best are newbies, is a distinct hindrance, while a cumbersome luxury of equipment is fatal to progress. We chose to live a life as simple as that of Adam and we forced the strands of human endurance to scientific limits. If you will reach the pole there is no other way.

"Now, as to the excitement of the press, to force things of their own picking from important records into print: In reply to this I have taken the stand that I have already given a tangible account of our journey. It is as complete as the preliminary reports of any previous explorer. The data, the observations, the records, are of exactly the same character. Heretofore such evidence has been taken with faith and the complete record was not expected to appear for years, whereas we agree to deliver all within a few months.

"Now, gentlemen, about the pole. We arrived April 21, 1908. We discovered new land along the one hundred and second meridian between the eighty-fourth and the eighty-fifth parallel. Beyond this there was absolutely no life and no land. The ice was in large, heavy fields with few pressure lines. Our observations were sufficient to guarantee our claim. When taken in connection with the general record, you do not require this. I can see that, but this and all the other records will come to you in the due course of events.

"I cannot sit down without acknowledging to you, and to the living arctic explorers, my debt of gratitude for their valuable assistance. The report of this polar success has come with a sudden force, but in the present enthusiasm we must not forget the fathers of the art of polar travel. There is glory enough for all. There is enough to go to the graves of the dead and to the heads of the living."

Confesses to $150,000 Fire.

Indianapolis, Ind.—Otto Trubon, night watchman of the McDougal kitchen furniture factory, which with several houses in the neighborhood, was burned, confessed that he had set the factory on fire, according to the police. The loss was $150,000. Trubon is probably insane, the police say.

Floods Swallow 100 Lives.

Constantinople. — Torrential rains have caused the loss of 100 lives and the destruction of 500 houses at Homs, a town of northern Syria.

Two Killed, Ten Wounded.

Melilla.—A Spanish detachment reconnoitering in the environs of Souk Beni-Sicar, demolished a large number of houses. The Riffians opposed the Spanish advance. The Spanish had two killed and ten wounded in Wednesday's fighting. Gen. Marina, commander of the Spanish forces, attaches great importance to the occupation of Souk-Beni-Sicar, which is the meeting point of the various sections of the tribe and the headquarters of the anti-foreign movement.

Would-Be Murderer Suicides.

La Crosse, Wis.—After attempting to kill his father, William Schaefer, aged 27, one of the proprietors of a bakery, turned the revolver on himself and fired one shot, falling dead on the floor. Insanity is believed to have been the cause of the suicide and attempted murder.

Bomb Was Harmless.

El Paso, Tex.—It develops that there was no plot connected with the finding of a supposed bomb in Juarez, Mexico.

Fire Fatal to Fireman.

Topeka, Kan.—Fire destroyed the Otto Kuhne Preserving and Pickling works, causing a loss of $125,000. Harry Jones and H. C. Gurtler, firemen, were injured by falling walls. Jones died later. Gurtler will recover.

Engine Ditched; Five Hurt.

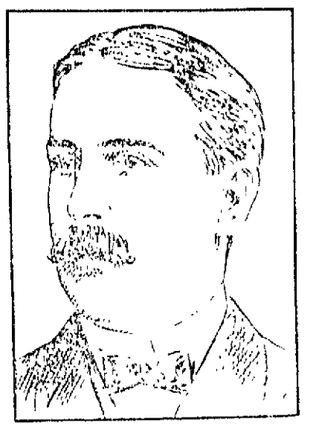

Huntington, W. Va.—Five men were injured, two probably fatally, when a Chesapeake & Ohio engine jumped the track and turned completely over into a ditch in the western limits of this city.

SEARS HAPPY AS FARMER

Former Head of Mail Order House, Who Retired with $?,000,000, Works in Fields.

Chicago [illegible] of W. Sears, who has retired from business with $? [illegible] on a farm, [illegible] of the Sheridan car at Grand Lake [illegible] of the north side.

At [illegible] the men who [illegible] financial career would have been [illegible] had it not been for his expert way of doing things, was seen in the fields superintending the work of the 20 men who came on Long Lake each week to be completely [illegible] Sunday. Wearing overalls and work [illegible] straw hat, as if he were [illegible] to plow, Mr. Sears [illegible] a hoed hat [illegible] if it were the only [illegible] the [illegible] hat. He [illegible] to turn from [illegible]

Richard W. Sears.

look backward over the 17 years that have elapsed since he left his position as telegraph operator in Redwood Falls, Minn., to turn his mail order business that has grown into the greatest in the world.

"I'm awfully busy," he declared. "I have to look after the threshers and get this work done today. I haven't any time to talk about my self. Never did have," he added, with a merry twinkle of the eye.

Farmer Sears, who has announced that he intends to devote the rest of his time to his family and his farms, is only 51 years old. He was a telegraph operator at a wayside station when an eastern watch manufacturer sent him a watch with the privilege of returning it if he could not sell it. He found that he could sell that watch and many more. So large did the watch trade become that he resigned his position and went to Minneapolis.

Two years later he came to Chicago and began the business career that ended recently with the sale of his stock in Sears, Roebuck & Co., to a New York syndicate and his retirement with great wealth.

Mr. Sears' family is enjoying the farm life as much as the head of the house. His four children, two boys and two girls, have been reveling in rural delights and say they want to be farmers too.

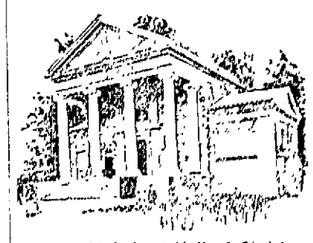

HALL OF CHRIST IS UNIQUE

Aula Christi at Chautauqua, N. Y., Only Building of Its Kind in the World.

Chautauqua, N. Y. The dedication of the Aula Christi or Hall of Christ—the only building of its kind in the world, took place recently in this city. The one who first proposed the idea 16 years ago, Bishop John H. Vincent, gave the dedication address.

This new building to be devoted exclusively to the study of Christ, was erected at a cost of about $40,000. The largest single contributions to its erection were $10,000 from the Massey estate in Toronto; $5,000 from Miss Helen Gould and $3,000 from the estate of S. T. Arnold. The best $12,000 for its completion was given by Chautauquans at a single meeting last year. The building is constructed of white Roman brick, stone, steel and white terra cotta. The windows are all of historic significance presenting in chronological order events in the life of Christ.

All the books which have been written upon the life Christ, including a very large library dealing with the interpretations of Christ, and Christ in ethics, in social science and in

Aula Christi, or Hall of Christ.

modern civilization, are soon to be collected in one room of this hall. In another room will be collected and placed in easily accessible files copies of all the engravings or other pictures of Christ which the art of ages has brought within reach. In charge of the library and engravings will be a curator. A beautiful main audience room will be used exclusively for appropriate meetings. Already these meetings are being held in the new building. Later courses in study are to be inaugurated in the life, words and deeds of Christ and in the results of his teachings. These courses are to be conducted for both old and young. A special service is to be held in this building at least once a month throughout the entire year.

Settled It.

"He is not a lover of dogs."
"How do you know?"
"He has never owned one."
"How do you know?"
"He says he has never used the 'Lost' column in a newspaper."

Perhaps.

"My wife is getting so she can cook."
"You are prejudiced in her favor."
"No I am not; she gave a tramp a piece of pie last week and he has been back for more three times."
"Perhaps he is after a hero medal."

Trust Troubles.

Oil Trust—Isn't it a shame they are hounding us so. It makes me burn with indignation.

Ice Trust—It certainly is a frost for me.

Sugar Trust—And talking about sending me to jail, and I so used to refining influences!

Weather Note.

"He said she was the sunshine of his life."
"And now that they are married?"
"It's cloudy all the time."

AFTER SUFFERING TEN YEARS

Cured by Lydia E. Pinkham's Vegetable Compound

MARLTON, N.J.—I feel that Lydia E. Pinkham's Vegetable Compound has given me new life. I suffered for ten years with serious female troubles, inflammation, ulceration, indigestion, nervousness, and could not sleep. Doctors gave me up, as they said my troubles were chronic. I was in despair, and did not care whether I lived or died, when I read about Lydia E. Pinkham's Vegetable Compound; so I began to use it, and am well again and believe it all my suffering." Mrs. George Boldy, Box 40 Marlton, N.J.

Lydia E. Pinkham's Vegetable Compound, made from native roots and herbs, contains no narcotics or harmful drugs, and to-day holds the record for the large number of actual cures of female diseases we know of, and thousands voluntarily testify to cures on file in the Pinkham Laboratory at Lynn, Mass., from women who have been cured from almost every form of female complaints, inflammation, ulceration, displacement, fibroid tumors, irregularities, periodic pains, backache, indigestion and nervous prostration. Every suffering woman owes it to herself to give Lydia E. Pinkham's Vegetable Compound a trial.

If you would like special advice about your case write a confidential letter to Mrs. Pinkham, at Lynn, Mass. Her advice is free, and always helpful.

The Root of Altruism.

The three eternal roots of altruistic energy are these: First, the principle of justice, that there is a moral law before which all men are equal, so that I ought to help my neighbor to his rights. Second, the principle of charity, that I owe infinite tenderness to any shape or kind of man however unworthy or useless to the state. Third, the principle of free will, that I can really decide to help my neighbor, and am truly degraded if I do not do so. To this may be added the idea of a definite judgment, that is, that the action will at some time terribly matter to the helper and the helped.—G. K. Chesterton.

Itching Piles Permanently Cured by a Jar of Resinol Ointment.

About three weeks since I was suffering agony from itching piles, I got a sample jar of Resinol and after bathing with warm water and applying the Resinol, I was in a few days entirely relieved of the itching, and believe I am permanently cured.

W. W. Evans, Carrollton, Ky.

Wild Horses in Southwest.

Wild horses are found roaming in bands on the plains of New Mexico, Arizona, Nevada and California. Of 50 horses captured by rangers in the Modoc national forest, about half proved to be branded stock which had grown wild, the others being horses that had never known the ownership of man.

Important to Mothers.

Examine carefully every bottle of CASTORIA a safe and sure remedy for Infants and children, and see that it

Bears the Signature of *Chas. H. Fletcher*

In Use For Over 30 Years.
The Kind You Have Always Bought.

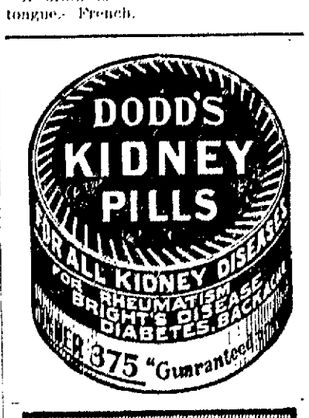

Occasionally you come across a man in public life whose silence is so intense you can almost hear it.

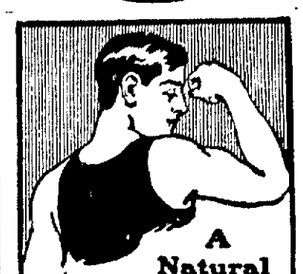

A little bottle of Hamlins Wizard Oil is a medicine chest in itself. It can be applied in a larger number of painful ailments than any other remedy known.

When a man is his own worst enemy he really doesn't need any others.

Dewar' Single Binder straight 5c cigar. You pay 10c for cigars not so good.

A brain is worth little without a tongue.—French.

A Natural Strength Giver

Ordinary tonics that merely supply food material and give artificial strength by stimulation are never lasting in their effects because they do not remove the *cause* of the ill health.

A "run down" conditon is generally due to the failure of the digestive organs to properly digest the food.

DR. D. JAYNE'S TONIC VERMIFUGE

tones up the stomach and other digestive organs, and restores their normal, healthy condition. Then the digestive organs supply the body with its full share of nourishment, and in this way build up *permanent health and strength.*

Sold by all druggists 2 sizes, 50c and 35c.

Dr. D. Jayne's Expectorant is an invaluable medicine for Coughs, Colds, Bronchitis, Croup, Whooping Cough, Pleurisy, etc.

Grand Rapids Tribune

BY DRUMB & SUTOR.

GRAND RAPIDS, WISCONSIN.

The earth is one big, hard, uncharted rock to the crippled aviator.

When the army balloon corps is organized high privates will be in demand.

Don't hesitate to tell the census taker your age. He has sworn to be discreet.

It is estimated that out of a population of 40,000,000 in Great Britain, 12,000,000 are either under or on the poverty line.

The world over Americans have a reputation for doing things. That's why the foreign aviators at Rheims accord Curtiss so much respect.

Society must be improving since the various scorching denunciations it has received. The news comes from Newport that there is a lobster famine there.

People may not be able to explain rationally the popular sympathy with a jury that declares a man insane who recites poetry, but the sympathy is there, all the same.

Women who have won farms in the government lottery can if unmarried doubtless get all the help they need for harvesting their crops without applying to the employment agencies.

The scramble for social prestige at Newport has caused a French visitor to revive an old Gaelic witticism: "I doubt if the people would take anything like so much trouble to get into heaven."

It has been estimated that 40 per cent. of the children under eight in the public schools of London drink alcoholic liquor "more or less regularly." And yet American children are called precocious.

The latest calculations on the course of Halley's comet, approaching the earth, exhibit no point of peril for aspiring aviators. Still, comets and flying machines both have been known to do things out of the day's run.

In Chicago they have started a school for tubercular children. Most of the sessions are held in the open air, and the children are said to act as if they were having a picnic. Their routine work takes in systematic care of the teeth, breathing exercises, gymnastics and the shower bath.

There is something very pathetic in the picture of the little shah of Persia trying to kill himself because, frightened at his lonely grandeur, he wants his parents. The emptiness of high royal honors in these stormy times strikes even to the soul of a child, when he has to pay for them with his human needs.

It might have been supposed that California had enjoyed her share of earthquakes; but now while Mexican cities are partly in ruins and Spain is reporting tremors, California will feel herself fortunate at having escaped with the shake of recent date, which was so gentle that there were people in San Francisco and San Jose who did not feel it.

In his brief experience of the business of ruling an awakened people, the Shah Mohamed Ali has probably learned that there are times when wise people do best to adopt the motto: "Anything for a quiet life." He has been offered a pension of $75,000 a year if he will restore the national jewels. The likelihood is that he will take the offer and retire into Russia.

The work of arresting chauffeurs—when they can be caught—and fining them for speeding goes merrily on, but with no appreciable diminution in the speeding. A little change in principle might work a great change in custom in this respect. If the automobile were arrested and fined and held for the payment of the fine things would soon wear a different aspect.

A new use was promptly found for the new Lincoln pennies. It seems, according to a Washington account, that they are in great demand by congressmen to present to babies in their districts, as the first issue will become in time rare coins. This use of the penny is significant in pointing the fact that in spite of its great achievements this is the age of small things—especially babies.

A New York magistrate wants the establishment of the whipping-post on account of the great number of wife-beating cases in his district. It is a pity that there is not the like official sympathy for ill-treated wives in this state, where the whipping-post has been established by law and practically nullified by the sympathy, for some occult reason, being given to the wife-beater instead of to his victim.

A curious source of wealth is reported by the French consul at Mongtze, in upper Tonkin. It lies in wood mines. The wood originally was a pine forest, which the earth swallowed in some cataclysm. They lie in a slanting direction and in sandy soil, which covers them to a depth of about eight yards. As the top branches are well preserved, it is thought the geological convulsion which buried them cannot be of very great antiquity. The wood furnished by these timber mines is imperishable and the Chinese buy it for coffins.

The people of San Francisco have set a good example in giving Capt. Amundsen's sloop Gjoa, which successfully navigated the historic northwest passage, a place in a pool in Golden Gate park, where she can float safely for the benefit of visitors of the future who have an interest in geographical achievements. This plan should be followed wherever possible for the preservation of historic war vessels like "Old Ironsides" where they can lie at rest while they receive care sufficient to keep them from falling into decay.

A Cleveland judge has ruled that dishwashing is no part of a husband's duties. His honor might learn something by investigating things in families of which the Main Works spends most of her time playing bridge.

Abdul Hamid was a failure as a sultan, but he beat the doctors. They wanted to operate on him for an abscess of the throat, but he declined to have a knife used upon him and then got well. Turkey is better off without him and he is better off without the operation.

DEATH LIST GROWS

DEAD IN TROPICAL HURRICANE NOW NUMBER 55 IN LOUISIANA.

PROPERTY LOSS ENORMOUS

Miles of Territory Laid Waste—Crops Practically Ruined — Telegraph Wires Are Still Down to Many Points.

New Orleans. — Fifty-five lives are known to have been lost and 55 others are reported to have perished in the tropical hurricane which starting last Sunday, continued throughout Monday and Monday night. The greatest loss of life occurred in Lower Terrebonne Parish. It is in this parish that 69 persons are said to be dead, but only 40 are authentically accounted for.

The property loss is far heavier than was first believed and instead of running into the hundreds of thousands will extend well into the millions by the time the final details are tallied.

Miles of territory have been laid waste and crops have been practically ruined.

New Orleans is still sadly crippled in the way of railroad facilities and telephone and telegraph communication with the outside world.

Terrebonne Parish, La., definite, 29; reported, 40.
New Orleans, definite, 5.
Frenier, La., definite, 4.
Deasir, La., definite, 2.

Donaldson, La., definite, 1.
Gramercy, La., definite, 1.
Grandpoint, La., reported, 4.
Pass Monachas, definite, 8.
Barataria Bay, La., reported, 1.

With 100 refugees from Grand Isle, a small island on the coast of Louisiana, about 60 miles south of New Orleans, the mail steamer Grand Isle brought the first news from Grand Isle and Cheniere Caminada, another island.

Not a life was lost on either island, but every head of live stock on both were swept into the gulf. The shrill cries of the frightened animals added to the terror of the panic-stricken inhabitants.

Fields and Groves Laid Flat.

Fields of cane were laid flat and several orange groves destroyed, the trees being broken off or uprooted, and those which were left standing were stripped of all the fruit and foliage. Property damage on these islands alone run into the thousands.

In 1893 both islands were swept by one of the worst storms in the history of the gulf and 1,500 lives lost on Cheniere Caminada.

Coast Is Wiped Clean.

Jacksonville, Miss.—The damage done by the hurricane in Mississippi was greatly exaggerated. There was comparatively small timber destruction, the yellow pine belt escaping almost entirely.

The crop damage, especially to cotton, was much smaller than indicated by early reports. The Mississippi Coast Traction Company's road of 18 miles, which cost $1,000,000, is almost a complete wreck. It runs between Long Beach and Biloxi.

Jackson, Miss.—A relief train sent south on the main line of the Illinois Central railroad from this city has reached Pass Monachas, where the bodies of eight persons, including the station agent, wife and children, were recovered. The victims were drowned in a tidal wave during the recent hurricane.

FIERCE BATTLE WITH REDS

Game Warden Attempts to Arrest Poaching Indians and Lively Fight Results.

Lansing, Mich.—State Game Warden Pierce received from Deputy Jack Rowett of Bessemer a report of a battle near the Wisconsin line between officers and a band of poaching Wisconsin Indians who had been killing deer and beaver in Michigan as their forefathers did before the white men established game laws.

Deputy Rowett reports that he went to the Indians' camp and after finding venison and beaver hides undertook to make an arrest. The six Indians, aided by their five squaws, attacked the deputy and his five men with guns and axes.

"The squaws were as bad as the men in the fight," reports Rowett, who adds that bloodshed is inevitable when he again attempts to arrest the red men.

Bishop Dunne Names Pastor.

Kewanee, Ill. — Bishop E. M. Dunne's first appointment since he became head of Peoria diocese was made when he appointed Rev. Francis W. Conrads, pastor of St. Joseph's parish here, to St. Anthony's church, Atkinson, Ill.

Canals on Mars Are Disappearing.

Boston. — A telegram received Wednesday by John Ritchie, Jr., from Prof. Percival Lowell at his observatory at Flagstaff, Ariz., states that recent observations show that the antarctic canals of Mars are disappearing.

Strikers and Officials Clash.

Omaha, Neb.—In a collision between the officers and deputy sheriffs and strikers' sympathizers Wednesday evening, William Betricek, 19 years old, a bystander, was shot and seriously wounded.

Thaw Loses Again.

Pittsburg, Pa.—Without comment on the petition, Judges Cohen, Swearingen and Carnahan handed down a decision Monday refusing to appoint a commission to determine if Harry K. Thaw is insane.

Decides Town Is "Wet."

Bristol, Va.—Judge Kelly decided the recent local option election was invalid and that the town is "wet." Preparation for opening several saloons is now under way. The "drys" will appeal.

Wheeling Beats the Pirates.

Wheeling, W. Va.—The Wheeling baseball team of the Central league won a one-sided contest from the Pittsburg team of the National league here Sunday by a score of 9 to 1. Few of the regulars of the Pittsburg club played.

Gets Life Sentence.

Marquette, Mich.—John E. Gibson, who killed a fellow soldier at Fort Brady, has been sentenced to a life term in the federal prison at Leavenworth, Kan.

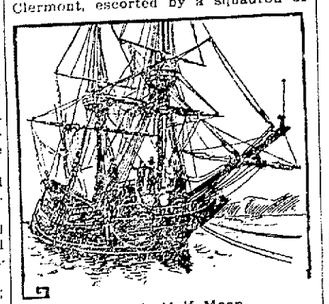

HUDSON CELEBRATION BEGUN

FETE OPENS WITH A GRAND NAVAL RENDEZVOUS.

Half Moon, Replica of Dutch Explorer's Vessel, Is Accompanied by That of Fulton's Clermont.

New York.—The Hudson-Fulton celebration, for which New York has been so long preparing, opened auspiciously Saturday with the formal recognition of the presence of the American and foreign naval vessels and official guests. The international naval fleet, comprising more than 70 vessels, was anchored in the Hudson river from Seventy-second street northward, and was an imposing sight.

At 10:29 o'clock in the morning the replica of Henry Hudson's little Half Moon and that of Robert Fulton's Clermont, escorted by a squadron of

Hudson's Half Moon.

torpedo boats, submarines, naval militia vessels and other craft, left the Kill Van Kull and proceeded to Stapleton, Staten Island, where the squadron was joined by the commanding officer of the naval parades. There was an interchange of civilities with citizens' committees here and at the Brooklyn shore, and at one o'clock the squadron started up the Hudson river.

As the bluff-bowed little Half Moon and the funny, splashing Clermont entered the river cannon boomed from shore batteries and warships and the immense throng along the shores and on innumerable vessels cheered mightily. Behind the two queer craft trailed a great merchant fleet that had assembled in the lower bay and that was divided into ten big squadrons.

The Half Moon and Clermont were received with elaborate ceremony at the official reviewing stand and landing stage at One Hundred and Tenth street, and there they will remain anchored during the entire celebration, open for the inspection of the public.

In the international naval fleet the United States has 53 vessels, including 16 battleships and six cruisers, commanded by Rear Admiral Seaton Schroeder. The Netherlands sent the Utrecht, under command of Capt. van Hecking Colenbrander, in addition to the replica of the Half Moon, which was a present from the people of Holland. Germany is represented by four vessels, Great Britain by four, France by three, Italy by two, and Mexico, Cuba, Argentina and Guatemala by one each.

In the evening the naval parade was repeated with illuminations, and then the doings on shore begin. For the next week New York will be the most brilliantly illuminated place in the world during the evenings. It is calculated that the electric lighting will have a grand total of approximately 26,260,000 candle power, this not including the vast number of advertising signs, and taking into account only Greater New York. A remarkable feature of the illumination is an immense battery of search lights on Riverside drive that will make the Hudson as light as day for miles each way.

DIPLOMAT'S SON MARRIED

Richard T. Crane III., Whose Father Is Minister to China, Weds Miss Ellen Bruce.

South Boston, Va.—Two well-known American families were united Wednesday when Richard T. Crane III. of Chicago was married to Miss Ellen Douglas Bruce at Berry Hill, the home of the Bruce family, near this town. The ceremony was simple, but pretty. The young couple will make their home in Chicago after a wedding trip to Europe.

Mr. Crane is the son of Charles R. Crane, recently appointed minister to China. He is connected with the Crance Company of Chicago, which was founded by his grandfather, R. T. Crane. Miss Bruce's father, the late Alexander Bruce, was a well-known Virginia capitalist. Berry Hill, the home of the family, is one of the show places of Halifax county. Miss Bruce is a sister of Malcombe Bruce, who married Miss Myrtle Heisen, daughter of C. C. Heisen of Chicago.

Missouri Soldier-Physician Dead.

Kansas City, Mo. — Major Joseph F. Hume, a pioneer Missouri physician, died here Tuesday, aged 87 years. He served through the civil war in the Missouri home guards rising to the rank of major.

Former Iowan Receives Appointment.

Washington.—Following the decision to widen the scope of the division of the state department, Secretary Knox has appointed Philip Patchen, a newspaper correspondent here and formerly of Iowa, as its head.

Internal Revenue Receipts Increase.

Washington.—There was an aggregate increase of $1,190,037 in internal revenue receipts for last month as compared with the corresponding period of 1908. The August, 1909, receipts aggregated $20,284,735.

Millionaire Arrested.

Nome, Alaska.—Jafet Lindberg, the California millionaire mine owner and discoverer of Nome, was arrested here on two indictments charging perjury in connection with the trial of the Bear Cub mining case. Lindberg was released under $3,000 bond.

Col. Lockwood Retires.

Washington.—Col. Daniel W. Lockwood, the second ranking officer in the corps of engineers, will be placed on the retired list on Tuesday on account of age.

Posse Kills Two Negroes.

Houston, Tex.—Two unidentified negroes were killed by posses in the man hunt near Sandy Point. The negro, Steve Hayes, slayer of Armour Munson, is surrounded in the lowlands and capture or death is certain.

Settle the Boundary Dispute.

Lapaz.—Minister of Foreign Affairs Bustamente and the Peruvian minister to Bolivia signed a protocol for the settlement of the differences that long have existed between Peru and Bolivia over the boundary.

POPPING THE QUESTION

Now

WHY HE HESITATES.

GOV. JOHNSON LAID AT REST

ALL BUSINESS CEASES DURING FUNERAL SERVICES.

Dead Executive's Body Buried Beside That of His Mother in Family Lot.

St. Peter, Minn. — The remains of John A. Johnson, governor of Minnesota, whose death the state and nation mourn, were brought Thursday to this, his home town, for interment. As honorary escorts there came on the train the state officers, the St. Paul lodge of Elks, and the Knights of Pythias. Almost the entire population of St. Peter met the train, for Gov. Johnson was deeply loved and respected by all his fellow citizens.

The active pallbearers selected from among the governor's closest personal friends. They were:

Frank A. Day, who was his private secretary; F. B. Lynch, T. D. O'Brien, associate justice of the supreme court; E. T. Young, former attorney general; A. C. Weiss, manager of the Duluth Herald, and John C. Wise of Mankato.

The honorary pallbearers included the four living ex-governors of the state, L. F. Hubbard, John Lind, Samuel R. Van Sant and Knute Nelson, with Gov. A. O. Eberhart, C. M. Start, chief justice of the supreme court; Gov. John Burk of North Dakota and President Cyrus Northrup of the University of Minnesota.

Final funeral services were held in the Presbyterian church and were conducted by Rev. R. E. Clarke. The body of the dead governor was then interred in the Johnson family lot in the St. Peter cemetery, beside that of his mother.

Throughout the entire state there was a cessation of business and manufacturing from 3 to 3:05 o'clock this afternoon. Every wheel ceased turning and cars stopped. The bells of all churches, public and private institutions were tolled from 9:15 to 10 a. m. and from 3 to 3:05 p. m.

CONGRESSMEN RETURN HOME

Leave Honolulu After a Tour of Inspection of the Hawaiian Islands.

Honolulu. — The party of United States congressmen that has been touring the Hawaiian islands left on the liner Mongolia for San Francisco. During their stay they made a thorough inspection of the roads of the archipelago, visiting the islands of Hawaii and Maui, and the volcanic island of Kasi. They inspected the Hilo breakwater, the Pearl Harbor naval site as well as many sugar plantations.

The congressmen were given an ovation as they boarded the ship for home, thousands of Americans and natives lining the wharf to see the visitors depart.

Congressman Albert F. Dawson of Iowa in an interview given out here says that the greatest need of the islands is improved transportation facilities with the main land of the United States, better roads, more railways and a safe harbor in each island of the group.

Mrs. Eddy Donates $5,000.

New York. — Mrs. Mary Baker G. Eddy has sent to the New York museum of safety and sanitation her check for $5,000. Mrs. Eddy stated that she did so in appreciation of the philanthropic efforts of the museum in the introduction of safety devices to minimize the accidents due to railway travel and the use of machinery.

Robert Hoe Is Dead.

London.—Robert Hoe, aged 70 years, head of R. Hoe & Company, printing press manufacturers of New York and London, died here after a short illness. Mr. Hoe had been in London several weeks on his annual visit. He suffered an acute attack of kidney trouble ten days ago and his death resulted.

Former Celebrated Actress Is Dead.

Burlington, N. J.—Mrs. Henry Chanfrau, formerly a celebrated actress, is dead at her home here, aged 79 years.

Shoots Woman and Self.

Kansas City, Mo.—William Jacobia, a real estate dealer of this city, 47 years old, shot and killed Mrs. S. F. Stoll at her home and then, running to his own home four blocks away, told his wife what he had done and killed himself in her presence.

Cholera Reaches Java.

Washington.—A telegram to the state department announces the appearance of cholera at Batavia, Java. There are no details as to the number of cases.

Escaped Leopard Causes Panic.

St. Paul, Minn.—A crowd of 300 persons was thrown into a panic when a leopard which was being exhibited in this city, broke from its cage. The animal attacked Martin Martinson, aged four years, and in the presence of the boy's father tore the boy's right arm almost from its socket and clawed one ear from the boy's head. The boy would have been killed had not Charles Reustrom, a blacksmith, rushed from his shop nearby and almost killed the beast with one blow with an ax.

INCREASE IN IMMIGRATION

Aliens Swell Population by More Than Half Million During Fiscal Year of 1909.

Washington. — A net increase of 573,551 in the population of the United States by the arrival and departure of aliens was scored during the last fiscal year, against an increase of 207,867 the previous year. There was a falling off in immigration from 782,870 aliens during the previous fiscal year to 751,786 the past year, and the total inward passenger movement, representing immigrant and non-immigrant aliens admitted, aliens debarred and United States citizens arrived, numbered 103,392.

The aliens residing abroad and making a merely temporary trip to the United States are classed as non-immigrant aliens. There were 324,695 aliens, including the non-immigrants, admitted into this country during the past fiscal year.

These figures are given in the August immigration report of the department of commerce and labor. During the fiscal year 944,235 aliens, including 192,449 non-immigrants, were admitted and 370,684 including 174,590 non-immigrants, departed from these shores. There were 10,411 aliens debarred and 2,124 returned after landing. Those likely to become a public charge figured most in this list.

The grand total of immigration, from the fiscal year ending September 30, 1820, up to and including the past fiscal year, is given as 26,852,723.

SENDS CURE BY WIRELESS

Surgeon at Naval Hospital Flashes Prescription and Advice to Patient Miles at Sea.

Washington. — Cured by wireless is the latest drama of real life written in the navy department records by the marine hospital service. Capt. Dean of the lightship off Nantucket shoals is the hero of the drama and he owes his life to the surgeons in charge of the naval hospital at Newport.

Capt. Dean got off his feet a couple of weeks ago and was consigned to the sick bed by his first mate. This old salt administered to him and prescribed quinine, calomel and whisky from the ship's medicine chest. But the captain got no better and the seas no smoother. He was in a pretty bad way when one of the crew thought of the wireless.

The operator began to call for the naval hospital at Newport. When he got an answer he told the shore operator of Capt. Dean's dangerous condition. A message was sent to the surgeon, who prescribed by wireless and cured the patient miles away.

THE VANDERBILTS BREAK

W. K., Jr., and Wife Sign Separation Agreement Despite Efforts of Relatives.

New York. — William K. Vanderbilt, Jr., donor of the Vanderbilt cup for automobile races, and his wife, formerly Miss Virginia Fair of San Francisco, have signed a separation agreement, according to a local newspaper. Mrs. Vanderbilt is now returning from Europe to America with her two children, Muriel and William K. Vanderbilt, III. It is expected that the separation will be formally announced as soon as Mrs. Vanderbilt reaches New York. Efforts of Mrs. O. H. P. Belmont, mother of Mr. Vanderbilt, and Mrs. Herman Oelrichs, sister of Mrs. Vanderbilt, to avert the separation were without success.

William E. Corey Optimistic.

Baltimore, Md.—President William E. Corey of the United States Steel corporation, in an interview, discussing the outlook for the iron and steel trade, takes an exceedingly optimistic view of business conditions and railroad expansion.

Gored to Death by Bull.

Sterling, Ill.—Thomas Davis, a farmer of Carroll county, was gored to death by a vicious bull and then his body partly consumed by hogs before his loss had been discovered.

Capture Alleged Robbers.

Lexington, Ky.—Two men giving their names as Arthur Long of this city, and James Gleason of Louisville, were captured here after four unsuccessful attempts to blow up the safe in the freight depot of the Queen & Crescent railroad.

More Land for Settlers.

Washington.—A total of 409,300 acres of land in Utah was to-day designated for settlement as coming within the enlarged homestead act by Acting Secretary of the Interior Pierce.

Japanese Laborers Released.

Washington.—All the Japanese laborers who, while returning from the canneries in Canada where they had been working during the summer, were held up by the United States immigration officers, have been ordered readmitted into this country.

Charges Spain Caused Trouble.

Tangier.—The foreign board has drawn up a protest against the action of Spain in the Riff territory, claiming this to be a breach of the Algeciras agreement.

PEARY IS AT HOME

LARGE CROWDS GREET EXPLORER AT EVERY STOP.

COOK IS GIVEN BANQUET

Tells His Story at a Dinner Given by the Arctic Club of America at the Waldorf-Astoria Hotel.

Portland, Me.—From the moment Commander Peary crossed the international boundary at Vanceboro, the eastern terminus of the Maine Central railroad, until he arrived at Portland his reception by the citizens of Maine amounted to a continuous ovation.

During the journey through eastern Maine Commander Peary was cordial and appreciative, although he appeared to be rather tired. At every station where the train stopped between Vanceboro and Old Town, there was a crowd of cheering country folk, who seemed to appreciate the fact that it was the first few hours that the commander was enjoying in his own land, with his own country's flag greeting him on every side.

New York.—With Commander Robert E. Peary seeking indeterminate seclusion at his Maine home and with Dr. Frederick A. Cook fully answering the most difficult questions of his doubters it was expected that the north pole controversy would be permitted to rest for a while, but this expectation is probably shattered by a dispatch from the train on which Peary was speeding to his summer home, saying that he is preparing an indictment of 30 counts against Dr. Cook, and that he will publish these categorical allegations very soon.

At a banquet tendered to Dr. Cook Thursday evening by the Arctic Club of America, at the Waldorf-Astoria, the Brooklyn explorer delivered a speech in which, after recounting the perils of those who have heretofore attempted to make the trip to the north pole, said:

"Now, gentlemen, I appeal to you as explorers and as men. Am I bound to appeal to any man for a license to look for the pole?

"Another criticism is the charge of our insufficient equipment. We have met this. You know that we had every possible aid to success in sledge traveling. A big ship is no advantage. An army of white men, who at best are nowices, is a distinct hindrance, while a cumbersome luxury of equipment is fatal to progress. We chose to live a life as simple as that of Adam and we forced the strands of human endurance to scientific limits. If you will reach the pole there is no other way.

"Now, as to the excitement of the press to force things of their own picking from important records into print: In reply to this I have taken the stand that I have already given a tangible account of our journey. It is as complete as the preliminary reports of any previous explorer. The data, the observations, the records, are of exactly the same character. Heretofore such evidence has been taken with faith and the complete record was not expected to appear for years, whereas we agree to deliver all within a few months.

"Now, gentlemen, about the pole. We arrived April 21, 1908. We discovered new land along the one hundred and second meridian between the eighty-fourth and the eighty-fifth parallel. Beyond this there was absolutely no life and no land. The ice was in large, heavy fields with few pressure lines. Our observations were sufficient to guarantee our claim. When taken in connection with the general record, you do not require this. I can see that, but this and all the other records will come to you in the due course of events.

"I cannot sit down without acknowledging to you, and to the living arctic explorers, my debt of gratitude for their valuable assistance. The report of this polar success has come with a sudden force, but in the present enthusiasm we must not forget the fathers of the art of polar travel. There is glory enough for all. There is enough to go to the graves of the dead and to the heads of the living."

Confesses to $150,000 Fire.

Indianapolis, Ind.—Otto Truhon, night watchman of the McDougal kitchen furniture factory, which with several houses in the neighborhood, was burned, confessed that he had set the factory on fire, according to the police. The loss was $150,000. Truhon is probably insane, the police say.

Floods Swallow 100 Lives.

Constantinople. — Torrential rains have caused the loss of 100 lives and the destruction of 500 houses at Homs, a town of northern Syria.

Two Killed, Ten Wounded.

Melilla.—A Spanish detachment reconnoitering in the environs of Souk Boni-Sicar, demolished a large number of houses. The Riffians opposed the Spanish advance. The Spanish had two killed and ten wounded in Wednesday's fighting. Gen. Marina, commander of the Spanish forces, attaches great importance to the occupation of Souk-Beni-Sicar, which is the meeting point of the various sections of the tribe and the headquarters of the anti-foreign movement.

Would-Be Murderer Suicides.

La Crosse, Wis.—After attempting to kill his father, William Schaefer, aged 27, one of the proprietors of a bakery, turned the revolver on himself and fired one shot, falling dead on the floor. Insanity is believed to have been the cause of the suicide and attempted murder.

Bomb Was Harmless.

El Paso, Tex.—It develops that there was no plot connected with the finding of a supposed bomb in Juarez, Mexico.

Fire Fatal to Fireman.

Topeka, Kan.—Fire destroyed the Otto Kuhne Preserving and Pickling works, causing a loss of $125,000. Harry Jones and H. C. Gurtlor, firemen, were injured by falling walls. Jones died later. Gurtlor will recover.

Engine Ditched; Five Hurt.

Huntington, W. Va.—Five men were injured, two probably fatally, when a Chesapeake & Ohio engine jumped the track and turned completely over into a ditch in the western limits of this city.

SEARS HAPPY AS FARMER

Former Head of Mail-Order House, Who Retired with $25,000,000, Works in Fields.

Chicago.—Richard W. Sears, who has retired from business with $25,000,000 made in 17 years, took charge of the threshing at his farm at Gray's Lake, Ill., the other day.

At five p. m. the man whose financial career would have been meteoric had it not been for his quiet way of doing things was out in the fields supervising the work that the 20 men who came an hour later were to accomplish before sundown. Wearing overalls and wide-brimmed straw hat, as if he were accustomed to them, Mr. Sears surveyed his model farm as if it were the only interest he had in life. He refused to turn from it and

Richard W. Sears.

look backward over the 17 years that have elapsed since he left his post as telegraph operator in Redwood Falls, Minn., to start the mail-order business that has grown into the greatest in the world.

"I'm awfully busy," he declared. "I have to look after the threshers and get this work done to-day. I haven't any time to talk about myself. Never did have," he added, with a merry twinkle of his eye.

"Farmer" Sears, who has announced that he intends to devote the rest of his time to his family and his farm, is only 45 years old. He was a telegraph operator of a wayside station when an eastern watch manufacturer sent him a watch with the privilege of returning it if he could not sell it. He found that he could sell that watch and many more. So large did the watch trade he established become that he resigned his position and went to Minneapolis.

Two years later he came to Chicago and began the business career that ended recently with the sale of his stock in Sears, Roebuck & Co., to a New York syndicate and his retirement with great wealth.

Mr. Sears' family is enjoying the farm life as much as the head of the house. His four children—two boys and two girls—have been reveling in rural domesticity and say they want to be farmers too.

HALL OF CHRIST IS UNIQUE

Aula Christi at Chautauqua, N. Y., Only Building of Its Kind in the World.

Chautauqua, N. Y.—The dedication of the Aula Christi or Hall of Christ—the only building of its kind in the world, took place recently in this city. The one who first proposed the idea 16 years ago, Bishop John H. Vincent, gave the dedication address.

This new building to be devoted exclusively to the study of Christ, was erected at a cost of about $40,000. The largest single contributions to its erection were $10,000 from the Massey estate in Toronto; $5,000 from Miss Helen Gould and $3,000 from the estate of N. T. Arnold. The last $12,000 for its completion was given by Chautauquans at a single meeting last year. The building is constructed of white Roman brick, stone, steel and white terra cotta. The windows are all of historic significance presenting in chronological order events in the life of Christ.

All the books which have been written upon the life Christ, including a very large library dealing with the interpretations of Christ, and Christ in ethics, in social science and in

Aula Christi, or Hall of Christ.

modern civilization, are soon to be collected in one room of this hall. In another room will be collected and placed in easily accessible files copies of all the engravings or other pictures of Christ which the art of ages has brought within reach. In charge of the library and engravings will be a curator. A beautiful main audience room will be used exclusively for appropriate meetings. Already these meetings are being held in the new building. Later courses in study are to be inaugurated in the life, words and deeds of Christ and in the results of his teachings. These courses are to be conducted for both old and young. A special service is to be held in this building at least once a month throughout the entire year.

Settled It.

"He is not a lover of dogs."
"How do you know?"
"He has never owned one."
"How do you know?"
"He says he has never used the 'Lost' column in a newspaper."

Perhaps.

"My wife is getting so she can cook."
"You are prejudiced in her favor."
"No I am not; she gave a tramp a piece of pie last week and he has been back for more three times."
"Perhaps he is after a hero medal."

Trust Troubles.

Oil Trust—Isn't it a shame they are hounding us, so. It makes me burn with indignation.

Ice Trust—It certainly is a frost for me.

Sugar Trust—And talking about sending me to jail, and I so used to refining influences!

Weather Note.

"He said she was the sunshine of his life."
"And now that they are married?"
"It's cloudy all the time."

AFTER SUFFERING TEN YEARS

Cured by Lydia E. Pinkham's Vegetable Compound

MARLTON, N.J.—"I feel that Lydia E. Pinkham's Vegetable Compound has given me new life. I suffered for ten years with serious female troubles, inflammation, ulceration, indigestion, nervousness, and could not sleep. Doctors gave me up, as they said my trouble was chronic. I was in despair, and did not care whether I lived or died, when I read about Lydia E. Pinkham's Vegetable Compound; so I began to take it, and am well again and relieved of all my suffering."—Mrs. George Jonny, Box 40, Marlton, N.J.

Lydia E. Pinkham's Vegetable Compound, made from native roots and herbs, contains no narcotics or harmful drugs, and to-day holds the record for the largest number of actual cures of female diseases we know of, and thousands of voluntary testimonials are on file in the Pinkham laboratory at Lynn, Mass., from women who have been cured from almost every form of female complaints, inflammation, ulceration, displacements, fibroid tumors, irregularities, periodic pains, backache, indigestion and nervous prostration. Every suffering woman owes it to herself to give Lydia E. Pinkham's Vegetable Compound a trial.

If you would like special advice about your case write a confidential letter to Mrs. Pinkham, at Lynn, Mass. Her advice is free, and always helpful.

The Root of Altruism.

The three eternal roots of altruistic energy are these: First, the principle of justice; that there is a moral law before which all men are equal, so that I ought to help my neighbor to his rights. Second, the principle of charity; that I owe infinite tenderness to any shape or kind of man, however unworthy or useless to the state. Third, the principle of free will, that I can really decide to help my neighbor, and am truly diagnosed if I do not do so. To this may be added the idea of a definite judgment; that he, that the action will at some time terribly matter to the helper and the helped.—G. K. Chesterton.

Itching Piles Permanently Cured by a Jar of Resinol Ointment.

About three weeks since I was suffering agony from itching piles, I got a sample jar of Resinol and after bathing with warm water and applying the Resinol, I was in a few days entirely relieved of the itching and believe I am permanently cured.

W. W. Evans, Carrollton, Ky.

Wild Horses in Southwest.

Wild horses are found roaming in bands on the plains of New Mexico, Arizona, Nevada and California. Of 50 horses captured by rangers in the Modoc national forest, about half proved to be branded stock which had grown wild, the others being horses that had never known the ownership of man.

Important to Mothers.

Examine carefully every bottle of CASTORIA a safe and sure remedy for infants and children, and see that it

Bears the Signature of *Chas. H. Fletcher*

In Use For Over 30 Years.
The Kind You Have Always Bought.

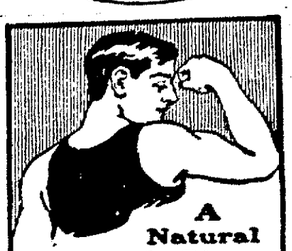

Occasionally you come across a man in public life whose silence is so intense you can almost hear it.

A little bottle of Hamlins Wizard Oil is a medicine chest in itself. It can be applied in a larger number of painful ailments than any other remedy known.

When a man is his own worst enemy he really doesn't need any others.

Lewis' Single Binder straight 5c cigar. You pay 10c for cigars not so good.

A brain is worth little without a tongue.—French.

A Natural Strength Giver

Ordinary tonics that merely supply food material and give artificial strength by stimulation are never lasting in their effects because they do not remove the *cause* of the ill health.

A "run down" conditon is generally due to the failure of the digestive organs to properly digest the food.

DR. D. JAYNE'S TONIC VERMIFUGE

tones up the stomach and other digestive organs, and restores their normal, healthy condition. Then the digestive organs supply the body with its full share of nourishment, and in this way build up ***permanent health and strength.***

Sold by all druggists 2 sizes, 50c and 35c.

Dr. D. Jayne's Expectorant is an invaluable medicine for Coughs, Colds, Bronchitis, Croup, Whooping Cough, Pleurisy, etc.

SYNOPSIS.

CHAPTER IX.—Continued

Blake picked a path along the edge of the rift where the most vegetation though crushed had refused to burn. After the first abrupt bend up which Blake had to drive his companion the ascent was easy. Then they climbed around an outjutting corner of the steep right wall of the cleft. Blake muttered a curse of disappointment. He could now see that the cleft did not run to the top of the cliff but through it, like a tiny box canon. The side rose sheer and smooth as walls. Midway at the blind point of the cleft, the baobab towered high above the ridge crest. Its prunelike trunk filled a third of the breadth of the little space. Unfortunately it stood close to the left wall.

"Here, Jack, for cow!" growled Blake. "Why couldn't the blamed old tree have grown on the other side? We might have found a way to climb it. Gee, we'll have to make out another leopard. We're no better than we were yesterday."

"Ex-cuse, look here!" exclaimed Winthrope. "This is our chance for antelope! Here by the spring are bamboos, real bamboo, and only half the thicket burned."

"What of them?" demanded Blake.

"Bows, arrows and did you not notice that they would make lances?"

"Umph! We'll see. What is it, Miss Jenny?"

"Isn't that a hole in the big tree?"

"Look like it. These baobab are often hollow."

"Perhaps that is where the leopard had his den," added Winthrope.

"Shouldn't wonder. We'll go and see."

"But Mr. Blake," protested the girl, "may there not be other leopard?"

"Might have been, but I'll bet they lit out with the other. Look how the tree is scorched. Must have been stacks of dry brush around the hole 'nough to smoke out a fireman. We'll look and see if they left any soup bones lying around. First, though, here's your drink, Miss Jenny."

As he spoke Blake kicked a tide one smouldering branches and led the way to the crevice whence the spring trickled from the rock into a shallow stone basin. When all had drunk their fill of the clear cool water Blake took up his club and walked straight across to the baobab. Less than 50 steps brought him to the narrow opening in the trunk of the huge tree. After he could make out nothing in the dimly lit interior, but the fetid, catty odor was enough to convince him that he had found the leopard's den.

He can tell the vague outlines of a long body crouched like six yards away on the far side of the hollow. He sprang back, his club brandished to strike. But the expected attack did not follow. Blake glanced about as though considering the advisability of a retreat. Winthrope and Miss Leslie were staring at him, while Jenny. The sight of their terror seemed to spur him to dare-devil bravado, though his actions may rather have been due to the fact that he realized the futility of flight, and so rose to the requirements of the situation—the grim need to stand and face the danger.

"Get behind the bamboos!" he called, and as they hurriedly obeyed, he caught up a stone and flung it in at the crouching beast.

He heard the missile strike with a soft thud that told him he had not missed his mark, and he swung up his club in both hands. Given half a chance he would smash the skull of the female as he had crushed her blinded mate. One moment after another passed, and he stood poised for the shock, tense and scowling. Not so much as a snarl came from within. The truth flashed upon him.

"Smothered!" he yelled.

The other saw him dart in through the hole. A moment later two limp gravish bodies were flung out into the open. Immediately after Blake reappeared, dragging the body of the mother leopard.

"It's all right; they're dead!" cried Winthrope, and he ran forward to look at the bodies.

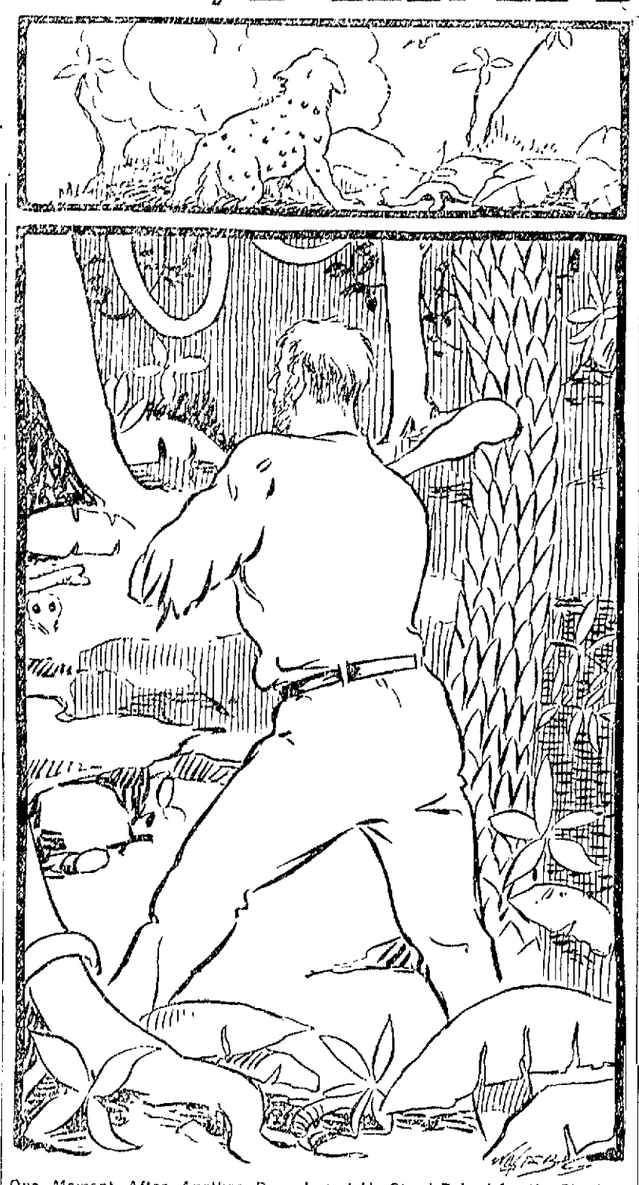

Miss Leslie followed, hardly less curious.

"Are they all dead, Mr. Blake?" she inquired.

"Wiped out—whole family. The old cat stayed by her kittens, and all smothered together—lucky for us! Get busy with those bamboos, Win. I'm going to have those skins and the sooner we get the cub meat hung up and curing, the better for us."

"Leopard meat again!" rejoined Winthrope.

"Spring leopard, young and tender! What more could you ask? Get a move on you."

One Moment After Another Passed, and He Stood Poised for the Shock.

"Can I do anything, Mr. Blake?" asked Miss Leslie.

"Hunt a shady spot."

"But I really mean it."

"Well, if that straight, you might go on along the gully, and see if there's any place to get to the top. You could pick up sticks on the way back, if any are left. We'll have to fumigate this tree hole before we adopt it for a residence."

"Will it be long before you finish with your with the bodies?"

"Well, now, look here, Miss Jenny; it's going to be a mess, and I wouldn't mind hauling the carcasses clear down the gully, out of sight. If it was to be the only time. But it's not, and you have got to get used to it, sooner or later. So we'll start now."

"I suppose it I must, Mr. Blake—Really I wish to help."

"Good. That's something like! Think you can learn to cook?"

"See what I did this morning."

Blake took the cord of cocoanut fiber which she held out to him, and tested its strength.

"Well, I'll be blessed!" he said. "This is something like. If you don't look out you'll make quite a camp-made Miss Jenny. But now, trot along. This is hardly arctic weather, and our ablution don't include a cold-storage plant. The sooner these lambs are dressed, the better."

CHAPTER X

Problems in Woodcraft.

IT WAS no pleasant sight that met Miss Leslie's gaze upon her return. The neatest of butchering can hardly be termed aesthetic, and Blake and Winthrope lacked both skill and tools. Between the penknife and an improvised blade of bamboo, they had flayed the two cubs and haggled off the flesh. The ragged strips, spitted on bamboo rods, were already searing in the fierce sun rays.

Miss Leslie would have slipped into the hollow of the baobab with her armful of fagots and brush; but Blake waved a bloody knife above the body of the mother leopard, and beckoned the girl to come nearer.

"Hold on a minute, please," he said. "What did you find out?"

Miss Leslie drew a few steps nearer, and forced herself to look at the revolting sight. She found it still more difficult to withstand the odor of the fresh blood. Winthrope was pale and nauseated. The sight of his distress caused the girl to forget her own loathing. She drew a deep breath, and succeeded in countering Blake's expectant look with a half-smile.

"How well are you getting along!" she exclaimed.

"Didn't think you could stand it. But you've got grit all right, if you are a lady," Blake said admiringly. "Say, you'll make it yet! Now, how about the gully?"

"There is no place to climb up. It runs along like this, and then slopes down. But there is a cliff at the end, as high as these walls."

"Twenty feet," muttered Blake. "Confound the luck. It isn't that jump off, but how in—how are we going to get up on the cliff? There's an everlasting lot of omelettes in those birds' nests. If only that bloomin'- bow's that, Win, me b'y?—that bloomin', blawsted baobab was on t'other side. The wood's almost soft as punk. We could drive in pegs, and climb up the trunk."

"There are other trees beyond it," remarked Miss Leslie.

"Then maybe we can shin up—"

"But the branches that overhang the cliff are too slender to bear any weight!"

"And it's too internally high to climb up to this overhanging baobab limb!"

"I say," ventured Winthrope, "if we had an ax, now, we might cut up one of the trees, and make a ladder."

"Oh, yes, and if we had a ladder, we might climb up the cliff!"

"But, Mr. Blake, is there not some way to cut down one of the trees? The tree itself would be a ladder if it fell in such a way as to lean against the cliff."

"There's only the penknife," answered Blake. "So I guess we'll have to scratch eggs off our menu card. Spring leopard for ours! Now, if you really want to help, you might scrape the soup bones out of your boudoir and fetch a lot more brush. I'll take a big fire to rid the hole of that cat smell."

"Will not the tree burn?"

"No, those hollow baobabs have green bark on the inside as well as out. Funny thing, that! We'd have to keep a fire going a long time to burn through."

"Yet it would burn in time?"

"Yes—but we're not going to—"

"Then why not burn through the trunk of one of those small trees, instead of chopping it down?"

"By-jiminy, Miss Jenny, you've got an American headpiece! Come on. Sooner we get the thing started, the better."

Neither Winthrope nor Miss Leslie was reluctant to leave the vicinity of the carcasses. They followed close after Blake, around the monstrous hole of the baobab. A little beyond it stood a group of slender trees, whose trunks averaged eight inches at the base. Blake stopped at the second one, which grew nearest to the seaward side of the cleft.

"Here's our ladder," he said. "Get some firewood. Pound the bushes, though, before you go poking into them. May be snakes here."

"Snakes!—oh!" cried Miss Leslie, and she stood shuddering at the danger she had already incurred.

The fire had burnt itself out on a bare ledge of rock between them and the baobab, and the clumps of dry brush left standing in this end of the cleft were very suggestive of snakes, now that Blake had called attention to the possibility of their presence.

He laughed at his hesitating companions. "Go on, go on! Don't squeal till you're bit! Most snakes hike out, if you give them half a chance. Take a stick each of you, and pound the bushes."

Thus urged, both started to work. But neither ventured into the thicker clumps. When they returned, with large armfuls of sticks and twigs, they found that Blake had used his axe to fell a handful of dry bark out in the sun, and was nursing it into a small fire at the base of the tree on the side next the cliff.

"Now, Miss Jenny, he directed, "you're to keep this going, not too big a fire, understand? Some time you can keep on fetching brush to fumigate your cat hole. It needs it, all right."

"Will not that be rather too much for Miss Le Ile?" asked Winthrope.

"Well, it should rather come and rub brains on the skins,—Indian tan, you know, or—"

"How can you mention such things before a lady?" protested Winthrope.

"Per your pardon, Miss Leslie! you see, I'm not much used to ladies' company. Anyway, you've got to see and hear about these things. And now I'll have to get the stirrups for Win's bamboo bows. Come on, Win. We've got that old tubby to peel, and a lot more be sides."

Miss Leslie's first impulse was to protest against being left alone, when at any moment some awful venomous serpent might come darting at her out of the brush or the crevices in the rocks. But her half-parted lips drew firmly together, and after a moment's hesitancy she forced herself to the task which had been assigned her. The fire, once started, required little attention. She could give most of her time to gathering brush for the fumigation of the leopard den.

She had collected quite a heap of fuel at the entrance of the hollow, when she remembered that the place would first have to be cleared of its accumulation of bones. A glance at her companions showed that they were in the midst of tasks even more revolting. It was certainly disagreeable to do such things, yet, as Mr. Blake had said, others had to do them. It was now her time to learn. She could see him smile at her hesitation.

Stung by the thought of his half-contemptuous pity, she caught up a forked stick, and forced herself to enter the tree cave. The stench met her like a blow. It nauseated and all but overpowered her. She stood for several moments in the center of the cavity, sick and faint. Had it been even the previous day she would have run out into the open air.

Presently she grew a little more accustomed to the stench, and began to rake over the soft, dry mold of the den floor with her forked stick. Bones!—who had ever dreamed of such a mess of bones?—big bones and little bones and skulls, old bones, dry and almost buried, moldy bones, bones still half-covered with bits of flesh and gristle—the remnants of the leopard family's last meal.

At last all were scraped out and flung in a heap, three or four yards away from the entrance. Miss Leslie looked at the result of her labor with a satisfied glance followed by a sigh of relief. Between the heat and her unwonted exercise, she was greatly fatigued. She stepped around to a shadier spot to rest.

With a start she remembered the fire.

When she reached it there were only a few dying embers left. She gathered dead leaves and shreds of fibrous inner bark, and knelt beside the dull coals to blow them into life. She could not bear the thought of having to confess her carelessness to Blake.

(TO BE CONTINUED)

Drudgery in the Kitchen.

The path of progress is clear. There is no more reason why the woman in modern civilization should scrub and cook and darn and dust than there is why these things should be done by men. The development of improved machinery and the growth of labor saving devices of all kinds will finally obviate the necessity of doing these things each day in each home through the land. Co-operation, which we are slowly learning to greet as a friend, will overcome the drudgery and make the life of a woman as enjoyable and eventful as that of the man.—Nearing and Watson in "Economics."

Their Marks.

"The seal or signet ring," said a jeweler, "once had a very practical use. In the Middle Ages, when nobody but the priests could write, men stamped documents with their signet rings, as the illiterate now make their marks.

"The signet rings of noblemen bore the owner's crest or arms. The rings of merchants bore intricate monograms, trademark or the like. There are certain old continental firms that preserve in cabinets the seal rings worn by their founders—rings whose seals are inscribed with the trademarks still in use."

Help us to remember that greater than any church or creed is kindness.

Acted Upon By Suggestion

That Thought May Produce Blister on Hand, Is Medical Fact.

It is not generally known that thought may produce a blister on the hand or an ulcer on the foot, as well as many other actual physical changes in one's organism which are little short of miraculous. I have no doubt that St. Francis of Assisi received the stigmata of the crucifixion on his hands and feet as historically described. I have no doubt, because its possibility has been put to the proof within the past few years, and by a friend of mine whom I will name, Prof. Krafft Ebing of Vienna told a young woman he would place a small fly plaster upon her which would produce a blister in a few hours. He actually only put a postage stamp upon the skin, without her knowledge, and covered it over so securely with bandages that she could not interfere with it. The blister appeared as suggested.—Frederick Peterson, M. D., in Collier's.

Not the Kind They'd Keep.

"Is your climate rather changeable?" asked the tourist.

"No, it isn't," answered the old settler who always contradicts. "If it was, don't you suppose we'd have changed it for something else years ago?"—Stray Stories.

Act as Spur to Man's Pride

Love and Belief Are Powerful Agents for Reformation.

Love and belief in a man can never hurt him. It will always act as a spur to his pride, which is invariably close to a man's love, whilst it has little or nothing to do with a woman's.

Even when the schoolboy falls in love with the little girl in pinafores, his first instinct is to acquit himself in her eyes in some magnificent way—to knock out some other boy, or intimidate a foe.

This instinct remains with men until they die, just as girls from the cradle or inspired by love seek beauty to appear lovely in the eyes of their adorers.

And the masculine pride and prowess and strength are what the wise girl will use in her desire to reform some man who is merely weak.

Nagging drives such men into the depths. Every look of derision, snub, insult, sinks the iron deeper into their souls.—Exchange.

Rare Gases in the Air.

Samples of pure air from a height of eight and one-half miles have been collected by Teisserence de Fort, the French investigator, in his observations on the rare gases, especially argon, neon and helium. The collecting apparatus—a vacuum tube drawn out to a fine point at one end—was carried up by a large sounding balloon. At the desired height an electromagnetic device operated by a barometer broke off the point admitting the air, and a few minutes later a second contact sent a battery current through a platinum wire around the broken end, melting the glass and sealing the tube. All samples thus obtained show argon and neon, no helium being found in air from above six miles.

PRESIDENT OPENS GUNNISON BORE

Taft Lets Waters Flow Into Uncompahgre Valley.

BIG PROJECT IS COMPLETED

Mountain Ridge Pierced by the Government in Order to Irrigate Beautiful, But Semi-Arid Tract in Colorado.

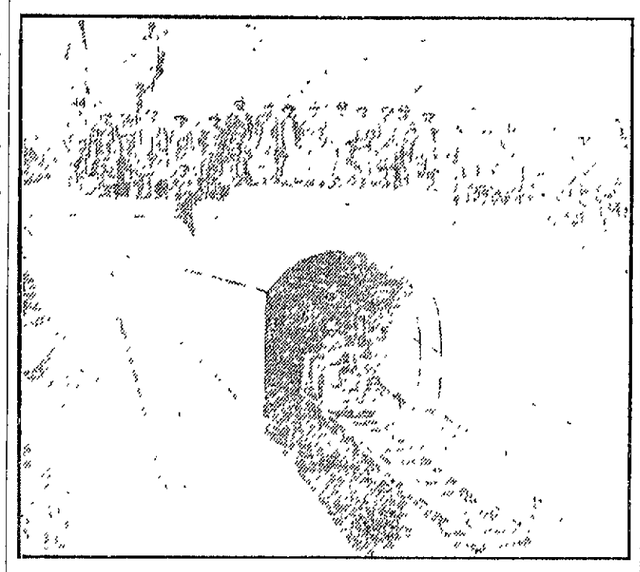

Montrose, Col., Sept. 22. President Taft, standing at the west portal of the great Gunnison river tunnel a little before five o'clock this afternoon pulled a lever, and with a mighty rush the waters of the river six miles away poured into the Uncompahgre valley in a life-giving flood.

Thousands of men and women who a moment before had stood in silent awe burst forth in wild cheering, cannon which had been captured by Colorado troops in Manila roared a salute, and brass bands added their patriotic music to the clamor.

Mighty Project Completed.

Thus was fittingly signalized the completion of the Gunnison river tunnel, the first project undertaken by the United States government reclamation service. Work on the project was begun four and a half years ago and had progressed steadily ever since. Together with its main and distributing canals, the tunnel will irrigate 150,000 acres of land in a valley naturally one of the most fertile in Colorado, but which has been semi-arid because of the annual summer droughts and the inadequacy of the Uncompahgre river.

This day of the opening of the tunnel was made the chief day of the Western Slope fair, now being held here. All the morning special trains kept coming in, from various parts of the state, and at 10:30 there was a parade of the visitors. Early in the afternoon the explosion of a bomb told the people that the special train bearing President Taft and other government officials had entered the city limits. A second bomb announced his

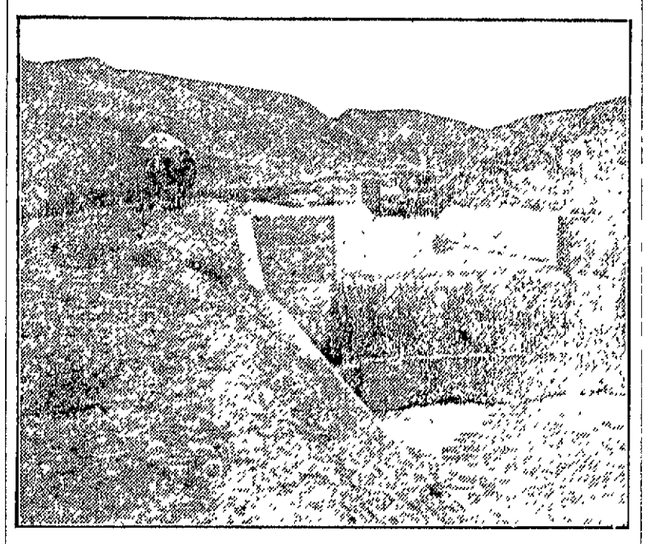

West Portal of Gunnison Tunnel.

arrival at the station, and a third was sent up as the distinguished guest, escorted by a great procession, started for Elks' park.

President Taft Welcomed.

At the park, after introductory remarks by F. D. Catlin, chairman of the Gunnison tunnel opening committee, Mayor J. Q. Allen turned the key of the city over to the guests. Then John C. Bell delivered the formal address of welcome, to which President Taft responded briefly and happily. The exercises here concluded with remarks by Senator Charles J. Hughes and Gov. John Shafroth. At four o'clock trains started for the west portal of the tunnel, where President Taft opened the gates, and speeches were made by I. W. McConnell, consulting engineer of the reclamation service, and Senator Horace T. DeLong of Grand Junction.

After the return to Montrose there was a reception to President Taft and

One of the Concrete Drops on South Canal.

to withstand the wear of ages. All the flumes, culverts, division gates, drops and other work along the lines of the main canals are built of steel and concrete.

There is no dam across the Black canyon at the point where the river is turned into the tunnel. Instead of this, the tunnel itself taps the river from beneath its granite bed. By this plan neither floods nor slack water can prevent the tunnel taking from the river all the water needed.

Has Immense Capacity.

A few statistics of this tremendous project are worth setting forth. The tunnel is 30,600 feet long, and 11 by 13 feet inside measurement. The main canal is 30 feet wide at the bottom and 83 feet wide at the top, and the average depth of the water is ten feet. The capacity is 1,300 cubic feet of water a second. After the water leaves the west portal of the tunnel it is conducted through 12 miles of canal to the Uncompahgre. There is a drop of 214 feet in this distance, and this great fall will be utilized for creating power. A series of concrete drops has been constructed and the immense body of water rushing over them is capable of generating at least 10,000 horse power, which will be utilized in lighting the entire Uncompahgre valley by electricity.

The cost of the tunnel and distributing canals is over $5,000,000, and perpetual water rights will be sold to actual settlers at about $35 an acre.

Teach Children to Swim.

Last year more than 32,000 children were taught to swim at the London public schools.

Why He Looked Harrassed.

The kind lady had just handed the hungry hobo a sandwich and a hunk of pie. "Poor man!" she said sympathetically. "Are you married?" "No'm," answered the h. h., "I got dis hunted look from bein' chased from place t' place by der police."

Useful African Tree.

While the seeds of the dorowa, an East African leguminous tree, are extensively used for food the pods and leaves form an excellent cement when mixed with crushed stone.

Can't Stand the Music.

A Munich servant girl has given notice to quit because she says that her mistress persists in playing classical music for a couple of hours every morning, although she has not the slightest notion how it should be interpreted.

To Avoid Death from Fright.

Death from fright in the first stages of ether and chloroform, before consciousness is lost, is best avoided by letting the patient hold and inhale the stuff himself.

The Funny Door.

"How children do coin words and phrases for a household," exclaimed the young mother. "When my little boy first began to talk he called every sort of opening a 'door.' It was an association of ideas for him and he applied it to everything. One night as his father took off his shoes a hole in his stocking was disclosed. 'Funny door! funny door!' exclaimed the little chap gleefully. And now in our family a hole in the stocking is always a 'funny door.'"

Gotham Displays Its Riches.

Nowhere in the world are the outward, visible evidences of wealth more impressive than in New York. The estimated value of the real estate in Gotham is about two and a quarter times greater than all the money in circulation in the United States.

When Bogota Is Dark.

There are times when, because of insufficient water power, it is not possible to supply electric light for both the houses and the streets in Bogota, Colombia, so the streets remain dark.

W.N.S FAME IN AIR

Glenn Curtiss Long Interested in Aviation.

Had Little Time to Prepare for Contest in Which He Captured International Aviation Cup. His Remarkable Capture.

New York, Sept. 22.—Glenn H. Curtiss, the pioneer American aviator, who has been engaged in the construction of aeroplanes for the past four years, was a happy man today. He had just received word from the committee in charge of the Scientific American trophy, which he had won on Saturday last, that he was the first to fly a mile in a heavier-than-air machine in this country. Curtiss had never heard of the trophy until he was told that he had won it, but he left to-night for Rheims, where he will try out for the international honors.

At first expected only minor difficulties, a wagon road was built to the east portal of the tunnel. It is 15 miles long and climbs the granite ridge between the canyon and the Uncompahgre valley, ascends the rocky wall on shelf work.

Bore Built for All Time.

Simultaneously work was begun at each end of the tunnel and at a point several thousand feet from the west end, where a shaft was sunk. As fast as the tunnel was driven through the shale and solid rock it was timbered, and then the heavy timber was covered with Imperviame cement. This gives a tunnel of solid concrete built to last.

Curtiss at Wheel of His Flying Machine.

the fee at Baddeck last winter was the June Bug. It was with that machine that Curtiss challenged for the Scientific American cup, and won in one minute 12 seconds. He was only required to go one kilometer, 621 of a mile.

When the Aerial Experiment association was disbanded last spring Mr. Curtiss directed his attention to making practical aeroplanes at Hammondsport, and the machine he has turned out embody many of the ideas gained from his work with the association.

The first machine which he completed was purchased by the Aero nautic society of New York city. Mr. Curtiss gave some creditable exhibitions with it at Morris park in July, and then began testing his flying experiments for the Hammond plain near Mineola, made his best flight on this country of 52 minutes 30 seconds on July 17 last, covering 29½ miles, which is now the record flight for the Scientific American cup for 1909.

Mr. Curtiss' machine which he took to Europe is practically a duplicate of the one he used here with the exception of the motor and therein lies the secret of his success. Instead of using a four-cylinder motor he built a special eight-cylinder one, water cooled. It develops 60 horse power and weighs complete about 200 pounds. He carries a thirteen-gallon gasoline tank and a three-gallon oil tank, the fuel weighing 60 pounds. The engine develops propeller thrust of 280 pounds, against 160 pounds on the old June Bug.

His machine, a biplane, is about 30 feet wide, with a total expanse of surface of 225 feet. The total weight of the entire machine ready for flight is 700 pounds, about 100 pounds heavier than the first machine used at Mineola.

It is interesting to note that Curtiss was the second choice of the Aero Club of America. Efforts had been made to induce one of the Wright brothers to represent America, but they declined on account of other duties. Mr. Curtiss was definitely notified of his acceptance by the Aero club within six weeks of his departure to Europe.

Wasp Stole His Dinner.

Cornelius V. Collins, the criminologist and superintendent of New York's state prisons, narrated at a dinner some reminiscences of his interesting work. "A clever criminal of gluttonous proclivities," he said, "once couched a complaint in rather neat terms. My inspector entering this man's cell one day, found it hot and stuffy. 'Why have you got your ventilator closed?' he asked. The burly and gluttonous prisoner answered plaintively: 'Well, inspector yer hon or the last time I had the ventilator open, a wasp flew in, you see, and carried off my dinner while my back was turned.'"

A Probable Solution.

"Why did they used to call writers of occasional verse fugitive poets?" asked the Sweet Young Thing of her journalistic lover.

"I suppose," replied the latter, "because the editors of those times got after 'em with bloodhounds."

Had to Match.

"I see, Ethel, you have taken quite a rosy view of the future in your graduating essay."

"I had to; you see, my graduating dress is trimmed with pink ribbons."

NOW ALL THE FAT WOMEN'S BACK

How to Make a Gas Log Better.

One of the Chautauqua fathers says: "Husbands, let your wives have an extra dollar now and then." He might have rendered a greater service to mankind by saying: "Wives, let your husbands have an extra dime occasionally without asking them to explain why they want the money."

COVERED WITH HIVES.

Child a Mass of Dreadful Sore, Itching, Irritating Humor for 2 Months—Little Sufferer in Terrible Plight.

Disease Cured by Cuticura.

"My six year old daughter had the dreadful disease called hives for two months. She became affected by playing with children who had it. By scratching she caused large sores which were irritating. Her body was a complete sore but it was worse on her arms and back. We employed a physician who left medicine but it did not help her and I tried several remedies but without avail. Seeing the Cuticura Remedies advertised, I thought I would try them. I gave her a hot bath daily with Cuticura Soap and anointed her body with Cuticura Ointment. The first treatment relieved the itching and in a short time the disease disappeared. Mrs. George L. Fridhoff, Warren, Mich., June 30 and July 13, 1908."

Potter Drug & Chem. Corp., Sole Props., Boston.

Fooled Them Thirteen Years.

Frank Nelson, former state superintendent of public instruction of Kansas, and Cap. Gilson, the veteran record clerk in Auditor Nations office, are great friends. Nelson is now president of a Minnesota college.

When Nelson was still in the state house he and Gilson had a talk one day about teaching school. "I was once a school teacher," volunteered Gilson.

"I bet you?" asked Nelson. "How long?"

"Yes, I fooled 'em 13 years," replied Cap.

"How in thar?" asked Nelson.

"Oh," said Cap, "I quit when teachers had to qualify." Kansas City Journal.

Where Sitting Bull Was.

Doane Robinson, head of the department of history of the state of South Dakota, says of Sitting Bull and the Custer massacre: "The Indians tell me that Sitting Bull was a medicine chief, that he was the greatest influence among the Sioux at that time by reason of his constant agitation against the whites, and that he did not personally engage in the fight against Custer, but that he was back on an elevation between the Little Big Horn and the Big Horn making medicine." Indian School Journal.

His Size Was Known.

"I want some collars and neckties for my husband," she shopped.

"Yes, madam?"

The clerk offered her the latest thing.

"What size are those?" asked the lady.

"Why, twelve and a half, madam!"

"How on earth did you guess that?"

"Ah," replied the clerk smiling, "gentlemen who let their wives select their collars and ties always take that size!"

THE DOCTOR'S WIFE

Agrees with Him About Food.

A trained nurse says: "In the practice of my profession I have found so many points in favor of Grape Nuts food that I unhesitatingly recommend it to all my patients.

"It is delicate and pleasing to the palate (an essential in food for the sick), and can be adapted to all ages, being softened with milk or cream for babies or the aged when deficiency of teeth renders mastication impossible. For fever patients or those on liquid diet I find Grape-Nuts and albumen water very nourishing and refreshing.

"This recipe is my own idea and is made as follows: Soak a teaspoonful of Grape-Nuts in a glass of water for an hour, strain and serve with the beaten white of an egg and a spoonful of fruit juice for flavouring. This affords a great deal of nourishment that even the weakest stomach can assimilate without any distress.

"My husband is a physician and he uses Grape Nuts himself and orders it many times for his patients.

"Personally I regard a dish of Grape-Nuts with fresh or stewed fruit as the ideal breakfast for anyone—well or sick."

In any case of stomach trouble, nervous prostration or brain fag, a 10 day trial of Grape-Nuts will work wonders toward nourishing and rebuilding and in this way ending the trouble.

"There's a Reason," and trial proves. Look in pkgs. for the famous little book, "The Road to Wellville."

Ever read the above letter? A new one appears from time to time. They are genuine, true, and full of human interest.

One Moment After Another Passed, and He Stood Poised for the Shock.

SYNOPSIS.

The story opens with the shipwreck of the steamer on which Miss Jenny Leslie, an American heiress, Lord Winthrope, an Englishman, and Tom Blake, a brusque American, were passengers. The three were found upon an uninhabited island and were the only ones not drowned. Blake recovered from a drunken spree. Blake, dressed on the boat, because of his roughness, became a hero as protector of the helpless pair. The Englishman was suing for the hand of Miss Leslie. Blake started to swim back to the ship to recover what was left. Blake returned safely. Winthrope missed his last match and a cigarette, for which he was rescued by Blake. Their first meal was a dead lion. The trio started a ten mile hike for higher land. Their first attacked them. Blake was compelled to carry Miss Leslie on account of weariness. He taunted Winthrope. They entered the jungle. That night was passed roosting high in a tree. The next morning they descended to the open again. All three constructed hats to shield them selves from the sun. They then feasted on mosquitoes, the only procurable food. Miss Leslie showed a liking for Blake, but detested his roughness. Led by Blake they established a home in some caves. Blake found a fresh water spring. Miss Leslie faced an unpleasant situation. They planned their campaign. Blake recovered his surveyor's magnifying glass, thus insuring fire. He started a jungle fire.

CHAPTER IX.—Continued.

Blake picked a path along the edge of the rill, where the moist vegetation, though scorched, had refused to burn. After the first abrupt ledge, up which Blake had to drag his companions, the ascent was easy. But as they climbed around an outjutting corner of the steep right wall of the cleft Blake muttered a curse of disappointment. He could now see that the cleft did not run to the top of the cliff, but through it, like a tiny box canyon. The sides rose sheer and smooth as walls. Midway, at the highest point of the cleft, the baobab towered high above the ridge crest, its gigantic trunk filling a third of the breadth of the little gorge. Unfortunately it stood close to the left wall.

"Here's luck for you!" growled Blake. "Why couldn't the blamed old tree have grown on the other side? We might have found a way to climb it. Guess we'll have to smoke out another leopard. We're no nearer those birds' nests than we were yesterday."

"By Jove, look here!" exclaimed Winthrope. "This is our chance for antelope! Here by the spring are bamboos—real bamboos—and only half the thicket burned."

"What of them?" demanded Blake.

"Bows—arrows—and did you not agree that they would make knives?"

"Umph—we'll see. What is it, Miss Jenny?"

"Isn't that a hole in the big tree?"

"Looks like it. These baobabs are often hollow."

"Perhaps that is where the leopard had his den," added Winthrope.

"Shouldn't wonder. We'll go and see."

"But, Mr. Blake," protested the girl, "may there not be other leopards?"

"Might have been; but I'll bet they lit out with the other. Look how the tree is scorched. Must have been stacks of dry brush around the hole, 'nough to smoke out a fireman. We'll look and see if they left any soup bones lying around. First, though, here's your drink, Miss Jenny."

As he spoke, Blake kicked aside some smouldering branches and led the way to the crevice whence the spring trickled from the rock into a shallow stone basin. When all had drunk their fill of the clear cool water Blake took up his club and walked straight across to the baobab. Less than 30 steps brought him to the narrow opening in the trunk of the huge tree. At first he could make out nothing in the dimly lit interior; but the fetid, catty odor was enough to convince him that he had found the leopards' den.

He caught the vague outlines of a long body, crouched five or six yards away, on the far side of the hollow. He sprang back, his club brandished to strike. But the expected attack did not follow. Blake glanced about as though considering the advisability of a retreat. Winthrope and Miss Leslie were staring at him, white-faced. The sight of their terror seemed to spur him to dare-devil bravado; though his actions may rather have been due to the fact that he realized the futility of flight, and so rose to the requirements of the situation—the grim need to stand and face the danger.

"Get behind the bamboos!" he called, and as they hurriedly obeyed, he caught up a stone and flung it in at the crouching beast.

He heard the missile strike with a soft thud that told him he had not missed his mark, and he swung up his club in both hands. Given half a chance he would smash the skull of the female as he had crushed her blinded mate. One moment after another passed, and he stood poised for the shock, tense and scowling. Not so much as a snarl came from within. The truth flashed upon him.

"Smothered!" he yelled.

The other saw him dart in through the hole. A moment later two limp grayish bodies were flung out into the open. Immediately after Blake reappeared, dragging the body of the mother leopard.

"It's all right; they're dead!" cried Winthrope, and he ran forward to look at the bodies.

Miss Leslie followed, hardly less curious.

"Are they all dead, Mr. Blake?" she inquired.

"Wiped out—whole family. The old cat stayed by her kittens, and all smothered together—lucky for us! Get busy with those bamboos, Win. I'm going to have these skins, and the sooner we get the cub meat hung up and curing, the better for us."

"Leopard meat again!" rejoined Winthrope.

"Spring leopard, young and tender! What 'more could you ask? Get a move on you."

"Can I do anything, Mr. Blake?" asked Miss Leslie.

"Hunt a shady spot."

"But I really mean it."

"Well, if that's straight, you might go on along the gully, and see if there's any place to get to the top. You could pick up sticks on the way back, if any are left. We'll have to fumigate this tree hole before we adopt it for a residence."

"Will it be long before you finish with your—with the bodies?"

"Well, now, look here, Miss Jenny; it's going to be a mess, and I wouldn't mind hauling the carcasses clear down the gully, out of sight, if it was to be the only time. But it's not, and you have got to get used to it, sooner or later. So we'll start now."

"I suppose, if I must, Mr. Blake—Really, I wish to help."

"Good. That's something like! Think you can learn to cook?"

"See what I did this morning."

Blake took the cord of cocoanut fiber which she held out to him, and tested its strength.

"Well, I'll be blessed!" he said. "This is something like. If you don't look out, you'll make quite a campmate, Miss Jenny. But now, trot along. This is hardly arctic weather, and our abattoir don't include a cold-storage plant. The sooner these lambs are dressed, the better."

CHAPTER X.

Problems in Woodcraft.

IT WAS no pleasant sight that met Miss Leslie's gaze upon her return. The neatest of butchering can hardly be termed aesthetic; and Blake and Winthrope lacked both skill and tools. Between the penknife and an improvised blade of bamboo, they had flayed the two cubs and haggled off the flesh. The ragged strips, spitted on bamboo rods, were already searing in the fierce sun-rays.

Miss Leslie would have slipped into the hollow of the baobab with her armful of fagots and brush; but Blake waved a bloody knife above the body of the mother leopard, and beckoned the girl to come nearer.

"Hold on a minute, please," he said. "What did you find out?"

Miss Leslie drew a few steps nearer, and forced herself to look at the revolting sight. She found it still more difficult to withstand the odor of the fresh blood. Winthrope was pale and nauseated. The sight of his distress caused the girl to forget her own loathing. She drew a deep breath, and succeeded in countering Blake's expectant look with a half-smile.

"How well are you getting along!" she exclaimed.

"Didn't think you could stand it. But you've got grit all right, if you are a lady," Blake said admiringly. "Say, you'll make it yet! Now, how about the gully?"

"There is no place to climb up. It runs along like this, and then slopes down. But there is a cliff at the end, as high as these walls."

"Twenty feet," muttered Blake. "Confound the luck. It isn't that jump-off; but how in—how are we going to get up on the cliff? There's an everlasting lot of omelettes in those birds' nests. If only that bloomin'—how's that, Win, me b'y?—that bloomin', blawsted baobab was on t'other side. The wood's almost soft as punk. We could drive in pegs, and climb up the trunk."

"There are other trees beyond it," remarked Miss Leslie.

"Then maybe we can shin up—"

"I fear the branches that overhang the cliff are too slender to bear any weight."

"And it's too infernally high to climb up to this overhanging baobab limb."

"I say," ventured Winthrope, "if we had an ax, now, we might cut up one of the trees, and make a ladder."

"Oh, yes; and if we had a ladder, we might climb up the cliff!"

"But, Mr. Blake, is there not some way to cut down one of the trees? The tree itself would be a ladder if it fell in such a way as to lean against the cliff."

"There's only the penknife," answered Blake. "So I guess we'll have to scratch eggs off our menu card Spring leopard for ours! Now, if you really want to help, you might scrape the soup bones out of your boudoir, and fetch a lot more brush. It'll take a big fire to rid the hole of that cat smell."

"Will not the tree burn?"

"No; these hollow baobabs have green bark on the inside as well as out. Funny thing, that! We'd have to keep a fire going a long time to burn through."

"Yet it would burn in time?"

"Yes; but we're not going to—"

"Then why not burn through the trunk of one of those small trees, instead of chopping it down?"

"By—heck, Miss Jenny, you've got an American headpiece! Come on. Sooner we get the thing started, the better."

Neither Winthrope nor Miss Leslie was reluctant to leave the vicinity of the carcasses. They followed close after Blake, around the monstrous hole of the baobab. A little beyond it stood a group of slender trees, whose trunks averaged eight inches at the base. Blake stopped at the second one, which grew nearest to the seaward side of the cleft.

"Here's our ladder," he said. "Get some firewood. Pound the bushes, though, before you go poking into them. May be snakes here."

"Snakes?—oh!" cried Miss Leslie, and she stood shuddering at the danger she had already incurred.

The fire had burnt itself out on a bare ledge of rock between them and the baobab, and the clumps of dry brush left standing in this end of the cleft were very suggestive of snakes, now that Blake had called attention to the possibility of their presence.

He laughed at his hesitating companions. "Go on, go on! Don't squeal till you're bit. Most snakes hike out, if you give them half a chance. Take a stick each of you, and pound the bushes."

Thus urged, both started to work. But neither ventured into the thicker clumps. When they returned, with large armfuls of sticks and twigs, they found that Blake had used his glass to light a handful of dry bark, out in the sun, and was nursing it into a small fire at the base of the tree, on the side next the cliff.

"Now, Miss Jenny," he directed, "you're to keep this going—not too big a fire—understand? Same time you can keep on fetching brush to fumigate your cat hole. It needs it, all right."

"Will not that be rather too much for Miss Leslie?" asked Winthrope.

"Well, if she'd rather come and rub brains on the skins,—Indian tan, you know,—or—"

"How can you mention such things before a lady?" protested Winthrope.

"Beg your pardon, Miss Leslie! you see, I'm not much used to ladies' company. Anyway, you've got to see and hear about these things. And now I'll have to get the strings for Win's bamboo bows. Come on, Win. We've got that old tabby to peel, and a lot more besides."

Miss Leslie's first impulse was to protest against being left alone, when at any moment some awful venomous serpent might come darting at her out of the brush or the crevices in the rocks. But her half-parted lips drew firmly together, and after a moment's hesitancy, she forced herself to the task which had been assigned her. The fire, once started, required little attention. She could give most of her time to gathering brush for the fumigation of the leopard den.

She had collected quite a heap of fuel at the entrance of the hollow, when she remembered that the place would first have to be cleared of its accumulation of bones. A glance at her companions showed that they were in the midst of tasks even more revolting. It was certainly disagreeable to do such things; yet, as Mr. Blake had said, others had to do them. It was now her time to learn. She could see him smile at her hesitation.

Stung by the thought of his half-contemptuous pity, she caught up a forked stick, and forced herself to enter the tree-cave. The stench met her like a blow. It nauseated and all but overpowered her. She stood for several moments in the center of the cavity, sick and faint. Had it been even the previous day, she would have run out into the open air.

Presently she grew a little more accustomed to the stench, and began to rake over the soft, dry mold of the den floor with her forked stick. Bones!—who had ever dreamed of such a mess of bones?— big bones and little bones and skulls; old bones, dry and almost buried; moldy bones; bones still half-covered with bits of flesh and gristle—the remnants of the leopard family's last meal.

At last all were scraped out and flung in a heap, three or four yards away from the entrance. Miss Leslie looked at the result of her labor with a satisfied glance, followed by a sigh of relief. Between the heat and her unwonted exercise, she was greatly fatigued. She stepped around to a shadier spot to rest.

With a start she remembered the fire.

When she reached it there were only a few dying embers left. She gathered dead leaves and shreds of fibrous inner bark, and knelt beside the dull coals to blow them into life. She could not bear the thought of having to confess her carelessness to Blake.

(TO BE CONTINUED.)

Drudgery in the Kitchen.

The path of progress is clear. There is no more reason why the woman in modern civilization should scrub and cook and darn and dust than there is why these things should be done by men. The development of improved machinery and the growth of labor saving devices of all kinds will finally obviate the necessity of doing these things each day in each home through the land. Co-operation, which we are slowly learning to greet as a friend, will overcome the drudgery and make the life of a woman as enjoyable and eventful as that of the man.—Nearing and Watson in "Economics."

Their Marks.

"The seal or signet ring," said a jeweler, "once had a very practical use. In the Middle Ages, when nobody but the priests could write, men stamped documents with their signet rings, as the illiterate now make their marks.

"The signet rings of noblemen bore the owner's crest or arms. The rings of merchants bore intricate monograms, trademark or the like. There are certain old continental firms that preserve in cabinets the seal rings worn by their founders—rings whose seals are inscribed with the trademarks still in use."

Help us to remember that greater than any church or creed is kindness.

Acted Upon By Suggestion

That Thought May Produce Blister on Hand, Is Medical Fact.

It is not generally known that thought may produce a blister on the hand or an ulcer on the foot, as well as many other actual physical changes in one's organism which are little short of miraculous. I have no doubt that St. Francis of Assisi received the stigmata of the crucifixion on his hands and feet as historically described. I have no doubt, because its possibility has been put to the proof within the past few years, and by a friend of mine whom I will name, Prof. Krafft Ebing of Vienna told a young woman he would place a small fly plaster upon her which would produce a blister in a few hours. He actually only put a postage stamp upon the skin, without her knowledge, and covered it over so securely with bandages that she could not interfere with it. The blister appeared as suggested.—Frederick Peterson, M. D., in Collier's.

Not the Kind They'd Keep.

"Is your climate rather changeable?" asked the tourist.

"No, it isn't," answered the old settler who always contradicts. "If it was, don't you suppose we'd have changed it for something else years ago?"—Stray Stories.

Act as Spur to Man's Pride

Love and Belief Are Powerful Agents for Reformation.

Love and belief in a man can never hurt him. It will always act as a spur to his pride, which is invariably close to a man's love, whilst it has little or nothing to do with a woman's. Even when the schoolboy falls in love with the little girl in pinafores, his first instinct is to acquit himself in her eyes in some magnificent way—to knock out some other boy, or intimidate a foe.

This instinct remains with men until they die, just as girls from the cradle or inspired by love seek beauty to appear lovely in the eyes of their adorers.

And the masculine pride and prowess and strength are what the wise girl will use in her desire to reform some man who is merely weak.

Nagging drives such men into the depths. Every look of derision, snub, insult, sinks the iron deeper into their souls.—Exchange.

Rare Gases in the Air.

Samples of pure air from a height of eight and one-half miles have been collected by Teisserence de Fort, the French investigator, in his observations on the rare gases, especially argon, neon and helium. The collecting apparatus—a vacuum tube drawn out to a fine point at one end—was carried up by a large sounding balloon. At the desired height an electromagnetic device operated by a barometer broke off the point admitting the air, and a few minutes later a second contact sent a battery current through a platinum wire around the broken end, melting the glass and sealing the tube. All samples thus obtained show argon and neon, no helium being found in air from above six miles.

PRESIDENT OPENS GUNNISON BORE

Taft Lets Waters Flow Into Uncompahgre Valley.

BIG PROJECT IS COMPLETED

Mountain Ridge Pierced by the Government in Order to Irrigate Beautiful, But Semi-Arid Tract in Colorado.

Montrose, Col., Sept. 23.—President Taft, standing at the west portal of the great Gunnison river tunnel a little before five o'clock this afternoon, pulled a lever, and with a mighty rush the waters of the river six miles away poured into the Uncompahgre valley in a life-giving flood.

Thousands of men and women who a moment before had stood in silent awe burst forth in wild cheering, cannon which had been captured by Colorado troops in Manila roared a salute, and brass bands added their patriotic music to the clamor.

Mighty Project Completed.

Thus was fittingly signalized the completion of the Gunnison river tunnel, the first project undertaken by the United States government reclamation service. Work on the project was begun four and a half years ago and had progressed steadily ever since. Together with its main and distributing canals, the tunnel will irrigate 150,000 acres of land in a valley naturally one of the most fertile in Colorado, but which has been semi-arid because of the annual summer droughts and the inadequacy of the Uncompahgre river.

This day of the opening of the tunnel was made the chief day of the Western Slope fair, now being held here. All the morning special trains kept coming in, from various parts of the state, and at 10:30 there was a parade of the visitors. Early in the afternoon the explosion of a bomb told the people that the special train bearing President Taft and other government officials had entered the city limits. A second bomb announced his debarkation at the station, and a third was sent up as the distinguished guest, escorted by a great procession, started for Elks' park.

President Taft Welcomed.

At the park, after introductory remarks by F. D. Catlin, chairman of the Gunnison tunnel opening committee, Mayor J. Q. Allen turned the key of the city over to the guests. Then John C. Bell delivered the formal address of welcome, to which President Taft responded briefly and happily. The exercises here concluded with remarks by Senator Charles J. Hughes and Gov. John Shafroth. At four o'clock trains started for the west portal of the tunnel, where President Taft opened the gates, and speeches were made by I. W. McConnell, consulting engineer of the reclamation service, and Senator Horace T. DeLong of Grand Junction.

After the return to Montrose there was a reception to President Taft and others, and this evening speeches were delivered by a number of well-known Coloradoans, the celebration winding up with an illuminated parade and pyrotechnic display.

First of the big government reclamation projects to be undertaken, the Gunnison river tunnel has been one of the most difficult to carry through. The ample waters of the Gunnison flow through narrow valleys unsuited to agriculture or through deep, rocky canyons, while only a few miles to the west the lovely Uncompahgre valley has been suffering for water. The Gunnison, descending in ever deepening gorges, finally plunges into the Black canyon, one of the most magnificent mountain gorges in the world. This unpromising spot was selected as the starting point of the tunnel. Brave engineers lowered themselves into the Black canyon at points where the granite walls rise almost perpendicularly hundreds of feet, and after their surveys were completed active work was started on the immense project.

At great expense and under enormous difficulties, a wagon road was built to the east portal of the tunnel. It is 15 miles long, and, climbing the granite ridge between the canyon and the Uncompahgre valley, descends the rocky wall on shelf-work.

Bore Built for All Time.

Simultaneously work was begun at each end of the tunnel and at a point several thousand feet from the west end, where a shaft was sunk. As fast as the tunnel was driven through the shale and solid rock, it was timbered, and then the heavy timbers were covered with impervious cement. This gives a tunnel of solid concrete built to withstand the wear of ages. All the flumes, culverts, division gates, drops and other work along the lines of the main canals are built of steel and concrete.

There is no dam across the Black canyon at the point where the river is turned into the tunnel. Instead of this, the tunnel itself taps the river from beneath its granite bed. By this plan neither floods nor slack water can prevent the tunnel taking from the river all the water needed.

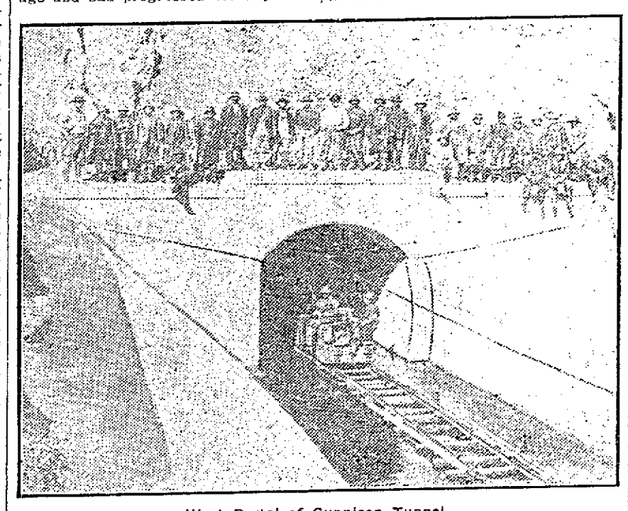

Has Immnse Capacity.

A few statistics of this tremendous project are worth setting forth. The tunnel is 30,600 feet long, and 11 by 13 feet inside measurement. The main canal is 30 feet wide at the bottom and 83 feet wide at the top, and the average depth of the water is ten feet. The capacity is 1,300 cubic feet of water a second. After the water leaves the west portal of the tunnel it is conducted through 12 miles of canal to the Uncompahgre. There is a drop of 214 feet in this distance, and this great fall will be utilized for creating power. A series of concrete drops has been constructed and the immense body of water rushing over them is capable of generating at least 10,000 horse power which will be utilized in lighting the entire Uncompahgre valley by electricity.

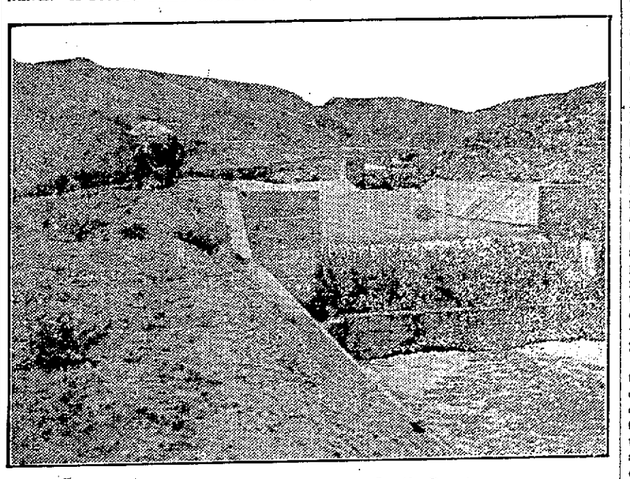

The cost of the tunnel and distributing canals is over $5,000,000, and perpetual water rights will be sold to actual settlers at about $35 an acre.

Teach Children to Swim.

Last year more than 32,000 children were taught to swim at the London public schools.

West Portal of Gunnison Tunnel.

One of the Concrete Drops on South Canal.

Why He Looked Harrassed.

The kind lady had just handed the hungry hobo a sandwich and a hunk of pie. "Poor man!" she said sympathetically. "Are you married?" "No'm," answered the h. h., "I got dis hunted look from bein' chased from place t' place by der police."

Useful African Tree.

While the seeds of the dorowa, an East African leguminous tree, are extensively used for food the pods and leaves form an excellent cement when mixed with crushed stone.

Can't Stand the Music.

A Munich servant girl has given notice to quit because she says that her mistress persists in playing classical music for a couple of hours every morning, although she has not the slightest notion how it should be interpreted.

To Avoid Death from Fright.

Death from fright in the first stages of ether and chloroform, before consciousness is lost, is best avoided by letting the patient hold and inhale the stuff himself.

The Funny Door.

"How children do coin words and phrases for a household," exclaimed the young mother. "When my little boy first began to talk he called every sort of opening a 'door.' It was an association of ideas for him and he applied it to everything. One night as his father took off his shoes a hole in his stocking was disclosed. 'Funny door! funny door!' exclaimed the little chap gleefully. And now in our family a hole in the stocking is always a 'funny door.'"

Gotham Displays Its Riches.

Nowhere in the world are the outward, visible evidences of wealth more impressive than in New York. The estimated value of the real estate in Gotham is about two and a quarter times greater than all the money in circulation in the United States.

When Bogota Is Dark.

There are times when, because of insufficient water power, it is not possible to supply electric light for both the houses and the streets in Bogota, Colombia, so the streets remain dark.

W.NS FAME IN AIR

Glenn Curtiss Long Interested in Aviation.

Had Little Time to Prepare for Contest in Which He Captured International Aviation Cup—His Remarkable Biplane.

New York.—By his achievement in winning the International Aviation Cup at Rheims recently, Glenn H. Curtiss has jumped into world-wide renown in aerial circles. That his victory was a surprise even to his closest friends in this country is expressing it mildly. When Mr. Curtiss left for France on August 5 his machine had never been tried out, and he admitted that he was afraid he was taking a big chance with the limited time left him to get in condition at Rheims and try out his motor thoroughly. But after two or three days' tuning up on the field the machine performed admirably at every appearance, and when he established a world's record for speed at eight minutes 32 2-5 seconds for the circuit his American friends predicted that he would win, and he became a favorite at Rheims.

If there is one thing that Curtiss does know thoroughly it is something about motors. He was an enthusiastic motor cyclist a few years ago, and held many speed records. He has been manufacturing motor bicycles for several years at his factory in Hammondsport, N. Y. Quickly realizing the future of aerial flight, he was one of the earliest in America to devote careful attention to the manufacture of aero motors. He was invited by Prof. Alexander Graham Bell to become one of the six members of the latter's Aerial Experiment association, and with the exception of the experiments carried on at Baddeck, Nova Scotia, last winter, the greater part of their work in solving problems of aerial flight was done at Hammondsport. It was there that the four aeroplanes designed by members of the association were built and tried out. The third machine, which was the most notable previous to the long-distance flights of the Silver Dart over the ice at Baddeck last winter was the June Bug. It was with that machine that Curtiss challenged for the Scientific American cup, and won in one minute 42 seconds. He was only required to go one kilometer, .621 of a mile.

Curtiss at Wheel of His Flying Machine

When the Aerial Experiment association was disbanded last spring Mr. Curtiss directed his attention to making practical aeroplanes at Hammondsport, and the machines he has turned out embody many of the ideas gained from his work with the association.

The first machine which he completed was purchased by the Aeronautic society of New York city. Mr. Curtiss gave some creditable exhibitions with it at Morris park in July, and then transferring his flying experiments to the Hempstead plains, near Mineola, made his best flight in this country of 52 minutes 30 seconds on July 17 last, covering 29½ miles, which is now the record flight for the Scientific American cup for 1908.

Mr. Curtiss' machine which he took to Europe is practically a duplicate of the one he used here with the exception of the motor and therein lies the secret of his success. Instead of using a four-cylinder motor he built a special eight-cylinder one, water cooled. It develops 60 horse power, and weighs complete about 200 pounds. He carries a thirteen-gallon gasoline tank and a three-gallon oil tank, the fuel weighing 60 pounds. The engine develops propeller thrust of 280 pounds, against 160 pounds on the old June Bug.

His machine, a biplane, is about 30 feet wide, with a total expanse of surface of 225 feet. The total weight of the entire machine ready for flight is 700 pounds, about 100 pounds heavier than the first machine used at Mineola.

It is interesting to note that Curtiss was the second choice of the Aero Club of America. Efforts had been made to induce one of the Wright brothers to represent America, but they declined on account of other duties. Mr. Curtiss was definitely notified of his acceptance by the Aero club within six weeks of his departure to Europe.

Wasp Stole His Dinner.

Cornelius V. Collins, the criminologist and superintendent of New York's state prisons, narrated at a dinner some reminiscences of his interesting work. "A clever criminal of gluttonous proclivities," he said, "once couched a complaint in rather neat terms. My inspector, entering this man's cell one day, found it hot and stuffy. 'Why have you got your ventilator closed?' he asked. The burly and gluttonous prisoner answered plaintively: 'Well, inspector, yer hon or, the last time I had the ventilator open, a wasp flew in, you see, and carried off my dinner while my back was turned.'"

A Probable Solution.

"Why did they used to call writers of occasional verse fugitive poets?" asked the Sweet Young Think of her journalistic lover.

"I suppose," replied the latter, "because the editors of those times got after 'em with bloodhounds."

Had to Match.

"I see, Ethel, you have taken quite a rosy view of the future in your graduating essay."

"I had to; you see, my graduating dress is trimmed with pink ribbons."

NEW STRENGTH FOR WOMEN'S BACKS.

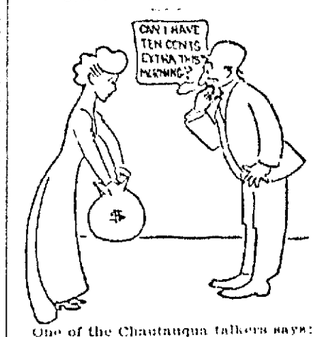

How to Make a Bad Back Better.

Women who suffer with backache, bearing down pains, dizzy spells and that constant feeling of weakness and tired out, will find hope in the account of Mrs. Mary Hewson of 21 Strother St., Mt. Sterling, Ky. "Had I not used Doan's Kidney Pills, I believe I would not be living today," says Mrs. Hewson. "My eyesight was poor, I suffered with nervous, splitting headaches, spots would dance before my eyes and at times I would be too dizzy I would have to grasp something for support. My back was so weak and painful I could hardly bend over to button my shoes and could not get around without suffering severely. Doan's Kidney Pills helped me from the first, and I continued until practically well again."

Remember the name—Doan's. Sold by all dealers, 50 cents a box. Foster-Milburn Co., Buffalo, N. Y.

CHAUTAUQUA WISDOM.

One of the Chautauqua talkers says: "Husbands, let your wives have an extra dollar now and then." He might have rendered a greater service to mankind by saying: "Wives, let your husbands have an extra dime occasionally without asking them to explain why they want the money."

COVERED WITH HIVES.

Child a Mass of Dreadful Sore, Itching, Irritating Humor for 2 Months—Little Sufferer in Terrible Plight.

Disease Cured by Cuticura.

"My six year old daughter had the dreadful disease called hives for two months. She became affected by playing with children who had it. By scratching she caused large sores which were irritating. Her body was a complete sore but it was worse on her arms and back. We employed a physician who left medicine but it did not help her and I tried several remedies but without avail. Seeing the Cuticura Remedies advertised, I thought I would try them. I gave her a hot bath daily with Cuticura Soap and anointed her body with Cuticura Ointment. The first treatment relieved the itching and in a short time the disease disappeared. Mrs. George L. Fridhoff, Warren, Mich., June 30 and July 13, 1908."

Potter Drug & Chem. Corp., Sole Props., Boston.

Fooled Them Thirteen Years.

Frank Nelson, former state superintendent of public instruction of Kansas, and "Cap." Gibson, the veteran record clerk in Auditor Nation's office, are great friends. Nelson is now president of a Minnesota college.

When Nelson was still in the state house he and Gibson had a talk one day about teaching school. "I was once a school teacher," volunteered Gibson.

"Is that so?" asked Nelson. "How long?"

"Yes, I fooled 'em 13 years," replied "Cap."

"How is that?" asked Nelson.

"Oh," said "Cap," "I quit when teachers had to qualify."—Kansas City Journal.

Where Sitting Bull Was.

Doane Robinson, head of the department of history of the state of South Dakota, says of Sitting Bull and the Custer massacre: "The Indians tell me that Sitting Bull was a medicine chief; that he was the greatest influence among the Sioux at that time by reason of his constant agitation against the whites, and that he did not personally engage in the fight against Custer, but that he was back on an elevation between the Little Big Horn and the Big Horn making medicine."—Indian School Journal.

His Size Was Known.

"I want some collars and neckties for my husband!" she chapped.

"Yes, madam."

The clerk offered her the latest thing.

"What size are these?" asked the lady.

"Why, twelve and a half, madam!"

"How on earth did you guess that?"

"Ah," replied the clerk, smiling, "gentlemen who let their wives select their collars and ties always take that size!"

THE DOCTOR'S WIFE

Agrees with Him About Food.

A trained nurse says: "In the practice of my profession I have found so many points in favor of Grape-Nuts food that I unhesitatingly recommend it to all my patients.

"It is delicate and pleasing to the palate (an essential in food for the sick), and can be adapted to all ages, being softened with milk or cream for babies or the aged when deficiency of teeth renders mastication impossible. For fever patients or those on liquid diet I find 'Grape-Nuts and albumen water very nourishing and refreshing.'

"This recipe is my own idea and is made as follows: Soak a teaspoonful of Grape-Nuts in a glass of water for an hour, strain and serve with the beaten white of an egg and a spoonful of fruit juice for flavouring. This affords a great deal of nourishment that even the weakest stomach can assimilate without any distress.

"My husband is a physician and he uses Grape-Nuts himself and orders it many times for his patients.

"Personally I regard a dish of Grape-Nuts with fresh or stewed fruit as the ideal breakfast for anyone—well or sick."

In any case of stomach trouble, nervous prostration or brain fag, a 10 day trial of Grape-Nuts will work wonders toward nourishing and rebuilding and in this way ending the trouble.

"There's a Reason," and trial proves.

Look in pkgs. for the famous little book, "The Road to Wellville."

Ever read the above letter? A new one appears from time to time. They are genuine, true, and full of human interest.

Big Cranberry Trade

Chicago, Sept. 17.—Cape Cod cranberries have arrived freely for the season, and despite the extreme heat this week—worse than the worst summer weather—a pretty good trade was reported. Charles Schlosser of the National Fruit Exchange says the demand has been surprisingly good. The Exchange's shipments for local use and reshipping—about a dozen cars to date—have cleaned up promptly at steady prices. He says dealers are taking the berries readily, and it now looks like Early Blacks would go out uninterruptedly at at least $6.50, Chicago basis, or $6 as the Cape price. The quotation for the best colored berries here this week was $5. Mr. Schlosser says latest advices confirm the early reports from Wisconsin that the frost cut the crop fully 50 per cent. The weather since then has been favorable for the maturity of the berries and what are left promise good quality. They are now picking and show pretty good color.

E. L. Hasler says he looks for a lull in the trade after the early orders have been filled, and he would not be surprised to see an easier market, especially in view of the hot weather. Mr. Hasler says the brisk demand was all for the early berries, as there is always a rush to get these. He says the fruit arriving this week shows much better quality and maturity than the first receipts.—Produce News.

Notice for Bids for Water-Works Construction.

—Notice is hereby given that sealed bids will be received up to twelve o'clock noon, October 8th, 1909, for the furnishing and laying of a four-inch, cast iron water main and connection in the City of Grand Rapids, as follows, towit:—

Commencing at the intersection of Grand Ave. and Twelfth Ave., run thence North one block on Twelfth Ave. to McKinley St., thence East on McKinley St. one block; also from the intersection of McKinley St. and Twelfth Ave., run West one block on McKinley St., thence North one block on Thirteenth Ave.

Further information as to plans and specifications may be had at the office of the City Clerk of said City.

The successful bidder will be required to execute a bond with sureties, which sureties shall justify as to their responsibility, showing that they are worth in the aggregate, at least, the amount named in the contract, in property not by law exempt from execution.

Bids will be opened and contracts let at the office of Frank Pomainville, Chairman of the Board of Public Works, at 2 o'clock P. M. on the 8th day of October, A. D., 1909.

Bids must be enclosed in a sealed envelope, which shall be marked on the outside, "Bids for the construction of Water-works," and said sealed envelope shall be enclosed in another envelope, and addressed to Frank Pomainville, Chairman of the Board of Public Works.

The Board of Public Works reserves the right to reject any or all bids.

Dated at Grand Rapids, Wisconsin, this 23d, day of September, A. D. 1909.

Frank Pomainville, Fred H. Jackson, E. W. Ellis, Chas. E. Briere, Otto R. Roemins—Board of Public Works.—2t

Opening of the Standing Rock and Cheyenne River Indian Reservations

Registration at Mobridge, Lemmon or Aberdeen S. D., Oct. 4 to 25

—The opening of the Standing Rock and Cheyenne River Indian Reservations in South Dakota and North Dakota in October will give about ten thousand people 160 acres of fertile farming lands for a small sum per acre. The Government has appraised these lands at 50 cents to $6 per acre.

If you intend to engage in farming or are now farming and wish to change your location, why not register for one of these farms? You may be successful in drawing for these lands.

ABERDEEN, South Dakota, on the CHICAGO, MILWAUKEE & ST. PAUL RAILWAY and MOBRIDGE and LEMMON, South Dakota, on the CHICAGO, MILWAUKEE & PUGET SOUND RAILWAY, are points of registration. You can register any day from October 4 to 23. The drawing will take place at Aberdeen on October 26.

The land in the counties to the east of these reservations now sells at $25 and $30 per acre.

This land opening will also give you a splendid opportunity to see the wonderful country opened through the construction of the new line to the the Pacific coast, at small additional cost over your railroad fare to points of registration.

Folders regarding this and opening and the country along the new line in South Dakota, North Dakota and Montana, free. F. A. Miller, General Passenger agent, Chicago, Milwaukee & St. Paul Ry., Chicago.—3t.—Sept. 29

Notice.

—The Sunday train service to Green Bay and intermediate points has been discontinued for the season—Sunday, Sept. 26th, being the last train.

Sept. 29 Nov. 1

Notice of Sale on Foreclosure

State of Wisconsin, In Circuit Court for Wood County.

Ella S. Hiles, Plaintiff,
vs.
Louis Bennett, Defendant.

Notice is hereby given that by virtue of and pursuant to a judgment of foreclosure and sale duly rendered in the above entitled action in the circuit court for said county on the 28th day of September, A. D. 1908, in favor of the above named plaintiff and against the above named defendant therein (more than one year having elapsed since said dairy and no part of such judgment having been paid), Michael Griffin, as sheriff of said county of Wood, will on the 13th day of November, A. D. 1909, at 3:00 o'clock in the afternoon of that day at the front door of the Court House in the city of Grand Rapids, in said Wood County, offer for sale and sell at auction to the highest bidder for cash all the following premises described in said judgment, to-wit:

The Southwest quarter of the Northeast quarter and the Southeast quarter of the Northwest quarter of Section Ten (10), Township Twenty-three (23) North, of Range Three (3) East.

Dated September 29, 1909.

Michael Griffin,
Sheriff of Wood County, Wisconsin

Goggins, Brazeau & Briere,
Plaintiff's Attorneys,
Grand Rapids, Wisconsin.

Death of Mrs. Henry Webb.

Mrs. Henry Webb died at her home in New Rome on Monday morning at 8:15 of paralysis, from which she had suffered the past two weeks, the last week of her illness of which she was unconscious. Mrs. Webb has been a sufferer from rheumatism for eight years during which time she suffered much pain. Deceased was 63 years of age and was born in England, her maiden name being Elizabeth Downing. She was married to Henry Webb May 12th, 1870 in Ellstown, Cornwall, England, coming to this country right after their marriage and locating in the east, where they made their home for a number of years, after which they located in Wood county twenty-eight years ago, living for a time in the town of Seneca, but for nearly twenty-five years living in New Rome. She is survived by a husband, one single daughter, Elizabeth, and a married son named James. Deceased was a kind, christian woman, who had many friends who sincerely mourn her death. The funeral took place from the home today at one o'clock and the remains were laid at rest beside her son in the New Rome cemetery.

Remains Brought Here.

The remains of H. W. Lord were brought to this city from Hancock on Thursday and on Friday afternoon they were interred in the Forest Hill cemetery, Rev. Fred Staff preaching the funeral sermon. The services were under the auspices of the Odd Fellows of this city, of which Mr. Lord was a member. A large number of Mr. Lord's old friends followed the remains to their last resting place.

Maccabees Meeting.

The ladies of the Maccabees will hold a fall reunion in their hall on Friday evening, October 1. Every member is requested to be present. Come and get the Ladies Review for the year 1910 free and thereby help other members to get it.

A New Law Firm.

Messrs. G. G. Wheeler and L. G. Gunderson have rented offices in the Cohen block and will open a law office there. Mr. Wheeler comes from Mayville and Mr. Gunderson from Poynette.

A New Name Suggested.

One of our old residents stopped us on Monday and stated that he had read our article on re-naming the City of Grand Rapids, and in his opinion it was a good thing. He had been up against the same trouble as some of the rest of us. About ten years ago he ordered some tools from a Chicago firm, and notwithstanding the fact that he was getting his mail promptly from the firm, the tools went to Michigan, and it was five weeks before he got them. Since that time he has on several occasions had mail go to Grand Rapids, Michigan, by mistake. He suggested that the name be changed to Grand Dam, in view of the fact that a dam had taken the place which the rapids formerly occupied.

We had hoped that when the name were changed it would be something a trifle more euphonious than the name suggested above. Grandalin, or something of that sort. A name that could be written on an ordinary sheet of letter paper without having it lap over onto the back side; one that a fellow could use about the house without shocking his mother-in-law or the members of the sewing society. But then of course, it will be impossible to satisfy everybody.

Several others have expressed an opinion on the subject and they are nearly all of the idea that it would be a good thing to change the name of the city. One man, however, is of the opinion that the people of Grand Rapids, Michigan, should change the name of their town, instead of us changing. It might be all right to write to them about the matter, they would undoubtedly be glad to accommodate us.

Dairy Show Low Rates.

The various passenger associations have made important announcements during the week regarding the concessions in rates in favor of the National Dairy Show in Milwaukee, October 11th to 21th. The Trunk Line Association has announced an excursion rate of one and one-half first class fare for the round trip, going and returning over the same route. The selling dates of tickets under this rate and the one route condition will be October 17, 18 and 19 with the return date extended to the day following the closing of the show, October 25th.

The railroads in the Western Passenger Association have made a far more liberal concession and will sell excursion tickets at the rate of one and one-half fares for the round trip, the minimum excursion rate being $3.00. This covers all points within a radius of 100 miles of Milwaukee and tickets will be on sale on all lines in the Western Passenger Association, October 14, 15, 16, 18, 19 and 20. Visitors to the dairy show holding tickets purchased in the Western Passenger Association territory can return up to and including October 26th making practically two weeks limit for the validity of tickets and giving all who wish to an opportunity of staying through the entire show.

Dairy Show Special Trains

The word reaching us indicates a wide spread interest in the forthcoming National Dairy Show. In several sections excursion parties are being worked up to take in the show. Minnesota is planning on a special train, and milk shippers near Chicago are going to run a special excursion party, and other sections have the matter in hand. Any community where there are three or four or more who wish to go, could advantageously arrange to go together. This adds to the pleasure and interest of the outing.

She—How long do you think, dear, we shall have to be engaged? He—I have enough money left to last for six months.

ADDITIONAL LOCAL

Miss Clara Golla of Nekoosa was a guest of Miss Lydia Lemense over Sunday.

Miss Inez Witter left on Monday for Chicago where she will visit with friends for a time.

Mrs. Elizabeth Payne and daughter Mrs. Fred Duncan are visiting with relatives in Wausau.

Mr. and Mrs. Chas. Laramie are in Marshfield today to attend the wedding of a relative.

Mrs. John Bell Sr., has been seriously ill since Friday and at present is none better.

Henry Bever, who left for the west some time ago, is now employed in a large real estate office in Seattle.

Miss Ellen MacKinnon has been sick for several days past with what is believed to be appendicitis.

Miss Ellen Richards left on Monday for Merrill to attend the wedding of Delia Sharkey and Henry Shafer.

Mrs. H. Booth arrived home on Saturday from a three weeks visit with relatives in Buckley, Wis.

Mrs. Will Gross left on Thursday for Chicago, where she was called suddenly by the death of a relative.

Miss Martha Bartell of Fairibault, Minn., is visiting at the Albert King home in Kellner for a few weeks.

Dr. D. A. Teller left on Saturday for Oklahoma where he expects to spend a week or ten days on his annual vacation.

Tony Rantz, who is employed as telegraph operator at Tomahawk, is spending a few days in the city visiting with friends.

A reception will be held in the M. E. church parlors on Friday evening for the Rev. Newing. Everybody cordially invited.

Miss Addie Baker, who has been ill for the past four weeks is much improved at this writing, but is still confined to her bed.

Miss Ruby Natwick left on Monday for Chicago where she will enter school for the purpose of studying music and domestic science.

Misses Ella Podawiltz and Agnes Gosling were operated on for appendicitis at the Riverview hospital on Monday. Both patients are getting along nicely.

The ladies of the W. R. C. will hold a rummage sale in the Parrish building on Second street, Saturday, Oct. 2. There will also be various new articles for sale.

The Woman's Missionary Society of the Congregational church will meet with Mrs. F. J. Wood on Wednesday afternoon, Oct. 6th. Everyone is most cordially invited.

Mrs. and Mrs. Herman Yaeger and Mr. and Mrs. Fred Baege of Indiana, who have been guests at the Arthur Lau home for several days, left on Tuesday for Sigel to visit for a time at the Bernard Yaeger home.

Mrs. Geo. E. Hoskinson, who has been visiting in the west for several weeks past, returned home on Friday. She was accompanied by her daughter, Mrs. A. P. Mitten, of Seattle, who will visit here for a time.

Adam Mazur of Chicago visited at the home of Mr. and Mrs. Frank Mazur in this city several days the past week. He left for home on Saturday accompanied by Mrs. Mazur, who will visit relatives in Chicago for a time.

Among our young men who left on Monday for Madison with the intention of attending the University were Laird Warner, Will Moyer, George Arnin, George Pottler, Earl Hill, Leo Nash and A. Nindz.

The stonework on the new office for the Consolidated Water Power & Paper company was completed last week and the carpenters are now at work on the building. The roof will be constructed of tiles and the entire structure promises to put up a handsome appearance.

Dr. W. S. Powell of Bayfield has been in the city since Monday visiting with his friends. The doctor states that he has been engaged in pulling stumps on his farm for some time past and that crops are looking fine up in that country. He also reports that there has been no frost up in that region as yet.

Fred Bessert was seen leaving for the north on Tuesday afternoon with a repeating shotgun in his possession and a pocketfull of cartridges, so that any persons who were figuring on going hunting later in the week may just as well save themselves the trouble, for it is entirely probable that there will not be any game left after Fred gets a whack at it.

George Labreche of Manitowoc spent several days in the city the past week visiting with friends and relatives. On Monday in company with Wm. Young, Pat and Curbis Crotteau, John Moyer, Paul Semroe and Ed. Closuit he left for the northern part of the state on a hunting and fishing trip to be gone a week.

Work on the Wood County National bank will probably be delayed somewhat, owing to the fact that both of the Bedford stone pillars were so badly damaged in transit that it will be necessary to replace them with new ones. It is expected that it will take about six weeks to get the new pieces of stone here.

Plainfield Sun:—Friday morning a man answering to the name of Chas. King of Grand Rapids was brought into town quite badly injured. It seems he left town the night before with quite a "jag" on and rode part way out with Al. Dewitt. He alighted near Wright Wilson's old place, west of here and must have have fallen in the middle of the road where he evidently went to sleep and was run over by a wagon loaded with hay. His spine was badly hurt and one ankle showed marks of the wagon wheel. He said he had a ticket on the Marshfield hospital and Friday evening H. G. Smith accompanied him to Marshfield and saw him safely installed in the hospital. King said he had no regular home nor no relatives in this vicinity.

Don't Like Our Game.

The Stevens Point Journal, from the tone of an article recently published in its columns, does not like the way we play football in Grand Rapids. We had always supposed that the only thing that Stevens Point had against the Grand Rapids play was the fact that they nearly always got beat when they played with our boys. This is certainly a drawback to enthusiasm, but as they advise in their article, they should be cheerful losers, and not let the loss of a few games sour their tempers.

As they say, a contest between highschools should be a gentlemanly affair and strictly on the square, and the one that gets the beating should accept his defeat gracefully and shake hands with the victor and congratulate him on the good work he has done.

But there are two sides to every story. It always seemed to us that football was not a game that was calculated to make a man gentle and polite. That is, there are times during almost every game when one of the side objects seems to be to see if it is not possible to cripple some of the opposing team. Of course we never played football, for which we are not mourning any at the present time, and we do not know as much about it as a man who has had the regular training in that line during a college course, and our views on the subject are gained entirely by watching the mixup from the side lines, so that we may not be as well informed as some others. Still, it always struck us that the game was calculated to develop the but in a man rather than the good, so that we were never a great deal surprised at what did happen at one of those games, even tho it were played by high school pupils.

Nevertheless, we are sorry that our boys are too rough for the Stevens Point team and we hope that the time will come when our boys will adopt a more peacable method so that they can meet the boys from the Point in a friendly game. In case the rules of the game are not changed in the near future so as to bring this about we would suggest that our boys challenge them to a game of croquet, or a knitting contest, or something of that sort.

"Forgive yoh enemies," said Uncle Eben, "but don' let yoh forgiveness go so far as to tempt yoh to git sociable an' trade hosses."—Washington Star.

Electric Railroad.

The following books on the Electric Railroad are for circulation at the Public Library:

Gayetty—Motormen and Conductors Compendium. A practical treatise on the care and operation of street railways.

Standard handbook for electrical engineers.

Atkinson—Power Transmitted by Electricity. Applied by the electric motor and including street railway construction.

Herrick—Practical Electric Railway Handbook.

Livermore—How to Become a Competent Motorman. A practical book on the proper method of operating a street railway.

Night School Opens Oct. 12.

The popular night sessions at the Grand Rapids Business College opens Tuesday evening, October 12. New classes will be formed in shorthand, typewriting, bookkeeping, penmanship, etc., and such other subjects as may be asked for. This affords a splendid opportunity for those who are employed during the day to take these studies.

Will Survey the Islands.

Stevens Point Journal: F. E. Halladay of Plover has been appointed deputy United States surveyor and one of the first duties will be to survey some of the islands in the Wisconsin river. He will commence at the island below the paper mills and will probably survey three other islands between that one and Mosinee. Those islands were not included in the original survey made by the government and are known on the records as "lost islands." It is said that after the surveys are completed the islands will be offered for sale as government land.

To Manufacture Ice Cream.

Guy Getts, who left here last spring for Boise, Idaho, to make his future home has embarked in the wholesale manufacture of ice cream, commencing the past week, Mr. Getts has put in a first class outfit of machinery and is at present negotiating with the Grand Rapids foundry to build him one of their ice machines. Mr. Getts is an enterprising and hustling young business man who will certainly make good in his western home. His many friends in Grand Rapids will wish him success.

REMINGTON

Miss Catherine Elliott spent a few days with friends here on her way to the west.

Miss Ella Casey is visiting with Marie Evenson of Auburndale.

Miss Dora Remington was a business caller in Babcock Saturday.

Mesdames Paul Damme and Jas. Casey were callers at the Knudson home Saturday.

Mrs. Cleveland of Grand Rapids visited her daughter, Mrs. John McGlynn, last week.

Mr. and Mrs. Glen Morse spent Sunday at the Casey home.

Mrs. Scribner of Grand Rapids spent Sunday at the W. H. Bowden home.

Miss Alice Casey is spending a few days with her parents. She leaves on Monday for Grand Rapids where she will work at the A. P. Bever home.

RUDOLPH

Ben Benson is entertaining his brother Michael of South Carolina. Mr. Benson had the misfortune to break his collar bone while alighting from the train at Necedah.

We understand that Nic Marceau has disposed of his meat market the past week.

There was a big surprise party given on Mr. and Mrs. Pat Sharkey at Marceau's hall on Saturday night by their neighbors and friends. There were over 200 in attendance. The young people spent the evening in dancing while the older ones played cards, seven tables being in use. Refreshments were served and a royal good time was had by all. Mr. and Mrs. Sharkey are among the oldest residents of Rudolph and the demonstration given them on Saturday night shows in what esteem they are held by their neighbors, all who wish them success in their new Canadian home.

Taking all her possessions into consideration, there are six colored persons to every white in the British empire.

PORT EDWARDS

The Modern Woodmen gave a chicken chowder on the island Sunday. Everyone reports a fine time.

E. B. Garrison and wife met with quite an accident on Saturday evening while returning from Wausau in their auto. Mrs. Garrison was thrown out and an ugly gash cut in her lip.

Miss Georgia Ridgman was the guest of Miss Mae Cahill Tuesday and Friday.

Miss Katie Gisday is visiting her sister, Mrs. Joseph Bradnel.

Mrs. Frank Armen went to Nekoosa Tuesday on business.

There was quite an excitement here Sunday evening when two farmers got to scrapping. One of the men got somewhat excited and struck the other on the head with an iron bolt, causing a gash four inches long. Dr. Aylward was called and dressed the wound and the other man was sent to jail till morning when he was taken before Justice Cahill and fined ten dollars and costs. Most likely he will think twice before he hits with an iron bar again.

Miss Dolly Slattery taught school here Tuesday while Miss Berard attended her brother's wedding.

Miss Grace Fleming of Milwaukee is the guest of Mrs. Fred Gall.

Miss Laura Dove returned home Wednesday from Milwaukee where she had been visiting friends for the past two weeks.

Clara Golla was the guest of Anna Cahill a few days last week.

Styles for Men

FALL & WINTER

We Announce the First Arrival of Fall and Winter Clothes for Men and Young Men

HERE is the beginning of a series of somewhat out-of-the-ordinary talks designed to promote our better acquaintance.

About good clothes and good values, of course.

But they'll be two-sided enough to be of mutual help and profit, you may depend upon it.

If we can only get into these talks some of the *real* spirit and service of this store—the desire to build our success upon your satisfaction, not at your expense—our aim will be rewarded.

This is the store of Better Things—not only better merchandise, but better service, better accomplishment, better values as every season goes by.

Along this line we're uncommonly glad to announce the first arrival of Fall and Winter *Better Things* in Men's and Young Men's clothes from

The House of Kuppenheimer

You'll find them in strict keeping with our policy of the highest-grade merchandise in every line.

The styles are correct; in advance; the weaves are unusual in worth; the workmanship loyal and right.

Better come look them over if for no other reason than to set yourself right on the correct styles and fabrics for Fall and Winter.

We show overcoats in the new models at $15, $18, $20, $22.50, $25, and $35

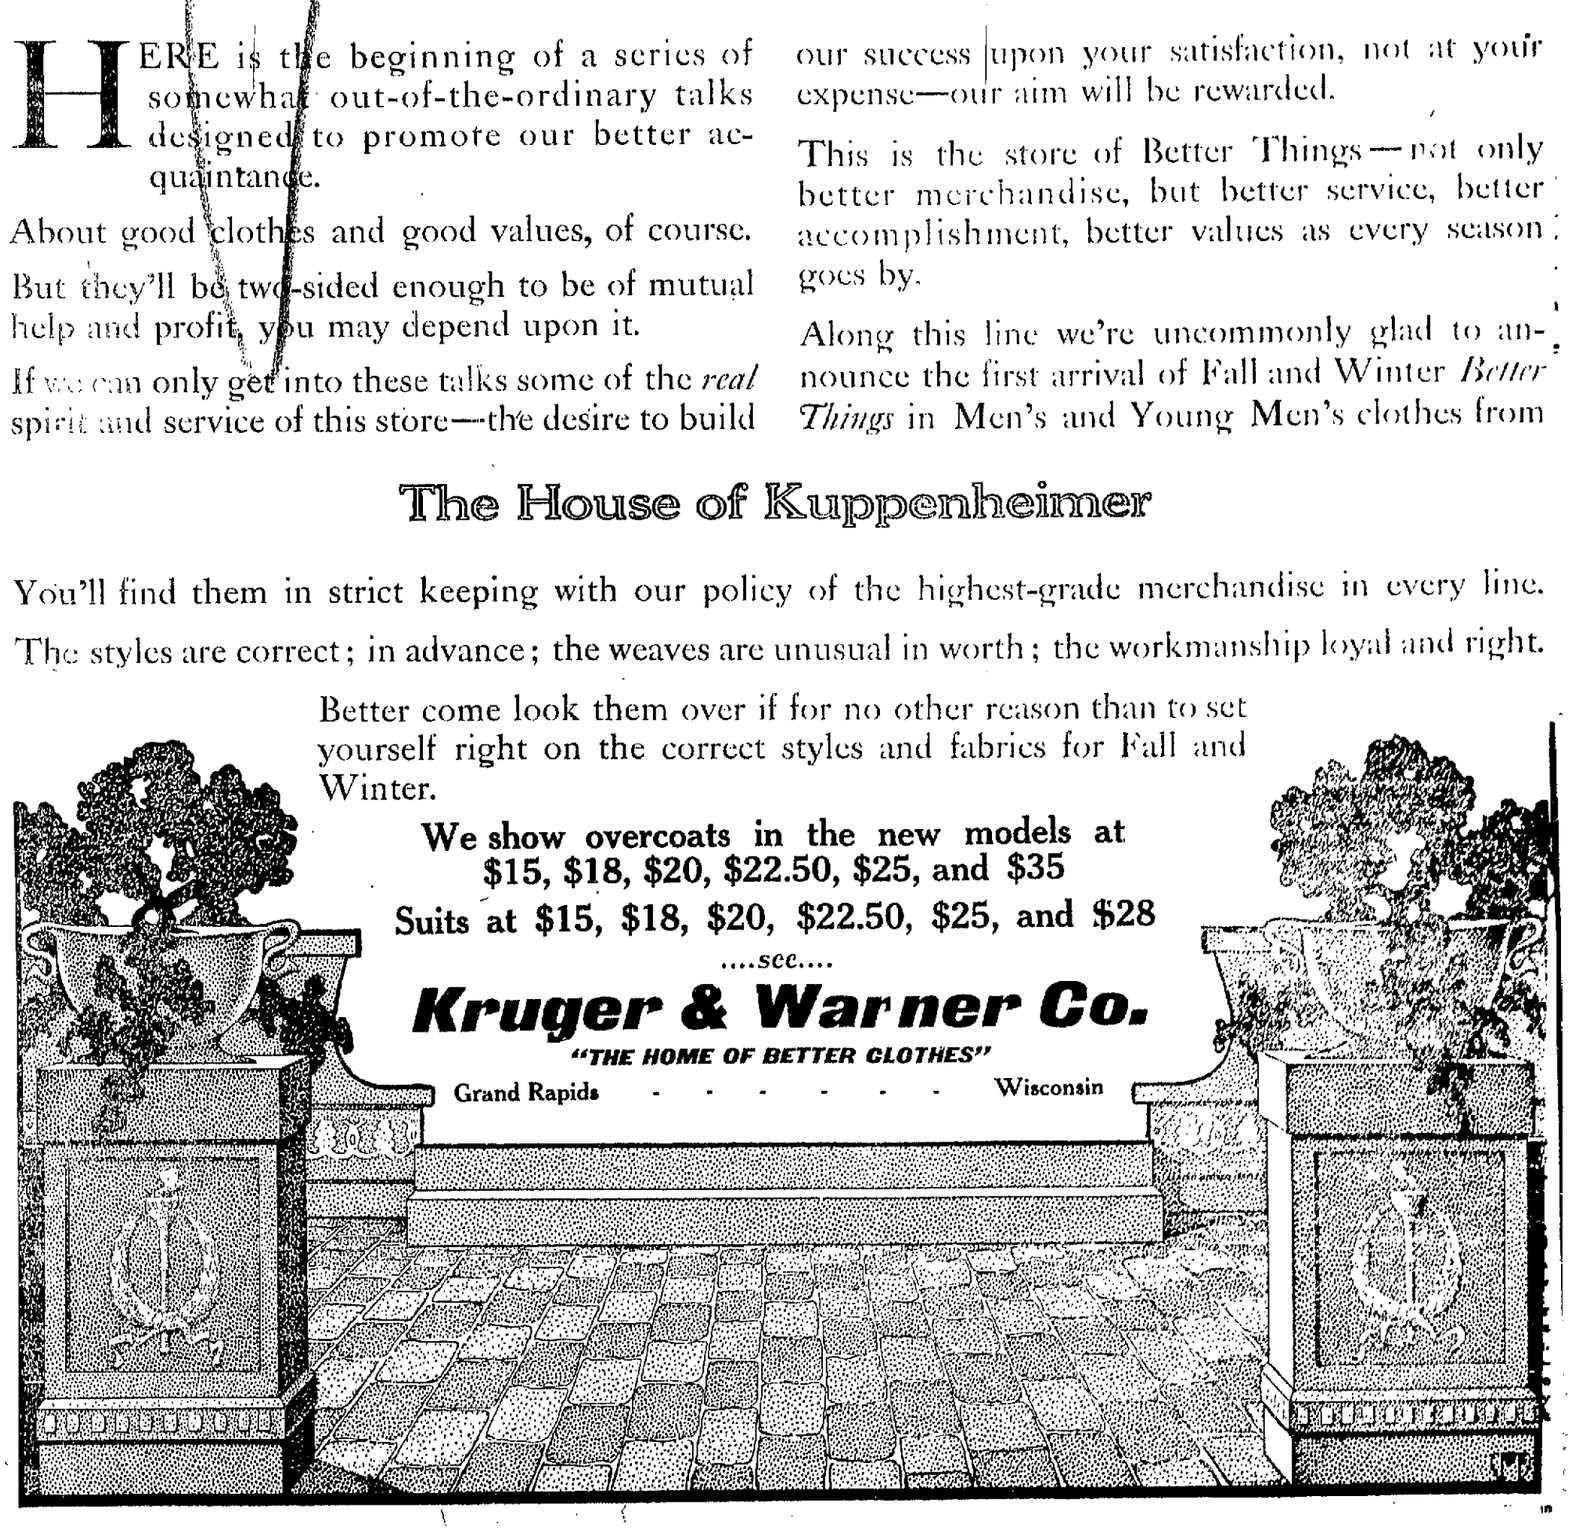

Suits at $15, $18, $20, $22.50, $25, and $28

NEWSPAPERARCHIVE®

Big Cranberry Trade

Chicago, Sept. 17.—Cape Cod cranberries have arrived freely for the season, and despite the extreme heat this week—worse than the worst summer weather—a pretty good trade was reported. Charles Schlosser of the National Fruit Exchange says the demand has been surprisingly good. The Exchange's shipments for local use and reshipping—about a dozen cars to date—have cleaned up promptly at steady prices. He says dealers are taking the berries readily, and it now looks like Early Blacks would go out uninterruptedly at at least $5.50, Chicago basis, or $6 as the Cape price. The quotation for the best colored berries here this week was $7. Mr. Schlosser says latest advices confirm the early reports from Wisconsin that the frost cut the crop fully 50 per cent. The weather since then has been favorable for the maturity of the berries and what are left promise good quality. They are now picking and show pretty good color.

E. L. Hasler says he looks for a lull in the trade after the early orders have been filled, and he would not be surprised to see an easier market, especially in view of the hot weather. Mr. Hasler says the brisk demand was all for the early berries, as there is always a rush to get these. He says the fruit arriving this week shows much better quality and maturity than the first receipts.—Produce News.

Notice for Bids for Water-Works Construction.

—Notice is hereby given that sealed bids will be received up to twelve o'clock noon, October 8th, 1909, for the furnishing and laying of a four-inch, cast iron water main and connection in the City of Grand Rapids, as follows, towit:—

Commencing at the intersection of Grand Ave. and Twelfth Ave., run thence North one block on Twelfth Ave. to McKinley St., thence East on McKinley St. one block; also from the intersection of McKinley St. and Twelfth Ave., run West one block on McKinley St., thence North one block on Thirteenth Ave.

Further information as to plans and specifications may be had at the office of the City Clerk of said City.

The successful bidder will be required to execute a bond with sureties, which sureties shall justify as to their responsibility, showing that they are worth in the aggregate, at least, the amount named in the contract, in property not by law exempt from execution.

Bids will be opened and contracts let at the office of Frank Pomainville, Chairman of the Board of Public Works, at 2 o'clock P. M. on the 8th day of October, A. D., 1909.

Bids must be enclosed in a sealed envelope, which shall be marked on the outside, "Bids for the construction of Water-works," and said sealed envelope shall be enclosed in another envelope, and addressed to Frank Pomainville, Chairman of the Board of Public Works.

The Board of Public Works reserves the right to reject any or all bids.

Dated at Grand Rapids, Wisconsin, this 22d, day of September, A. D. 1909.

Frank Pomainville, Fred H. Jackson, E. W. Ellis, Chas. E. Briere, Otto R. Roenius—Board of Public Works.—3t

Opening of the Standing Rock and Cheyenne River Indian Reservations

Registration at Mobridge, Lemmon or Aberdeen S. D., Oct. 4 to 25

—The opening of the Standing Rock and Cheyenne River Indian Reservations in South Dakota and North Dakota in October will give about ten thousand people 160 acres of fertile farming lands for a small sum per acre. The Government has appraised these lands at 50 cents to $6 per acre.

If you intend to engage in farming or are now farming and wish to change your location, why not register for one of these farms? You may be successful in drawing for these lands.

ABERDEEN, South Dakota, on the CHICAGO, MILWAUKEE & ST. PAUL RAILWAY and MOBRIDGE and LEMMON, South Dakota, on the CHICAGO, MILWAUKEE & PUGET SOUND RAILWAY, are points of registration. You can register any day from October 4 to 23. The drawing will take place at Aberdeen on October 26.

The land in the counties to the east of these reservations now sells at $25 and $30 per acre.

This land opening will also give you a splendid opportunity to see the wonderful country opened through the construction of the new line to the the Pacific coast, at small additional cost over your railroad fare to points of registration.

Folders regarding this and opening and the country along the new line in South Dakota, North Dakota and Montana, free. F. A. Miller, General Passenger agent, Chicago, Milwaukee & St. Paul Ry., Chicago.—3t.—Sept. 30

Notice.

—The Sunday train service to Green Bay and intermediate points has been discontinued for the season —Sunday, Sept. 26th, being the last train.

Sept. 29 Nov. 3

Notice of Sale on Foreclosure

State of Wisconsin, In Circuit Court for Wood County.

Ella S. Hiles, Plaintiff.

—VS—

Louis Bennett, Defendant.

Notice is hereby given that by virtue of and pursuant to a judgment of foreclosure and sale duly rendered in the above-entitled action in the circuit court for said county on the 28th day of September, A. D. 1908, in favor of the above named plaintiff and against the above named defendant therein (more than one year having elapsed since said entry and no part of such judgment having been paid), Michael Griffin, as sheriff of said county of Wood, will, on the 13th day of November A. D. 1909, at 3:00 o'clock in the afternoon of that day at the front door of the Court House in the city of Grand Rapids, in said Wood County, offer for sale and sell at auction to the highest bidder for cash all the following premises described in said judgment, to-wit:

The Southwest quarter of the Northeast quarter and the Southeast quarter of the Northwest quarter of Section Ten (10), Township Twenty-three (23) North, of Range Three (3) East.

Dated September 29, 1909.

Michael Griffin,
Sheriff of Wood County, Wisconsin

Goggins, Brazeau & Briere,
Plaintiff's Attorneys,
Grand Rapids, Wisconsin.

Death of Mrs. Henry Webb.

Mrs Henry Webb died at her home in New Rome on Monday morning at 8:15 of paralysis, from which she had suffered the past two weeks, the last week of her illness of which she was unconscious. Mrs. Webb has been a sufferer from rheumatism for eight years during which time she suffered much pain. Deceased was 63 years of age and was born in England, her maiden name being Elizabeth Downing. She was married to Henry Webb May 12th, 1870 in Ellstown, Cornwall, England, coming to this country right after their marriage and locating in the east, where they made their home for a number of years, after which they located in Wood county twenty-eight years ago, living for a time in the town of Seneca, but for nearly twenty-five years living in New Rome. She is survived by a husband, one single daughter, Elizabeth, and a married son named James. Deceased was a kind, christian woman, who had many friends who sincerely mourn her death. The funeral took place from the home today at one o'clock and the remains were laid at rest beside her son in the New Rome cemetery.

Remains Brought Here.

The remains of H. W. Lord were brought to this city from Hancock on Thursday and on Friday afternoon they were interred in the Forest Hill cemetery, Rev. Fred Staff preaching the funeral sermon. The services were under the auspices of the Odd Fellows of this city, of which Mr. Lord was a member. A large number of Mr. Lord's old friends followed the remains to their last resting place.

Maccabees Meeting.

The Ladies of the Maccabees will hold a fall reunion in their hall on Friday evening, October 1. Every member is requested to be present. Come and get the Ladies Review for the year 1910 free and thereby help other members to get it.

A New Law Firm.

Messrs. G. C. Wheeler and L. C. Gunderson have rented offices in the Cohen block and will open a law office there. Mr. Wheeler comes from Mayville and Mr. Gunderson from Poynette.

A New Name Suggested.

One of our old residents stopped us on Monday and stated that he had read our article on re-naming the City of Grand Rapids, and in his opinion it was a good thing. He had been up against the same trouble as some of the rest of us. About ten years ago he ordered some tools from a Chicago firm, and notwithstanding the fact that he was getting his mail promptly from the firm, the tools went to Michigan, and it was five weeks before he got them. Since that time he has on several occasions had mail go to Grand Rapids, Michigan, by mistake. He suggested that the name be changed to Grand Dam, in view of the fact that a dam had taken the place which the rapids formerly occupied.

We had hoped that when the name were changed it would be something a trifle more euphonious than the name suggested above. Grandalia, or something of that sort. A name that could be written on an ordinary sheet of letter paper without having it lap over onto the back side; one that a follow could use about the house without shocking his mother-in-law or the members of the sewing society. But then of course, it will be impossible to satisfy everybody.

Several others have expressed an opinion on the subject and they are nearly all of the idea that it would be a good thing to change the name of the city. One man, however, is of the opinion that the people of Grand Rapids, Michigan, should change the name of their town, instead of us changing. It might be all right to write to them about the matter, they would undoubtedly be glad to accommodate us.

Dairy Show Low Rates.

The various passenger associations have made important announcements during the week regarding the concessions in rates in favor of the National Dairy Show in Milwaukee, October 14th to 24th. The Trunk Line Association has announced an excursion rate of one and one-half first class fare for the round trip, going and returning over the same route. The selling dates of tickets under this rate and the one route condition will be October 17, 18 and 19 with the return date extended to the day following the closing of the show. October 25th.

The railroads in the Western Passenger Association have made a far more liberal concession and will sell excursion tickets at the rate of one and one-half fares for the round trip, the minimum excursion rate being $3.00. This covers all points within a radius of 100 miles of Milwaukee and tickets will be on sale on all lines in the Western Passenger Association, October 14, 15, 16, 18, 19 and 20. Visitors to the dairy show holding tickets purchased in the Western Passenger Association territory can return up to and including October 26th making practically two weeks limit for the validity of tickets and giving all who wish to an opportunity of staying through the entire show.

Dairy Show Special Trains

The word reaching us indicates a wide spread interest in the forthcoming National Dairy Show. In several sections excursion parties are being worked up to take in the show. Minnesota is planning on a special train, and milk shippers near Chicago are going to run a special excursion party, and other sections have the matter in hand. That is, there are times during almost every game when one of the sole objects seems to be to see if it is not possible to cripple some of the oppesing team. Of course we never played football, for which we are not mourning any at the present time, and we do not know as much about it as a man who has had the regular training in that line during a college course, and our views on the subject are gained entirely by watching the mixup from the side lines, so that we may not be as well informed as some others. Still, it always struck us that the game was calculated to develop the bad in a man rather than the good, so that we were never a great deal surprised at what did happen at one of these games, even tho it were played by high school pupils

Nevertheless, we are sorry that our boys are too rough for the Stevens Point team and we hope that the time will come when our boys will adopt a more peacable method so that they can meet the boys from the Point in a friendly game. In case the rules of the game are not changed in the near future so as to bring this about we would suggest that our boys challenge them to a game of croquet, or a knitting contest, or something of that sort.

"Fohgive yoh enemies," said Uncle Eben, "but don' let yoh forgiveness go so far as to tempt yoh to git sociable an' trade hosses."—Washington Star.

Electric Railroad.

The following books on the Electric Railroad are for circulation at the Public Library:

Gayetty—Motormen and Conductors Compendium. A practical treatise on the care and operation of street railways.

Standard handbook for electrical engineers.

Atkinson—Power Transmitted by Electricity. Applied by the electric motor and including street railway construction.

Herrick—Practical Electric Railway Handbook.

Livermore—How to Become a Competent Motorman. A practical book on the proper method of operating a street railway.

Night School Opens Oct. 12.

The popular night sessions at the Grand Rapids Business College opens Tuesday evening, October 12. New classes will be formed in shorthand, typewriting, bookkeeping, penmanship, etc., and such other subjects as may be asked for. This affords a splendid opportunity for those who are employed during the day to take these studies.

Will Survey the Islands.

Stevens Point Journal: F. E. Halladay of Plover has been appointed deputy United States surveyor and one of the first duties will be to survey some of the islands in the Wisconsin river. He will commence at the island below the paper mills and will probably survey three other islands between that one and Mosinee. These islands were not included in the original survey made by the government and are known on the records as "lost islands." It is said that after the surveys are completed the islands will be offered for sale as government land.

To Manufacture Ice Cream.

Guy Getts, who left here last spring for Boise, Idaho, to make his future home has embarked in the wholesale manufacture of ice cream, commencing the past week. Mr. Getts has put in a first class outfit of machinery and is at present negotiating with the Grand Rapids foundry to build him one of their ice machines. Mr. Getts is an enterprising and hustling young business man who will certainly make good in his western home. His many friends in Grand Rapids will wish him success.

REMINGTON

Miss Catherine Elliott spent a few days with friends here on her way to the west.

Miss Ella Casey is visiting with Marie Evenson of Auburndale.

Miss Dora Remington was a business caller in Babcock Saturday.

Mesdames Paul Damme and Jas. Casey were callers at the Knudson home Saturday.

Mrs. Cleveland of Grand Rapids visited her daughter, Mrs. John McGlynn, last week.

Mr. and Mrs. Glen Morse spent Sunday at the Casey home.

Mrs. Scribner of Grand Rapids spent Sunday at the W. H. Bowden home.

Miss Alice Casey is spending a few days with her parents. She leaves on Monday for Grand Rapids where she will work at the A. R. Bever home.

RUDOLPH

Ben Benson is entertaining his brother Michael of South Carolina. Mr. Benson had the misfortune to break his collar bone while alighting from the train at Necedah.

We understand that Nic Marceau has disposed of his meat market the past week.

There was a big surprise party given on Mr. and Mrs. Bat Sharkey at Marceau's hall on Saturday night by their neighbors and friends. There were over 200 in attendance. The young people spent the evening in dancing while the older ones played cards, seven tables being in use. Refreshments were served and a royal good time was had by all. Mr. and Mrs. Sharkey are among the oldest residents of Rudolph and the demonstration given them on Saturday night shows in what esteem they are held by their neighbors, all who wish them success in their new Canadian home.

Taking all her possessions into consideration, there are six colored persons to every white in the British empire.

PORT EDWARDS

The Modern Woodmen gave a chicken chowder on the island Sunday. Everyone reports a fine time.

E. B. Garrison and wife met with quite an accident on Saturday evening while returning from Wausau in their auto. Mrs. Garrison was thrown out and an ugly gash cut in her lip.

Miss Georgia Ridgman was the guest of Miss Mae Cahill Tuesday and Friday.

Miss Katie Grodsy is visiting her sister, Mrs. Joseph Bradner

Mrs. Frank Armon went to Nekoosa Tuesday on business.

There was quite an excitement here Sunday evening when two farmers got to scrapping. One of the men got somewhat excited and struck the other on the head with an iron bolt, causing a gash four inches long. Dr. Aylward was called and dressed the wound and the other man was sent to jail till morning when he was taken before Justice Cahill and fined ten dollars and costs. Most likely he will think twice before he hits with an iron bar again.

Miss Dolly Slattery taught school here Tuesday while Miss Berard attended her brother's wedding.

Miss Grace Fleming of Milwaukee is the guest of Mrs. Fred Gall.

Miss Laura Davo returned home Wednesday from Milwaukee where she had been visiting friends for the past two weeks.

Clara Golla was the guest of Anna Cahill a few days last week.

Styles for Men

FALL & WINTER

We Announce the First Arrival of Fall and Winter Clothes for Men and Young Men

HERE is the beginning of a series of somewhat out-of-the-ordinary talks designed to promote our better acquaintance.

About good clothes and good values, of course.

But they'll be two-sided enough to be of mutual help and profit, you may depend upon it.

If we can only get into these talks some of the *real* spirit and service of this store—the desire to build our success upon your satisfaction, not at your expense—our aim will be rewarded.

This is the store of Better Things—not only better merchandise, but better service, better accomplishment, better values as every season goes by.

Along this line we're uncommonly glad to announce the first arrival of Fall and Winter *Better Things* in Men's and Young Men's clothes from

The House of Kuppenheimer

You'll find them in strict keeping with our policy of the highest-grade merchandise in every line. The styles are correct; in advance; the weaves are unusual in worth; the workmanship loyal and right.

Better come look them over if for no other reason than to set yourself right on the correct styles and fabrics for Fall and Winter.

We show overcoats in the new models at $15, $18, $20, $22.50, $25, and $35

Suits at $15, $18, $20, $22.50, $25, and $28
